S2001

EARNINGS IN THE PAST 12 MONTHS (IN 2017 INFLATION-ADJUSTED DOLLARS)

2013-2017 American Community Survey 5-Year Estimates

Supporting documentation on code lists, subject definitions, data accuracy, and statistical testing can be found on the American Community Survey website in the Technical Documentation section.

Sample size and data quality measures (including coverage rates, allocation rates, and response rates) can be found on the American Community Survey website in the Methodology section.

Although the American Community Survey (ACS) produces population, demographic and housing unit estimates, it is the Census Bureau's Population Estimates Program that produces and disseminates the official estimates of the population for the nation, states, counties, cities, and towns and estimates of housing units for states and counties.

Subject	Riverside city, California				
	Total		Percent		Male
	Estimate	Margin of Error	Estimate	Margin of Error	Estimate
Population 16 years and over with earnings	161,168	+/-1,838	161,168	+/-1,838	86,778
Median earnings (dollars)	27,523	+/-836	(X)	(X)	31,615
FULL-TIME, YEAR-ROUND WORKERS WITH	94,997	+/-2,059	94,997	+/-2,059	56,869
$1 to $9,999 or loss	1,728	+/-314	1.8%	+/-0.3	845
$10,000 to $14,999	4,092	+/-539	4.3%	+/-0.6	2,054
$15,000 to $24,999	15,090	+/-851	15.9%	+/-0.8	8,049
$25,000 to $34,999	16,857	+/-1,016	17.7%	+/-1.0	9,953
$35,000 to $49,999	18,642	+/-985	19.6%	+/-0.9	11,521
$50,000 to $64,999	13,396	+/-796	14.1%	+/-0.8	8,018
$65,000 to $74,999	6,345	+/-525	6.7%	+/-0.5	4,036
$75,000 to $99,999	8,985	+/-660	9.5%	+/-0.7	5,674
$100,000 or more	9,862	+/-663	10.4%	+/-0.7	6,719
Median earnings (dollars) for full-time, year-round workers with earnings	41,576	+/-623	(X)	(X)	44,065
Mean earnings (dollars) for full-time, year-round workers with earnings	53,892	+/-1,223	(X)	(X)	56,799
MEDIAN EARNINGS BY EDUCATIONAL ATTAINMENT					
Population 25 years and over with earnings	34,582	+/-1,129	(X)	(X)	37,759
Less than high school graduate	23,342	+/-1,234	(X)	(X)	27,226
High school graduate (includes equivalency)	29,806	+/-1,325	(X)	(X)	32,925
Some college or associate's degree	35,362	+/-1,223	(X)	(X)	41,414
Bachelor's degree	50,651	+/-1,620	(X)	(X)	57,500
Graduate or professional degree	73,051	+/-2,562	(X)	(X)	78,052

Subject	Riverside city, California				
	Male	Percent Male		Female	
	Margin of Error	Estimate	Margin of Error	Estimate	Margin of Error
Population 16 years and over with earnings	+/-1,624	86,778	+/-1,624	74,390	+/-1,790
Median earnings (dollars)	+/-591	(X)	(X)	23,277	+/-991
FULL-TIME, YEAR-ROUND WORKERS WITH	+/-1,606	56,869	+/-1,606	38,128	+/-1,283
$1 to $9,999 or loss	+/-224	1.5%	+/-0.4	883	+/-212
$10,000 to $14,999	+/-377	3.6%	+/-0.7	2,038	+/-356
$15,000 to $24,999	+/-649	14.2%	+/-1.1	7,041	+/-597
$25,000 to $34,999	+/-824	17.5%	+/-1.3	6,904	+/-636
$35,000 to $49,999	+/-729	20.3%	+/-1.1	7,121	+/-651
$50,000 to $64,999	+/-640	14.1%	+/-1.0	5,378	+/-426
$65,000 to $74,999	+/-425	7.1%	+/-0.7	2,309	+/-301
$75,000 to $99,999	+/-471	10.0%	+/-0.8	3,311	+/-440
$100,000 or more	+/-554	11.8%	+/-1.0	3,143	+/-371
Median earnings (dollars) for full-time, year-round workers with earnings	+/-1,637	(X)	(X)	38,398	+/-1,989
Mean earnings (dollars) for full-time, year-round workers with earnings	+/-1,630	(X)	(X)	49,556	+/-1,567
MEDIAN EARNINGS BY EDUCATIONAL ATTAINMENT					
Population 25 years and over with earnings	+/-1,277	(X)	(X)	30,297	+/-868
Less than high school graduate	+/-1,601	(X)	(X)	18,036	+/-1,127
High school graduate (includes equivalency)	+/-2,312	(X)	(X)	24,933	+/-1,085
Some college or associate's degree	+/-1,768	(X)	(X)	30,161	+/-1,691
Bachelor's degree	+/-5,753	(X)	(X)	45,703	+/-2,351
Graduate or professional degree	+/-4,067	(X)	(X)	67,404	+/-5,019

Graduate or professional degree	(X)	(X)

Data are based on a sample and are subject to sampling variability. The degree of uncertainty for an estimate arising from sampling variability is represented through the use of a margin of error. The value shown here is the 90 percent margin of error. The margin of error can be interpreted roughly as providing a 90 percent probability that the interval defined by the estimate minus the margin of error and the estimate plus the margin of error (the lower and upper confidence bounds) contains the true value. In addition to sampling variability, the ACS estimates are subject to nonsampling error (for a discussion of nonsampling variability, see Accuracy of the Data). The effect of nonsampling error is not represented in these tables.

When information is missing or inconsistent, the Census Bureau logically assigns an acceptable value using the response to a related question or questions. If a logical assignment is not possible, data are filled using a statistical process called allocation, which uses a similar individual or household to provide a donor value. The "Allocated" section is the number of respondents who received an allocated value for a particular subject.

While the 2013-2017 American Community Survey (ACS) data generally reflect the February 2013 Office of Management and Budget (OMB) definitions of metropolitan and micropolitan statistical areas; in certain instances the names, codes, and boundaries of the principal cities shown in ACS tables may differ from the OMB definitions due to differences in the effective dates of the geographic entities.

Estimates of urban and rural populations, housing units, and characteristics reflect boundaries of urban areas defined based on Census 2010 data. As a result, data for urban and rural areas from the ACS do not necessarily reflect the results of ongoing urbanization.

Explanation of Symbols:

1. An '**' entry in the margin of error column indicates that either no sample observations or too few sample observations were available to compute a standard error and thus the margin of error. A statistical test is not appropriate.
2. An '-' entry in the estimate column indicates that either no sample observations or too few sample observations were available to compute an estimate, or a ratio of medians cannot be calculated because one or both of the median estimates falls in the lowest interval or upper interval of an open-ended distribution.
3. An '-' following a median estimate means the median falls in the lowest interval of an open-ended distribution.
4. An '+' following a median estimate means the median falls in the upper interval of an open-ended distribution.
5. An '***' entry in the margin of error column indicates that the median falls in the lowest interval or upper interval of an open-ended distribution. A statistical test is not appropriate.
6. An '*****' entry in the margin of error column indicates that the estimate is controlled. A statistical test for sampling variability is not appropriate.
7. An 'N' entry in the estimate and margin of error columns indicates that data for this geographic area cannot be displayed because

the number of sample cases is too small.

8. An '(X)' means that the estimate is not applicable or not available.
