1.2 During the term of this Agreement, as the need arises, Consultant shall have the opportunity to submit proposals for Assigned Projects. The scope of work, including the completion date for the Assigned Project, will be as set forth in writing and issued by the City ("Project Narrative"). Any modification to the Services will also be set forth in the Project Narrative. All proposals submitted shall be reviewed by the Contract Administrator, as that term is defined below, and a single consultant will be selected to perform the services for that particular Assigned Project. Acceptance of Consultant's proposal shall be made in the form of a Supplemental Agreement for the Assigned Project, a sample of which is attached hereto as Exhibit "B" and incorporated herein by reference, or by Consultant's acceptance of the terms and conditions of the City's Purchase Order.

2. **Term.** This Agreement shall begin on the Effective Date and shall expire five (5) years thereafter ("Expiration Date") or the required date for completion of an Assigned Project, provided a project was assigned prior to the Expiration Date. If the maximum cumulative payment obligation is not reached, the City may, at its option, extend the term for one (1) additional three (3) year terms, not to exceed eight (8) years based upon acceptable performance by the Company, acceptable fees and subject to the same terms and conditions of the Agreement. Pricing is to remain firm for the entire contract term, including any future extensions.

3. Compensation/Payment.

3.1 **Contract Price.** The total amount to be paid to Consultant for all Assigned Projects pursuant to this Agreement shall not exceed an aggregate of Two Hundred Fifty Thousand Dollars (\$250,000.00) over the term of this Agreement.

3.2 Consultant shall receive compensation for all Services rendered under this Agreement as set forth in Exhibit "A" and set forth in the Supplemental Agreement or Purchase Order issued by the City. There will be no reimbursement for out-of-pocket expenses including but not limited to travel and lodging, local travel/mileage, photocopying, first class U.S. postage, telephone, facsimile, and mobile/telephone communication charges. With prior written approval, City may choose to approve reimbursement for overnight courier charges, certified return/receipt mail charges, and specialty reproduction charges at cost plus ten percent (10%) for administrative, coordination and handling time.

This duty to defend shall apply whether or not such claims, allegations, lawsuits or proceedings have merit or are meritless, or which involve claims or allegations that any or all of the Parties to be Defended were actively, passively, or concurrently negligent, or which otherwise assert that the Parties to be Defended are responsible, in whole or in part, for any loss, damage or injury. Consultant agrees to provide this defense immediately upon written notice from the City, and with well qualified, adequately insured and experienced legal

counsel acceptable to the City. This obligation to defend as set forth herein is binding on the successors, assigns and heirs of Consultant and shall survive the termination of Consultant's Services under this Agreement.

Prior to the City's execution of this Agreement, Consultant shall provide satisfactory evidence of, and shall thereafter maintain during the term of this Agreement, such insurance policies and coverages in the types, limits, forms and ratings required herein. The rating and required insurance policies and coverages may be modified in writing by the City's Risk Manager or City Attorney, or a designee, unless such modification is prohibited by law.

12.1.2 Ratings. Any insurance policy or coverage provided by Consultant or subcontractors as required by this Agreement shall be deemed inadequate and a material breach of this Agreement, unless such policy or coverage is issued by insurance companies authorized to transact insurance business in the State of California with a policy holder's rating of A or higher and a Financial Class of VII or higher.

The City, and its officers, employees and agents, shall be named as additional insureds under the Consultant's insurance policies.

12.3.1 Consultant's commercial general liability insurance policy shall cover both bodily injury (including death) and property damage (including, but not limited to, premises operations liability, products-completed operations liability, independent contractor's liability, personal injury liability, and contractual liability) in an amount not less than \$1,000,000 per occurrence and a general aggregate limit in the amount of not less than \$2,000,000.

Said policies shall be in the usual form of commercial general and automobile liability insurance policies, but shall include the following provisions:

It is agreed that the City of Riverside, and their officers, employees and agents, are added as additional insureds under this policy, solely for work done by and on behalf of the named insured for the City of Riverside.

SCOPE OF SERVICES

2.1 Demonstrated Understanding

Phase I Environmental Site Assessment (ESA) ASTM E1527-13 & E1527-21:

The Phase I ESA will be performed in conformance with the scope and limitations of ASTM Standard Practice E1527-13 and the Environmental Protection Agency Standards and Practices for All Appropriate Inquiries (40 CFR Part 312) and ASTM E1527-21. The Phase I ESA will be conducted under the charge of an Environmental Professional and will include the following:

- Site visit and walk-through of the property and structures, readily accessible interior common areas, and a representative sample of occupant spaces. Items such as current and past uses of the property and adjoining properties; property boundaries; observable topographic, geologic, and hydrogeologic conditions; structures or other improvements; roads; source and location of potable water; wells; surface water; potential hazardous substances and/or petroleum products; storage tanks; abnormal odors; pools of liquid; drums and containers; suspected fill materials; stained soil or pavement; stressed vegetation; solid waste; waste water discharges; floor drains, sumps or clarifiers; and septic systems shall be noted as reasonably and visibly observed.
- Search of local, state, tribal and federal databases in accordance with current ASTM and AAI standard search distances.
- Contact local and state agencies, such as environmental health departments, fire prevention bureaus, and building and planning departments to identify any current or previous reports of hazardous materials use, storage, and/or unauthorized releases that may have impacted the subject property. In addition, information pertaining to Activity and Use Limitations (AULs), defined as legal or physical restrictions, or limitations on the use of, or access to, a site or facility, if requested.
- Site history and land use review, including reasonably ascertainable agency records, aerial photographs, historical city directories, fire insurance maps, and other applicable sources.
- Interviews with knowledgeable persons (i.e. past and present owners, property managers, tenants, neighbors), as available and open to interview, regarding the history, operations, waste management, and other environmental considerations for the property.
- Additional observations, though generally outside the scope of a PH I ESA but provided as a service to our clients unless otherwise instructed, include EPA-determined radon zone, visual inspection of asbestos-containing building materials, lead-based paint, and mold.
- Report includes findings, opinions and conclusions, photographs, site map, historical sources, and qualifications in a manner consistent with standard practices.

