

ANNUAL WATER SUPPLY AND DEMAND ASSESSMENT

Public Utilities

City Council

June 14, 2022

RiversideCA.gov

1

BACKGROUND

1. The California Water Code Section 10632.1 requires that urban water suppliers prepare an Annual Assessment and submit an Annual Shortage Report to the California Department of Water Resources (DWR) by July 1 of every year starting in 2022 and every year after.
2. The Annual Assessment and associated Annual Shortage Report are to be conducted by water agencies based on the procedures detailed in their adopted Water Shortage Contingency Plan (WSCP) and the recommendations provided by the DWR Annual Water Supply and Demand Assessment (AWSDA) Guidance.
3. The Annual Water Supply & Demand Assessment (AWSDA) Final guidance was published on April 19, 2022.

2

RiversideCA.gov

2

BACKGROUND

The purpose of the Annual Assessment is to:

1. Evaluate water supply reliability for the current year and one dry year and;
2. Generate and submit an Annual Shortage Report on the Annual Assessment and results regarding their anticipated shortages to DWR by July 1 every year starting July 1, 2022.

DISCUSSION

Riverside's Available Water Supply Projection in 2022-2023:

1. RPU's Annual Assessment reflects the available water supply from groundwater extraction rights in the San Bernardino Basin Area (SBBA), Riverside Basin, and the Rialto-Colton Basin, as shown on the next slide;
2. RPU also has an agreement with Western Municipal Water District (WMWD) to access up to 21,700 Acre Feet per Year (AFY) of imported water; and
3. Recycled water for non-potable uses which is supplied from the City of Riverside Regional Water Quality Control Plant that satisfies the need of up to 800 AFY.

4

4

CURRENT WATER SUPPLIES

Extraction/Export Rights

Bunker Hill

- 55,263 AFY Export

Colton

- 2,728 AFY Export

Riverside North

- 10,902 AFY Export

Riverside South

- 16,880 AFY Extraction

85,773 AFY Total

RIVERSIDE'S WATER DEMAND IN 2022 AND 2023

The total potable and non potable monthly water demand projections for RPU from July 2022 to June 2023 is estimated:

1. By adding all the next year projection water needs for all demand categories and, 20% reduction per RPU WSCP stage 3 as requested by DWR.
2. Based on the monthly projected weather and growth.

REQUIRED SUBMITTALS TO DWR FOR THE AWSDA

Status Completion of RPU's AWSDA Required Submittal

	Report Topic
Table 1	Annual Assessment Information
Table 2	Key Data - Demands, containing estimated unconstrained demand from July – June of next year
Table 3	Key Data - Supplies, containing estimated available supplies from July – June of next year
Table 4	Annual Water Shortage Assessment, showing a summary of monthly supply/demand balances and shortages and results of planned actions.
Table 5	Planned Water Shortage Response Actions, containing information on planned water shortage response actions (if any)
RPU Methodology	Optional attachments to include details on implementing the procedures that took place this year. Information may consist of descriptions of the steps followed, data sources considered, methodologies used, and the decision-making process
