1

## Overview

This presentation will cover how we got to the six maps presented to you today.

- Required Redistricting Criteria
- Census Data
- COI to Maps
- Draft Maps
  - A3, B, C2, C3, D, D3

2

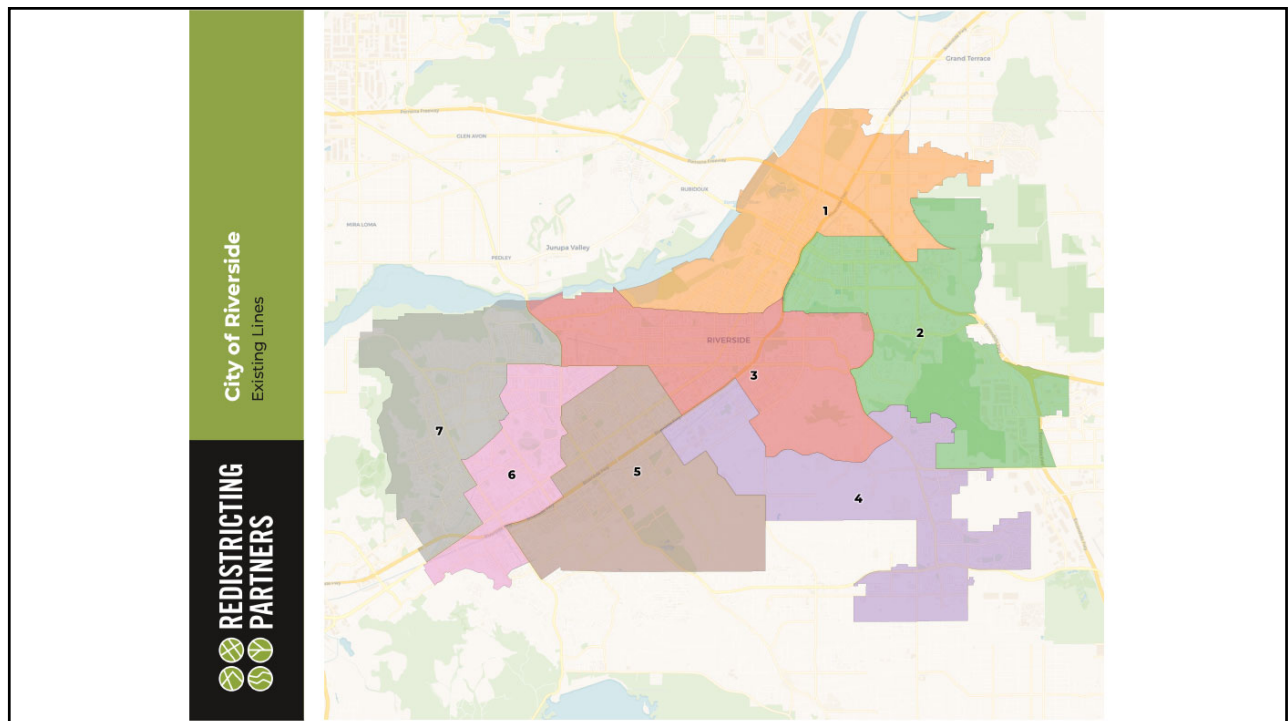

## Required Redistricting Criteria

Ranked criteria that must be followed in city redistricting

There are a number of criteria that are required under the FAIR MAPS Act (ranked):

- Relatively equal size - people, not citizens
- Contiguous – districts should not hop/jump
- Maintain “communities of interest”
- Easily identifiable and understandable lines, following city, natural, and man-made boundaries
- Keep districts compact – appearance/function

**REDISTRICTING PARTNERS**

## From COI to Maps

With the FAIR MAPS Act requiring cities to include the public input in the redistricting process, we move redistricting out into the public, with maps driven by Community of Interest testimony.