HUD, CDBG, HOME, ESG Funding, and NEPA Environmental Review (If Needed):

Furthermore, if needed the ESA can comply with the requirements of Chapter 9 (Environmental Review & Requirements) of HUD's Multifamily Accelerated Processing (MAP) Guide, revised March 19, 2021 or the HUD LEAN Handbook, Chapter 7 Environmental Review, revised January 19, 2017:

- If requested and required per HUD Guidelines, AEI will perform a baseline asbestos survey in general accordance with ASTM E2356-18. This scope will provide a screening and evaluation of suspect ACMs as well as the sampling and analysis to determine asbestos content.
- If requested and required per HUD Guidelines, AEI will perform a Lead-Based Paint (LBP) Inspection and/or Risk Assessment in accordance with HUD Guidelines. The scope of this survey and the number of units and common areas to be assessed is being completed in accordance with the requirements of Chapters 5 and 7 of the Guidelines for the Evaluation and Control of Lead-Based Paint Hazards in Housing.
- If required by HUD Guidelines, radon testing at the Subject will be completed in accordance with the latest requirements established by HUD and will consist of 100% ground floor units and 10% upper floor units being tested in each residential building. Duplicates and blanks will also be utilized. All testing will be completed by certified measurement professional with credential from the American Association of Radon Scientists and Technicians (AARST) and/or the National Radon Proficiency Program (NRRP). For those states where radon testing needs to be conducted by a licensed radon

measurement professional, AEI will have same completed by a licensed professional properly registered in said state.

Asbestos Survey:

The objective of the survey will be to identify, as far as practicable, visible, and accessible suspect asbestos-containing materials (ACM) used in construction, within the interior areas of the Site for site evaluation purposes. Identification of asbestos materials is required so that appropriate actions may be taken, if necessary, to protect site workers and to effectively manage asbestos materials in accordance with all applicable regulations. Suspect building materials will be divided into "Homogeneous Areas", which are determined by the inspector to be similar based on their color, texture, and age. A representative number of samples will be collected for each Homogeneous Area. AEI's certified asbestos Inspector(s) will collect bulk samples in 4-mil plastic bags (or similar sealable container), and transport them to a laboratory. Each sample collected will be assigned its own unique coded number. Samples will be collected, analyzed, and stored under strict chain-of-custody protocol. The following are the Homogeneous Application symbols which shall be used for identification during each of the surveys:

- T = Thermal System Insulation
- M = Miscellaneous Materials
- S = Surfacing Materials (Troweled or Spray-Applied)

Any materials identified and deemed inaccessible by the inspector(s) will be noted. Asbestos surveys are considered destructive in that the collection of multiple bulk building material samples must be performed for subsequent laboratory analysis. Multiple samples of each suspect building material are collected utilizing hand tools via chipping, cutting, gouging, coring, or scraping. Samples may vary in size depending upon the type of material(s) being collected and the location of the material. Larger samples are sometimes required to access layered materials (i.e., multiple layers of flooring or roofing).

Numbers of samples which may be collected will be based on AEI's in-house sampling protocol, which is based in part on the EPA Asbestos Hazard Emergency Response Act (AHERA) regulations. Any materials identified and deemed inaccessible by the inspector(s) will be noted and discussed in the formal report. AEI's estimate for the number of bulk material samples that will be collected/analyzed during the inspection is included in the Fee Proposal. It should be noted that some materials are multi-layered and are inseparable during the bulk sample collection process. Each layer requires specific analysis and reporting by layer (each layer = 1 sample analysis).

The minimum number of samples to be collected and analyzed for each homogeneous material shall be as specified in the following table. This table was developed based on the AHERA Sampling Protocol (40 CFR 763.86).

Homogeneous Material Classification	Number of Samples
Surfacing Materials	Up to 1,000 sq. ft. - 3 Samples 1,001 - 5,000 sq.ft. - 5 Samples 5,001 - 10,000 sq.ft. - 7 Samples Over 10,000 sq.ft. - Minimum 9 Samples
Thermal Systems Insulation	Minimum 3 Samples, per system
Miscellaneous Materials	Minimum 2 Samples, per HA
Patch Materials	Minimum 2 Sample, per patch

Sample analysis will be performed using Polarized Light Microscopy with Dispersion Staining (PLM/DS) in accordance with the Environmental Protection Agency (EPA) Method 600/M4-82-020, or EPA Method 600/R-93/116 at a licensed/accredited laboratory. All samples shall be submitted to the analytical laboratory for analysis on a three-day turnaround unless specified differently in the Fee Proposal.

All work will be performed by a certified/licensed asbestos inspector(s) who has completed the required Environmental Protection Agency (EPA) approved training course for asbestos building inspection.

2.2 General Approach

AEI's goal is to provide timely, accurate, and cost-effective reports so that our clients can make the best-informed business decision. Our project management methodology begins after the receipt of authorization. The AEI point of contact for the client will simultaneously begin the process of staffing and project coordination. A staff member who is most qualified will be chosen to manage the report. Project coordination will begin within 24 hours of project engagement. Phase 1 Environmental Site Assessment will be delivered within a 25 to 30-business day turnaround. It should be noted that additional responses from State agencies will be required prior to being able to finalize a Phase 1 Environmental Site Assessment. State agencies typically have 30-60 days to provide a response upon receipt of consultation. This includes responses, if needed, from Air Quality, Endangered Species, Farmlands Protection and Historic Preservation. Reports will be delivered by Point of Contact. The bar chart below provides a visual depiction of the services to be provided and timeline for completion by AEI:

Timeline

Once a project report is written, the project manager will submit a draft report/finding to an internal AEI Senior Author. The Senior Author will ensure the deliverable meets our high internal standards for content, spelling, grammar, and more.

