This is primarily due to a combination of: 1) starting the year with a higher than planned beginning cash balance due to \$13M of miscellaneous settlements and liquidated damages received; 2) higher revenues than expected due to higher consumption by customers; 3) lower expenses than planned due to lower energy prices and timing of payments and 4) lower than anticipated capital improvement spending through November. Based on current planned projects and remaining budgeted expenses, we anticipate being within minimum and maximum levels by year end as required by RPU's fiscal policy.