- **Input from community drives process** with multiple ways for the public to engage.
- **Rules for process** emphasize the importance of traditional criteria and minimizing divisions of neighborhoods.

## Draft B

- Draft B was created to establish a smaller total deviation while maintaining the current lines as much as possible.
- Boundaries between 1 and 2 were adjusted to smooth out the boundaries and maintain more of University in Ward 2.
- Changes in Ward 6 occurred to smooth out the lines and follow the highway when possible.
- Neighborhoods that were previously split continue to be split.
  - 14 neighborhoods kept whole
  - 13 neighborhoods split

## Next Steps

### Draft Plan Revisions

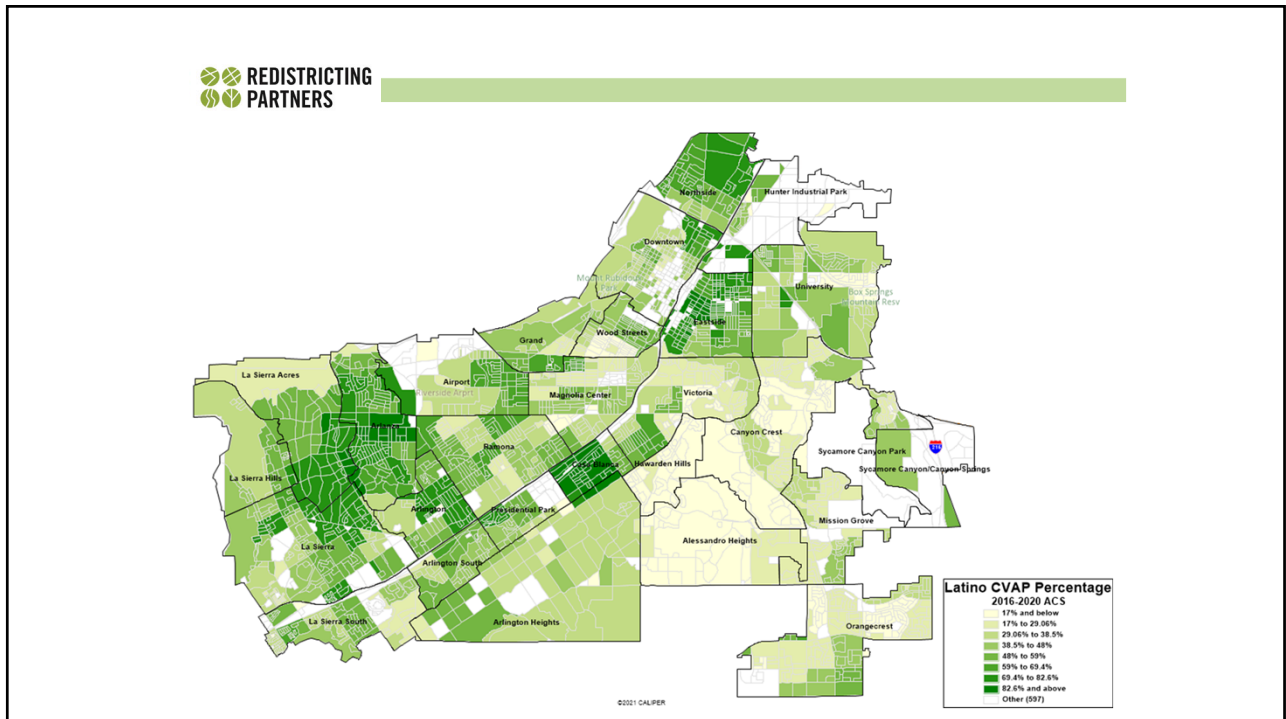

The City Council can make use of these mapping options in a number of ways

- Suggest possible changes – Redistricting Partners can provide adjustments to the boundaries.
- Gather public input – the public will be very willing to tell us where we got the lines wrong. Input is our ally in developing final plans.
- Select the map or maps you like and eliminate the map(s) you don't like, in accord with California and Federal laws.