AEI Consultants also employs a project database, which automatically updates all parties involved on a project of the delivery timeline. This includes scheduled reminders at specific timeline milestones, such as email reminders at 5, 2, and 1 day before the deliverable is due. These fail-safes ensure that all involved staff are communicating on progress and deadlines are met.

Final reports can be delivered to the City of Riverside either as a draft or final report, as requested. Any comments, edits, or conversations regarding findings can be brought to Chad Matthews and the Senior Author. AEI can offer early project updates if requested, including an email that provides an early status update, items of potential concern, and forecasting of any recommendations for additional investigation.

Staffing Required:

AEI's Consulting team is projected to consist of those individuals listed in section 4.0 Company Personal. Resumes for these professionals are included in section 10.0

Consultant agrees, at its cost and expense, to promptly defend the City, and the City's employees, officers, managers, agents and council members (collectively the "Parties to be Defended") from and against any and all claims, allegations, lawsuits, arbitration proceedings, administrative proceedings, regulatory proceedings, or other legal proceedings to the extent the same arise out of, pertain to, or relate to the negligence, recklessness or willful misconduct of Consultant, or anyone employed by or working under the Consultant or for services rendered to the Consultant in the performance of the Agreement, notwithstanding that the City may have benefited from its work or

services and whether or not caused in part by the negligence of an Indemnified Party. Consultant agrees to provide this defense immediately upon written notice from the City, and with well qualified, adequately insured and experienced legal counsel acceptable to the City. Consultant will reimburse Client for reasonable defense costs for claims arising out of Consultant's professional negligence based on the percentage of Consultant's liability. This obligation to defend as set forth herein is binding on the successors, assigns and heirs of Consultant and shall survive the termination of Consultant's Services under this Agreement.

11.3 Indemnity For Design Professional Liability. When the law establishes a professional standard of care for Consultant's services, to the fullest extent permitted by law, Consultant shall indemnify, protect and hold harmless the City and the City's employees, officers, managers, agents, and council members ("Indemnified Parties") from and against any and all claim for damage, charge, lawsuit, action, judicial, administrative, regulatory or arbitration proceeding, damage, cost, expense (including counsel and expert fees), judgment, civil fines and penalties, liabilities or losses of any kind or nature whatsoever to the extent the same arise out of, pertain to, or relate to the negligence, recklessness or willful misconduct of Consultant, or anyone employed by or working under the Consultant or for services rendered to the Consultant in the performance of the Contract, notwithstanding that the City may have benefited from its work or services and whether or not caused in part by the negligence of an Indemnified Party.

11.4 Defense Obligation For Other Than Design Professional Liability. This duty to defend shall apply whether or not such claims, allegations, lawsuits or proceedings have merit or are meritless, or which involve claims or allegations that any or all of the Parties to be Defended were actively, passively, or concurrently negligent, or which otherwise assert that the Parties to be Defended are responsible, in whole or in part, for any loss, damage or injury. Consultant agrees to provide this defense immediately upon written notice from the City, and with well qualified, adequately insured and experienced legal counsel acceptable to the City. This obligation to defend as set forth herein is binding on the successors, assigns and heirs of Consultant and shall survive the termination of Consultant's Services under this Agreement.

11.5 Indemnity For Other Than Design Professional Liability. Said policies shall be in the usual form of commercial general and automobile liability insurance policies, but shall include the following provisions:

It is agreed that the City of Riverside, and their officers, employees and agents, are added as additional insureds under this policy, solely for work done by and on behalf of the named insured for the City of Riverside.

12.3.4 The insurance policy or policies shall also comply with the following provisions:

- a. The policy shall be endorsed to waive any right of subrogation against the City and its sub-consultants, employees, officers and agents for services performed under this Agreement.
- b. If the policy is written on a claims made basis, the certificate should so specify and the policy must continue in force for one year after completion of the services. The retroactive date of coverage must also be listed.

- c. The policy shall specify that the insurance provided by Consultant will be considered primary and not contributory to any other insurance available to the City.

12.4 Errors and Omissions Insurance. Prior to the City's execution of this Agreement, Consultant shall obtain, and shall thereafter maintain during the term of this Agreement, errors and omissions professional liability insurance in the minimum amount of \$1,000,000 to protect the City from claims resulting from the Consultant's activities.

12.5 Subcontractors' Insurance. SCOPE OF SERVICES

PRINCIPALS & EMPLOYEES

At Alltech, we hold a steadfast commitment to ensuring that every member of our team, whether they serve as Officers, Supervisors, or in Management roles, possesses the requisite Licenses and Permits to work as a Security Officer. This foundational requirement reflects our dedication to professionalism, regulatory compliancy, and the execution of duties with the utmost competence.

We believe that effective leadership is best cultivated through an intimate understanding of the roles our team members undertake. Therefore, it is our expectation that our Management personnel should be well-versed in the intricacies of a site's operations and be prepared to step into an Officer's shoes if the need arises. This approach underscores our belief that all members of our team must exhibit professionalism and perform their duties to the highest standards.

In situations where a Manager conducts on-site inspections or supervision and identifies areas of concern or discrepancies that fall short of our stringent standards, they possess the authority to make immediate corrections. In such cases, the Manager can temporarily replace the Officer on duty, ensuring that the site remains secure and our service levels are maintained at all times.

Promoting From Within

Our commitment to promoting from within is deeply rooted in our organizational ethos. Every Supervisor within our ranks has earned their position through dedicated service as Officers, showcasing their commitment, competence, and potential for leadership. We believe that merit and performance are the most accurate measures of a team member's suitability for advancement within our company.

Leadership With a Vision

As an organization, our leadership is not limited to the boardroom. Our President and CEO, Oscar Gamez is truly the guiding force behind our operations. He possesses not only the leadership acumen to steer our company, but also the visionary perspective needed to support your mission of safety. We take immense pride in our ability to consistently meet and exceed our clients' expectations, consistently delivering the services they desire and require.

