B. CAL-Card Use

State departments may use the CAL-Card for the payment of invoices. Use of the CAL-Card requires the execution of a Purchasing Authority Purchase Order (Std. 65) in accordance with Article15, Purchase Execution and must include all required documentation applicable to the purchase.

The CAL-Card is a payment mechanism, not a procurement approach and, therefore, does not relieve State departments from adhering to all procurement laws, regulations, policies, procedures, and best practices, including those discussed in the State Contracting Manual (SCM) Volume 1 and Volume 2. This includes but is not limited to the application of all sales and use tax laws, rules and policies as applicable to the purchase.

C. State Financial Marketplace

State departments reserve the right to select the form of payment for all procurements, be it either an outright purchase with payment rendered directly by the State, or a financing/lease-purchase or operating lease via the State Financial Marketplace (GS $Mart and/or Lease $Mart). If payment is via the financial marketplace, the Contractor will invoice the State department and the State department will approve the invoice and

the selected Lender/Lessor for all product listed on the State's procurement document will pay the Contractor on behalf of the State.

D. Payee Data Record

Each State department's accounting office must have a copy of the Contractor's Payee Data Record (Std. 204) in order to process payments. State departments should forward a copy of the Std. 204 to their accounting offices. Without the Std. 204, payment may be unnecessarily delayed.

33. CAL-CARD INVOICING

All CAL-Card invoices are to be processed separately from other payment methods and include the elements identified in Article 31, Invoicing. CAL-Card invoices shall be submitted to the CAL-Card account holder. The total invoice amount for each CAL-Card order must reflect a zero (0) balance due or credit, if applicable, and state "paid by CAL-Card".

The Contractor shall bear all material and labor costs for repair of equipment defects and failure. The Contractor shall be the main point of contact for all warranty issues and shall facilitate any necessary contact between the ordering agency and the manufacturer.

Substitute products will be comparable to or better than the products removed. In instances where it is necessary for the Contractor to return the products to the factory, the Contractor will be responsible for all costs of the products from the time it leaves the authorized purchaser's site until it is returned to the site in good operating condition.

Only new standard parts or parts equal in performance to new parts will be used in effecting repairs. Parts that have been replaced will become the property of the Contractor. Replacement parts installed will become the property of the authorized purchaser.

All operating system software and firmware will be considered an integral component of the equipment and the Contractor will respond to all requests for warranty service for any failure.

Warranty services during the warranty period will not include electrical work external to the products, the furnishing of supplies, or adding or removing accessories, attachments, or other devices not provided under this contract. Warranty services also will not include repair of damage resulting from transportation by the authorized purchaser between ordering agencies sites or from accident.

36. EQUIPMENT REPLACEMENT DURING WARRANTY

If a product provided fails to perform in accordance with technical specifications and functional descriptions contained or referenced in the awarded contract agreement and is subject to warranty response three (3) or more times during any ninety (90) day period, the Contractor will, upon the authorized purchaser's request, replace the product at no cost. The DGS-PD, as the awarding department, has assessed the Contractor and subcontractor certifications and CUF during the solicitation evaluation process. Consequently, when executing purchase documents pursuant to this contract, it is not necessary for State departments operating under statewide contract purchasing authority to request the completion of a Bidder Declaration document or perform additional CUF analysis. The State department should make a notation of this within their procurement file.
