Loss Trends & Market Disruptors

Major U.S. Losses in 2024

U.S. 2024 Billion-Dollar Weather and Climate Disasters

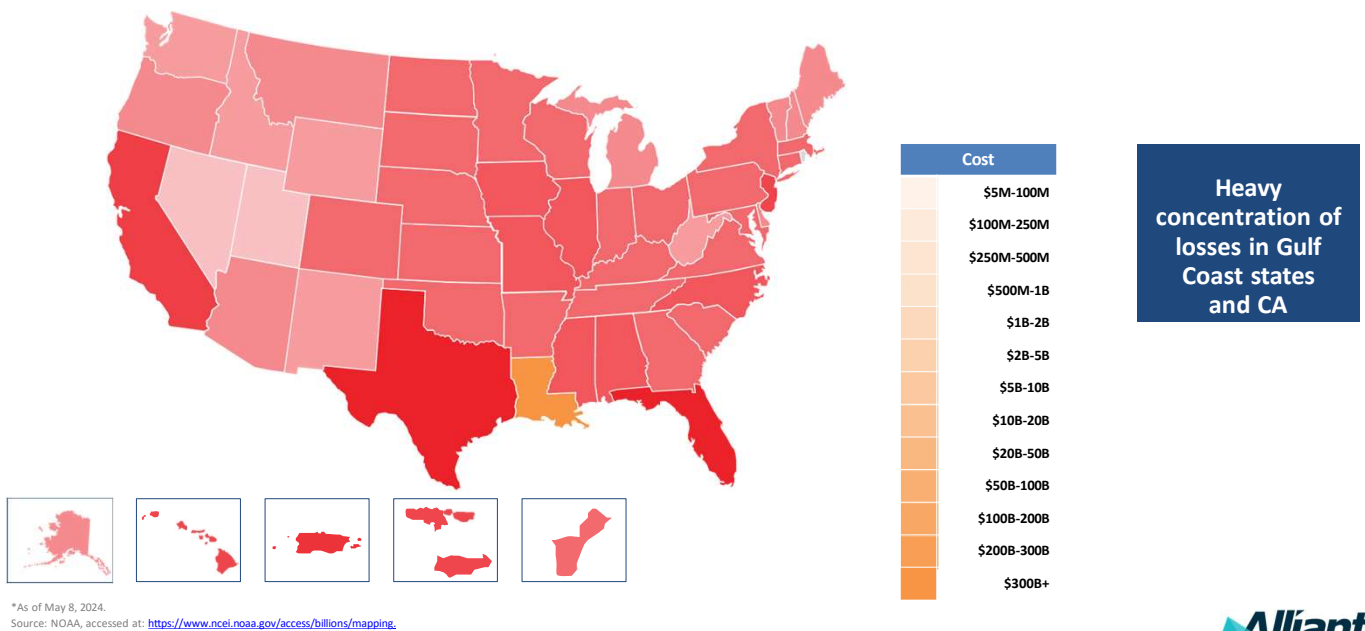

This map denotes the approximate location for each of the 27 separate billion-dollar weather and climate disasters that impacted the United States in 2024.

- In 2024, there were 27 confirmed weather/climate disaster events with losses exceeding \$1 billion each to affect United States.
- These events included 1 drought event, 1 flooding event, 17 severe storm events, 5 tropical cyclone events, 1 wildfire event, and 2 winter storm events.
- Overall, these events resulted in the deaths of 568 people and had significant economic effects on the areas impacted.
- The [1980–2023 annual average is 8.5 events](#) (CPI-adjusted); the annual average for the [most recent 5 years \(2019–2023\) is 20.4 events](#) (CPI-adjusted).