Our Scope of Work

Preservation of Peace and Order: Our officers will actively discourage and address any incidents of disorderly conduct or disruptions that may jeopardize the safety of visitors, personnel, and the local community, and may result in property damage or loss. Support will include property inspection throughout the day, addressing any emergencies, contacting the main point of contact. Additionally, they are equipped to manage and respond to such situations, including notifying the relevant authorities when further intervention is necessary or requested.

Exemplary Customer Service: Our officers prioritize exceptional customer service by embodying qualities of courtesy, friendliness, attentiveness, and helpfulness toward the City facilities, its employees, the public & property. They receive training to engage effectively with the public, particularly when encountering potential delinquents, violators, or transients. This training equips them with the skills to address these situations assertively yet courteously. Our staff is also well-versed in the daily operations of the facilities they oversee and are trained in conflict resolution and de-escalation techniques to defuse potentially confrontational situations involving the public.

Swift Response to Emergencies: In the event of an emergency, our personnel are well-prepared to respond promptly. They are trained to request appropriate assistance, notify dispatch, and alert the designated emergency contacts for the respective post. Our officers are proficient in managing a wide range of emergency scenarios, offering assistance to responding agencies, and effectively maintaining crowd control when required.

SERVICE CAPABILITIES

Dispatch Services: Alltech's dispatch service operates around the clock, 7 days a week, ensuring constant accessibility. Officers are equipped with cell phones for seamless communication with dispatchers at any given moment. They are responsible for reporting their on-duty and off-duty statuses, and they are also expected to promptly report when approaching potentially hazardous situations. Additionally, our clients have the convenience of contacting a supervisor through the provided dispatch number at any time.

Post Orders Management: The formulation of post orders is overseen by the Operations Manager, with further verification conducted by the General Manager and site management. Security Officers undergo comprehensive training to familiarize themselves with these post orders. These documents contain a thorough description of the officers' job responsibilities and include vital information such as emergency contact numbers and procedures.

Supervision & Operations Management: The primary point of contact for the contract at Alltech will be our President, who assumes responsibility for communicating any changes or performance-related issues to the Field Supervisors (on-site managers).

In addition to the President, an Operations Manager will be designated for the contract. The Operations Manager serves as the second-in-command and maintains constant communication with the President, remaining well-informed about all contract-related matters. The Operations Manager's responsibilities encompass contract compliance, personnel recruitment, and oversight of billing processes.

Prior to permanent assignment, security officers undergo extensive on-the-job training, typically spanning 30-40 hours. This training includes comprehensive instruction on site overview, post orders, and the execution of these orders.

Supervisors play a pivotal role in ensuring that security officers are fully and correctly attired in their uniforms and that all post-specific rules and regulations are enforced. Should discrepancies arise, supervisors take appropriate corrective actions, which may involve retraining officers on post-specific procedures or issuing warnings. Furthermore, supervisors are responsible for ensuring that Daily Activity Reports (DARs) and Incident Reports are accurately completed. They conduct unannounced inspections of officers on a daily and weekly basis, with their findings reported to the President and Operations Manager.

Alltech places significant emphasis on the proactive involvement of supervisors in maintaining compliance with post orders. They regularly check in with officers to ensure adherence to post orders, and the Operations Manager conducts thorough reviews of post orders, reports, and dispatch activity to ensure the delivery of high-quality services.

To uphold the highest standards, Alltech management continuously monitors all employees, including supervisors, to ensure that they perform to the best of their abilities and that clients receive top-tier service. We maintain a comprehensive log of performance reviews and take necessary disciplinary actions in cases of non-compliance with policies or post orders.

THIS MASTER PROFESSIONAL CONSULTANT SERVICES AGREEMENT ("Agreement") is made and entered into this _____ day of _____, 2025 ("Effective Date"), by and between the CITY OF RIVERSIDE, a California charter city and municipal corporation ("City"), and BENDER ROSENTHAL, INC., a California corporation ("Consultant").

RECITALS

A. The City requires the services of a consultant that is experienced in providing Appraisal Services.

B. The City issued a Request for Proposals for purposes of establishing a panel of consultants experienced in providing consulting services in each of the following six categories: (1) Appraisal Services; (2) Acquisition Services; (3) Relocation Services; (4) Property Management Services – Interim and Full Scope; (5) Environmental Site Assessments – Phase 1, Phase 2, Asbestos, and Lead-Based Paint Surveys; and (6) Security Guard Services.

C. Consultant has the necessary experience in providing Appraisal Services.

D. Consultant has submitted a proposal to the City and has affirmed its willingness and ability to provide such services in said category.

E. The City may retain Consultant for various projects pursuant to this Agreement.

F. The total Contract Price, as defined herein, for all work assigned to Consultant shall be aggregated.

AGREEMENT

1. Scope of Services.

1.1 The City hereby retains Consultant to perform, and Consultant agrees to render, professional services for various City projects ("Assigned Project") as those services are more particularly described in Exhibit "A," "Scope of Services" ("Services"), attached hereto and incorporated herein by reference.

1.2 During the term of this Agreement, as the need arises, Consultant shall have the opportunity to submit proposals for Assigned Projects. The scope of work, including the completion date for the Assigned Project, will be as set forth in writing and issued by the City ("Project Narrative"). Any modification to the Services will also be set forth in the Project Narrative. All proposals submitted shall be reviewed by the Contract Administrator, as that term is defined below, and a single consultant will be selected to perform the services for that particular Assigned Project. Acceptance of Consultant's proposal shall be made in the form of a Supplemental Agreement for the Assigned Project, a sample of which is attached hereto as Exhibit "B" and incorporated herein by reference, or by Consultant's acceptance of the terms and conditions of the City's Purchase Order.

2. **Term.** This Agreement shall begin on the Effective Date and shall expire five (5) years thereafter ("Expiration Date") or the required date for completion of an Assigned Project, provided a project was assigned prior to the Expiration Date. If the maximum cumulative payment obligation is not reached, the City may, at its option, extend the term for one (1) additional three (3) year terms, not to exceed eight (8) years based upon acceptable performance by the Company, acceptable fees and subject to the same terms and conditions of the Agreement. Pricing is to remain firm for the entire contract term, including any future extensions.

3. Compensation/Payment.

3.1 **Contract Price.** The total amount to be paid to Consultant for all Assigned Projects pursuant to this Agreement shall not exceed an aggregate of Two Hundred Fifty Thousand Dollars (\$250,000.00) over the term of this Agreement.

3.2 Consultant shall receive compensation for all Services rendered under this Agreement as set forth in Exhibit "A" and set forth in the Supplemental Agreement or Purchase Order issued by the City. There will be no reimbursement for out-of-pocket expenses including but not limited to travel and lodging, local travel/mileage, photocopying, first class U.S. postage, telephone, facsimile, and mobile/telephone communication charges. With prior written approval, City may choose to approve reimbursement for overnight courier charges, certified return/receipt mail charges, and specialty reproduction charges at cost plus ten percent (10%) for administrative, coordination and handling time.

3.3 Payments shall be made in accordance with the City's usual accounting procedures upon receipt and approval of an itemized invoice setting forth the services performed.

The invoices shall be delivered to the City at the address set forth in Section 4 hereof. For each Assigned Project, Consultant agrees that each assignment will be on a fixed fee basis, as mutually agreed to in writing by both City and Consultant prior to engagement of any assignment.

3.4 In the event Consultant fails, due to its own negligence, to submit any required report to City by the due date set forth in the Project Narrative, the fee to be received by Consultant may be reduced by ten percent (10%) each three (3) business day period that the report is late.

4. **Notices.** Any notices required to be given, hereunder shall be in writing and shall be personally served or given by mail. Any notice given by mail shall be deemed given when deposited in the United States Mail, certified and postage prepaid, addressed to the party to be served as follows:

The Director's determination is available on-line at www.dir.ca.gov/dlsr/DPreWageDetermination.htm and is referred to and made a part hereof; the wage rates therein ascertained, determined, and specified are referred to and made a part hereof as though fully set forth herein.

6. **Contract Administration.** A designee of the City will be appointed in writing by the Department Director to administer this Agreement on behalf of the City and shall be referred to herein as Contract Administrator.

7. **Standard of Performance.** While performing the Services, Consultant shall exercise the reasonable professional care and skill customarily exercised by reputable members of Consultant's profession practicing in the Metropolitan Southern California Area, and shall use reasonable diligence and best judgment while exercising its professional skill and expertise.

8. **Personnel.** Consultant shall designate a representative for each Assigned Project ("Project Representative"). Consultant's Project Representative shall be available to the City at all reasonable times and will be the primary individual performing the Services under the Assigned Project. Consultant recognizes that the qualifications and experience of the personnel to be used are vital to professional and timely completion of the Services. The key personnel listed in Exhibit

"C" attached hereto and incorporated herein by reference and assigned to perform portions of the Services shall remain assigned through completion of the Services. Any substitution of personnel or the Project Representative shall be subject to the City's written approval. In the event that the City and Consultant cannot agree as to the substitution of the Project Representative or other key personnel, the City shall be entitled to terminate this Agreement.

9. Assignment and Subcontracting. Neither party shall assign any right, interest, or obligation in or under this Agreement to any other entity without prior written consent of the other party. Consultant acknowledges that any assignment may, at the City's sole discretion, require Department Director and/or City Council approval. Consultant shall not subcontract any portion of the work required by this Agreement without prior written approval by the City's Contract Administrator. The Consultant acknowledges and agrees that the City is intended beneficiary of any work performed by any subcontractor for purposes of establishing a duty of care between any subcontractor and the City.

10. Independent Contractor. In the performance of this Agreement, Consultant, and Consultant's employees, subcontractors and agents, shall act in an independent capacity as independent contractors, and not as officers or employees of the City. Consultant acknowledges and agrees that the City has no obligation to pay or withhold state or federal taxes or to provide workers' compensation or unemployment insurance to Consultant, or to Consultant's employees, subcontractors and agents. Consultant, as an independent contractor, shall be responsible for any and all taxes that apply to Consultant as an employer.

Consultant agrees, at its cost and expense, to promptly defend the City, and the City's employees, officers, managers, agents and council members (collectively the "Parties to be Defended") from and against any and all claims, allegations, lawsuits, arbitration proceedings, administrative proceedings, regulatory proceedings, or other legal proceedings to the extent the same arise out of, pertain to, or relate to the negligence, recklessness or willful misconduct of Consultant, or anyone employed by or working under the Consultant or for services rendered to the Consultant in the performance of the Agreement, notwithstanding that the City may have benefited from its work or services and whether or not caused in part by the negligence of an Indemnified Party. Consultant agrees to provide this defense immediately upon written notice from the City, and with well qualified, adequately insured and experienced legal counsel acceptable to the City. Consultant will reimburse Client for reasonable defense costs for claims arising out of Consultant's professional negligence based on the percentage of Consultant's liability. This obligation to defend as set forth herein is binding on the successors, assigns and heirs of Consultant and shall survive the termination of Consultant's Services under this Agreement.

When the law establishes a professional standard of care for Consultant's services, to the fullest extent permitted by law, Consultant shall indemnify, protect and hold harmless the City and the City's employees, officers, managers, agents, and council members ("Indemnified Parties") from and against any and all claim for damage, charge, lawsuit, action, judicial, administrative, regulatory or arbitration proceeding, damage, cost, expense (including counsel and expert fees), judgment, civil fines and penalties, liabilities or losses of any kind or nature whatsoever to the extent the same arise out of, pertain to, or relate to the negligence, recklessness or willful misconduct of Consultant, or anyone employed by or working under the Consultant or for services rendered to the Consultant in the performance of the Contract, notwithstanding that the City may have benefited from its work or services and whether or not caused in part by the negligence of an Indemnified Party.