Distribution of Losses from US Billion-Dollar Weather and Climate Disasters 2024* (CPI-Adjusted)

Alliant

California Wildfires (as of Jan. 21, 2025)

- ~17,000+ structures destroyed/damaged
- ~40,000 acres burned across all fires
- 27 confirmed fatalities
- ~170,000 residents were under evac. orders
- ~\$32.5B: Insured Loss Est. (midpoint)
 - ~\$1.9M per claim!
 - \$250B - \$275B: Econ Loss Est.
- **CA FAIR Plan: Largest Exposure**
 - Has \$2.63B reins., co-reins, assessments
- Issue rapidly politicized, Insurers demonized

11

Social Inflation: Many Interrelated Causes, Difficult to Manage

California is the trial bar's laboratory. It's where they go to pursue innovative new theories of liability and push the envelope with regard to expanding liability for business. The courts welcome these theories with open arms and businesses are overwhelmed with claims.

Nuclear verdicts

Number of reported verdicts over \$100 million hit an all-time high of at least 23 in 2023

2023

\$23.8 million

Median nuclear verdict

\$21.1 million

Median nuclear verdict for personal injury/wrongful death cases

\$88.9 million

Mean nuclear verdict for personal injury/wrongful death cases

Insurance claim costs

Increasing Propensity to Sue

Size of Jury Awards

Courts/Juries Favoring Plaintiffs

Growing Distrust of Large Corps.

Litigation Financing

Aggressive Plaintiff Bar Ads

Changes in Regulatory and Legal Environment

Underwriting Trends Toward the Future

Property Renewal Outlook

Continued scrutiny of data (SOV, COPE, ITV with Increased Construction Cost)

- *Must go to market with a compelling narrative*
- *Emphasis on data quality will not be going away any time soon*

Increased retentions and caps on certain types of exposure

- *Programs that have not undergone changes over the course of the last few renewal cycles may face scrutiny, particularly on Windstorm & Severe Convective Storm*
- *Separate, increased Water Damage deductibles are gaining momentum*

Rate outcomes are highly dependent on remainder of 2024 Wind Season and individual client losses

Underwriter submission activity remains high – imperative to engage early and access global market

Regional Underwriting: Property markets are affected differently across the nation

- *e.g., West: Wildfire/Earthquake, East: Hurricanes, Midwest: SCS, etc.*

The Los Angeles fires are expected to have significant consequences for both the insurance and reinsurance markets.

High Losses: Insured losses could exceed \$50 billion, with total economic losses possibly reaching up to \$150 billion. A large portion of the damages may be uninsured, highlighting the growing coverage gap.

Liability Claim Trends and Inflationary Pressures

Liability Claims frequency has increased

- Third-party litigation funding (TPLF)
- Aging Infrastructure
- Dissatisfaction

Liability Claim severity has increased

- Social Inflation (legal system abuse)
- Medical Cost Inflation
- Plaintiff Bar Success – Advertising, Reptile Theory, etc.

Inflation Toll

- As inflation increases, Insurance Carriers seek increased premiums
 - Higher claims payouts, operational costs, etc.
 - Investment Portfolio is impacted
- Claims more likely to approach retention levels, retentions increases are common

15

Cyber Market – Cyber Liability Claims Trends

Ransomware losses continue to be a major concern, as it is the #1 cybersecurity threat to all businesses

MetaPixel and Movelt claims have skyrocketed and as such, underwriters are adding exclusions to those without sufficient controls

Select U.S. markets have begun inserting 'widespread event' or 'catastrophic first party loss' exclusions on their renewals

As the war in Ukraine continues, London underwriters are all deploying proprietary/Lloyd's war exclusion language

Despite some groups conducting politically-motivated ransomware and data extortion attacks the vast majority of ransomware and data extortion attacks continue to be financially motivated. Fewer of these attacks involve encryption (locking) of data compared to years past

Expected increase in state and federal regulations and cyber related enforcement actions

16

Factors Contributing to Record Workers' Compensation Claims Severity

Factors serving as cost drivers resulting increased claims severity

Medical
Technology

Accident
Survivability

Life Expectancy

Fee Schedules

Presumption
Laws

The Job Market

Vendor Labor
Shortages

Comorbidities
& COVID-19