Consultant agrees, at its cost and expense, to promptly defend the City, and City's employees, officers, managers, agents and council members (collectively the "Parties to be Defended") from and against any and all claims, allegations, lawsuits, arbitration proceedings, administrative proceedings, regulatory proceedings, or other legal proceedings which arise out of, or relate to, or are in any way connected with: 1) the Services, work, activities, operations, or duties of the Consultant, or of anyone employed by or working under the Consultant; or 2) any breach of the Contract by the Consultant. This duty to defend shall apply whether or not such claims, allegations, lawsuits or proceedings have merit or are meritless, or which involve claims or allegations that any or all of the Parties to be Defended were actively, passively, or concurrently negligent, or which otherwise assert that the Parties to be Defended are responsible, in whole or in part, for any loss, damage or injury. Consultant agrees to provide this defense immediately upon written notice from the City, and with well qualified, adequately insured and experienced legal

counsel acceptable to the City. This obligation to defend as set forth herein is binding on the successors, assigns and heirs of Consultant and shall survive the termination of Consultant's Services under this Agreement.

11.5 Indemnity For Other Than Design Professional Liability. Except as to the sole negligence or willful misconduct of the City, Consultant agrees to indemnify, protect and hold harmless the Indemnified Parties from and against any claim for damage, charge, lawsuit, action, judicial, administrative, regulatory or arbitration proceeding, damage, cost, expense (including counsel and expert fees), judgment, civil fine and penalties, liabilities or losses of any kind or nature whatsoever whether actual, threatened or alleged, which arise out of, pertain to, or relate to, or are a consequence of, or are attributable to, or are in any manner connected with the performance of the Services, work, activities, operations or duties of the Consultant, or anyone employed by or working under the Consultant or for services rendered to Consultant in the performance of this Agreement, notwithstanding that the City may have benefited from its work or services. This indemnification provision shall apply to any acts, omissions, negligence, recklessness, or willful misconduct, whether active or passive, on the part of the Consultant or anyone employed or working under the Consultant.

Prior to the City's execution of this Agreement, Consultant shall provide satisfactory evidence of, and shall thereafter maintain during the term of this Agreement, such insurance policies and coverages in the types, limits, forms and ratings required herein. The rating and required insurance policies and coverages may be modified in writing by the City's Risk Manager or City Attorney, or a designee, unless such modification is prohibited by law.

12.1.1 Limitations. These minimum amounts of coverage shall not constitute any limitation or cap on Consultant's indemnification obligations under Section 11 hereof.

12.1.2 Ratings. Any insurance policy or coverage provided by Consultant or subcontractors as required by this Agreement shall be deemed inadequate and a material breach of this Agreement, unless such policy or coverage is issued by insurance companies authorized to transact insurance business in the State of California with a policy holder's rating of A or higher and a Financial Class of VII or higher.

SCOPE OF SERVICES

B. STATEMENT OF UNDERSTANDING AND APPROACH

PROJECT UNDERSTANDING

Bender Rosenthal Inc. (BRI) understands that the City of Riverside Community & Economic Development Department, Real Property Services Division (City) is selecting on-call panels in six (6) primary service categories, including appraisal services. BRI understands that the complexity, size, and timing of any given project appraisal project is variable and may support a variety of City departments.

APPRAISAL APPROACH

Once the City issues the task order, BRI Project Manager David Houghton, MAI, will work collaboratively with the City Project Manager to determine the assignment requirements. David will develop the scope, cost, and schedule for each assignment on a 'not-to-exceed' basis. BRI affirms that we have all the necessary resources to meet the time schedules set with the City; our firm is full of diverse and capable professionals who can resource-load and adapt to meet any desired schedule or deliverable.

BRI utilizes Valcre Appraisal Software to seamlessly track and manage all project related aspects of the appraisal reports, across multiple appraisers.

- **Consistency**
- **Accuracy**
- **Efficiency/Fast Delivery**
- **Highest Quality Appraisal Reports**

Each appraisal assignment is a project, so a fundamental understanding of project management is at the core of efficient appraisal report delivery. As a Project Manager, David has the technical and practical experience to work through solutions with the team and engage team members in those solutions. While some believe that an appraisal is a commodity, David's years of experience and ability to collaboratively work with clients allows him to understand the unique characteristics of each appraisal type and assignment to deliver value-added appraisal solutions. *BRI will deliver appraisals within four (4) to six (6) weeks of receipt of Notice to Proceed, depending on the complexity of the project.*

COMMUNICATION

Communication is a top priority for BRI. Our team has strategies to maintain consistent and open lines of communication with our clients throughout the appraisal assignment. BRI will discuss with the City project team to determine the type and frequency of reporting most appropriate for the assignment and to ensure the City has the most up-to-date status of the project. Based on our current assessment, communication will likely be minimal and limited to appraisal deliverables such as the Notice of Decision to Appraise (NODA) and property inspection.

QUALITY ASSURANCE / QUALITY CONTROL

At the core of any project is the need for a system of checks and controls. Before any document is released to the City for approval, it will have undergone a quality check by a senior professional. Our QA/QC plan will address two types of checks to be provided on all appraisal reports:

1. **Detail Check (DC)** – Checking for completeness, consistency, numerical and verbal accuracy; correct spelling, grammar, and syntax.

2. **Independent Technical Review (ITR)** – A review checking that approach, methodology, reasoning, and conclusions are appropriate and conform to the Uniform Standards of Professional Practice, applicable laws, and specific assignment conditions for the appraisal. An appraisal is an opinion of value rendered after following a defined process. When performing appraisal activities, all licensed appraisers in the State of California must follow, at a minimum, the Uniform Standards of Professional Appraisal Practice (USPAP).

RESPONSE TIME, AVAILABILITY & RELIABILITY

RESPONSIVENESS – BRI will treat every appraisal assignment and project inquiry with timely responses and prompt follow-ups. To promote ongoing communication regarding key milestones or project obstacles, BRI will ensure that a single path of information transmission is established between the team members.

FLEXIBILITY – The ability to seamlessly realign resources to focus on new priorities is one of BRI's greatest assets. BRI appraisal staff can be efficiently added, replaced, or reassigned, at the City's discretion throughout the life cycle of any given project. BRI also has the staffing capacity to dedicate appraisal personnel for the duration of a long-term project.

COST CONTROL – BRI will closely monitor efficiencies created by the number and location of appraisals required. These efficiencies can translate into reduced fees which can provide cost savings to the City. BRI aims to be as budget conscious and efficient as possible.

TIMELY DELIVERY – BRI is committed to completing all appraisal assignments in a timely and technically correct manner. Schedule slippage for related tasks outside BRI's control will be brought to the City's Project Manager immediately to determine the appropriate course of action.

The BRI appraisal team has weekly internal meetings to ensure that questions are addressed, project updates are communicated, and all deliverables are on schedule.

17. **Confidentiality.** All ideas, memoranda, specifications, plans, procedures, drawings, descriptions, computer program data, input record data, written information, and other materials either created by or provided to Consultant in connection with the performance of this Agreement shall be held confidential by Consultant, except as otherwise directed by the City's Contract Administrator. Nothing furnished to Consultant which is otherwise known to the Consultant or is generally known, or has become known, to the related industry shall be deemed confidential. Consultant shall not use the City's name or insignia, photographs of the Assigned Project, or any publicity pertaining to the Services or the Assigned Project in any magazine, trade paper, newspaper, television or radio production, website, or other similar medium without the prior written consent of the City. This provision shall survive the expiration or terminating of this Agreement.

18. **Ownership of Documents.** All reports, maps, drawings and other contract deliverables prepared under this Agreement by Consultant shall be and remain the property of the City upon the City's compensation to Consultant for its services as herein provided. This provision shall survive the expiration or terminating of this Agreement.

19. **Copyrights.** Consultant agrees that any work prepared for the City, which is eligible for copyright protection in the United States or elsewhere shall be a work made for hire. If any such work is deemed for any reason not to be a work made for hire, Consultant assigns all right, title and interest in the copyright in such work, and all extensions and renewals thereof, to the City, and agrees to provide all assistance reasonably requested by the City in the establishment, preservation and enforcement of its copyright in such work, such assistance to be provided at the City's expense, but without any additional compensation to Consultant. Consultant agrees to waive all moral rights relating to the work developed or produced, including without limitation any and all rights of identification of authorship and any and all rights of approval, restriction or limitation on use or subsequent modifications. This provision shall survive the expiration or terminating of this Agreement.

20. **Conflict of Interest.** Consultant, for itself and on behalf of the individuals listed in Exhibit "C," represents and warrants that by the execution of this Agreement, they have no interest, present or contemplated, in the Assigned Project affected by the above-described Services. Consultant further warrants that neither Consultant, nor the individuals listed in Exhibit "C" have any real property, business interests or income interests that will be affected by this project or, alternatively, that Consultant will file with the City an affidavit disclosing any such interest.

21. **Solicitation.** Consultant warrants that Consultant has not employed or retained any person or agency to solicit or secure this Agreement, nor has it entered into any agreement or understanding for a commission, percentage, brokerage, or contingent fee to be paid to secure this Agreement. For breach of this warranty, the City shall have the right to terminate this Agreement without liability and pay Consultant only for the value of work Consultant has actually performed, or, in its sole discretion, to deduct from the Agreement price or otherwise recover from Consultant the full amount of such commission, percentage, brokerage or commission fee. The remedies specified in this section shall be in addition to and not in lieu of those remedies otherwise specified in this Agreement.

22. **General Compliance With Laws.** Consultant shall keep fully informed of federal, state and local laws and ordinances and regulations which in any manner affect those employed by Consultant, or in any way affect the performance of services by Consultant pursuant to this Agreement. Consultant represents and warrants that Consultant has obtained all necessary licenses to perform the Scope of Services and that such licenses are in good standing. Consultant further represents and warrants that the services provided herein shall conform to all ordinances, policies and practices of the City.

23. **Waiver.** No action or failure to act by the City shall constitute a waiver of any right or duty afforded the City under this Agreement, nor shall any such action or failure to act constitute approval of or acquiescence in any breach thereunder, except as may be specifically, provided in this Agreement or as may be otherwise agreed in writing.

24. **Amendments.** This Agreement may be modified or amended only by a written agreement and/or change order executed by the Consultant and the City.

25. **Termination.** The City, by notifying Consultant in writing, shall have the right to terminate any or all of Consultant's services and work covered by this Agreement at any time. In the event of such termination, Consultant may submit Consultant's final written statement of the amount of Consultant's services as of the date of such termination based upon the ratio that the work completed bears to the total work required to make the report complete, subject to the City's rights under Sections 15 and 26 hereof. Notice of such withholding and offset, shall promptly be given to Consultant by the City in writing. In the event of a dispute as to the amount owed or whether such amount is owed to the City, the City will hold such disputed amount until either the appropriate appeal process has been completed or until the dispute has been resolved.

27. **Successors and Assigns.** This Agreement shall be binding upon the City and its successors and assigns, and upon Consultant and its permitted successors and assigns, and shall not be assigned by Consultant, either in whole or in part, except as otherwise provided in paragraph 9 of this Agreement.

31. **Authority.** The individuals executing this Agreement and the instruments referenced herein on behalf of Consultant each represent and warrant that they have the legal power, right and actual authority to bind Consultant to the terms and conditions hereof and thereof.

EXHIBIT "A"
SCOPE OF SERVICES

B. STATEMENT OF UNDERSTANDING AND APPROACH

Firm Understanding of City's Appraisal Prerequisites

As noted in Company Personnel at Section D of our response, and in the qualifications of the appraisers at Appendix A, the appraisers available to provide professional services to the City have ten years or more of experience in providing appraisal services for public agencies, and are all General Certified Appraisers in the State of California. Six (6) of the eleven (11) appraisers on our team also hold the Member of the Appraisal Institute (MAI) designation of the Appraisal Institute (AI), having satisfied the rigorous requirements in the areas of education and experience to receive this senior-level designation. Additionally, Beth B. Finestone, MAI, AI-GRS, FRICS, CRE is an AI-GRS (General Review Specialist)-designated MAI appraiser.

Technical Approach

All of our appraisal work is completed pursuant to the *Uniform Standards of Professional Appraisal Practice* (USPAP), and all appraisals prepared for potential acquisition purposes, subject to an eminent domain action, are also prepared in compliance with the California Code of Civil Procedure Section 1263.320. The methodology utilized in eminent domain appraisals is consistent with the methodology found in the California Department of Transportation (Caltrans) Right of Way Manual, Chapter 7. When appropriate, we prepare full and partial acquisition appraisals subject to the *Uniform Appraisal Standards for Federal Land Acquisitions* (UASFLA). We are also experienced in providing appraisals based on Federal Aviation Administration (FAA) guidelines as well as the guidelines of the California Department of General Services (DGS).

Appraisal assignments would be completed with the use of the most appropriate valuation methods for the specific property type. These include the Sales Comparison Approach, the Income Approach, and the Cost Approach. For single-family residential properties, the Sales Comparison Approach is usually the most relevant approach and is typically the only one that has application to the property. For income-producing properties, including multifamily residential properties, the Income Approach is commonly utilized along with the Sales Comparison Approach. For buildings that are newer (non-residential), or which contain fairly specialized improvements, the Cost Approach is frequently relevant. Land is typically valued using the Sales Comparison Approach. Corridors are typically valued using ATF methodology.

In the process of completing appraisals of partial acquisitions, subject to California Eminent Domain Law, we give full consideration to possible severance damages and benefits that may accrue to the remainder parcel as a result of the acquisition and project. We are very experienced in preparing damage studies that are well researched and have been accepted by the courts when we are called to testify. When we conclude that there are damages, every attempt is made to quantify benefits that accrue to the remainder, as benefits can be utilized to offset severance damages. In the State Rule, benefits may not offset the value of the actual acquisitions.

When reports are prepared to meet the guidelines of UASFLA a complete before and after analysis is required. The Federal Rule differs from the State Rule in that benefits can offset the value of the parts taken. However, it should be noted that when applying the Federal Rule, a direct calculation of the value of the parts acquired, damages and benefits is not undertaken. Rather the property is appraised in its before condition and this is compared the what the value of the property would have been on the date of value if the project were implemented, and the acquisitions already made. The difference between the before and after valuations results in the value of the proposed acquisitions.

In certain assignments, we would expect to encounter appraisals dealing with vacant land and/or various types of easements affecting vacant land. For analysis of this type of property, an investigation into the potential of securing development entitlements is a critical issue. Particular attention would be given to interviews with City representatives who are in the proper positions to comment on the entitlement process for the subject property. This level of investigation would also frequently include a review of relevant sections of the general plan, a review of specific plans that may affect the property, review of zoning, slope density analysis, California

Coastal Commission issues, fire department approvals, and investigations with other individuals at relevant governmental jurisdictions.

Non-Eminent Domain Related Appraisals

CBRE's Valuation and Services Advisory Group (VAS) considers all applicable approaches to value in each appraisal and uses accepted methodologies that are appropriate for the type of property being appraised. Scope of work and appraisal formats are discussed with the client in advance in order to meet with the client's objectives.

Eminent Domain/Condemnation Related Appraisals

Approach to Appraisals

Our efforts will at all times be centered on our profound respect for property rights. This includes both the property owner's right to full use and enjoyment of their property and the client's right to acquire all necessary property rights for public or private use. This perspective will guide our efforts toward just compensation and to allow the client to acquire rights-of-way and to minimize the amount of litigation.

If a large multi-property assignment is awarded, we would like to set a meeting with the project manager at the City to discuss the project and to glean any information available as to property owner concerns and project impacts. We have found that sitting with the client at the onset of a larger multi-property assignment and going over the individual properties and reviewing maps together can result in tremendous time savings down the road. In the case of an individual property award, this can often be handled over the phone.

Our process, once authorized, typically will follow this general framework. Please note that once engaged, we will consult with the client to customize an appraisal process to meet the needs of the contract.

Property Owner Notification (as needed): At commencement of engagement, CBRE will identify the properties to be appraised with information such as address, tax parcel identification number, owner of record, type of property, site size, and building size. Upon collection of the parcel specific information, CBRE will prepare letters to the owners of record for each parcel. These letters will outline the scope of the project and the purpose and use of the proposed acquisition in fee and/or easement. Letters will be delivered via certified mail to the owners of record within approximately one business week from commencement of engagement. CBRE will be responsible for the cost of delivery of the certified letters.

Front-End File Development: In conjunction with development of the market study if requested, our administrative staff, in conjunction with one of our right of way valuation experts, will develop individual files for each parcel in the project. Each file will contain all correspondence with property owner of record, assessor records, floodplain maps, zoning maps, surveys of the whole property and proposed acquisition, legal descriptions of the whole property and proposed acquisition, title commitments, right of way maps, easement documents, aerials, etc. Development of files is anticipated to be completed within approximately two weeks after commencement of engagement.

Inspection and Property Owner Interaction: Within one to two weeks after our administrative staff have mailed certified letters to the owners of record, we would anticipate return responses from the property owners. During this correspondence period, CBRE would attempt to set up inspections of the identified parcels. As needed, CBRE staff will send out an additional letter, via certified mail, which outlines the information which CBRE will be requesting in order to complete the appraisal assignment.

An appraiser/right of way expert will attend each property inspection and insist on providing each property owner the opportunity to articulate the project's effect on their property. This is coordinated with the City, if a City representative wishes to be present. The Vice President and/or Senior Appraiser remains directly involved in all aspects of the inspection, analysis, and appraisal completion. Limited amounts of research assistance may be provided by less senior appraisal staff, under the direct guidance and supervision of the project's Vice

President and/or Senior Appraiser. This serves to provide an error-free report, with a well-developed opinion of the fair market value of the acquisitions and decrease the chances of litigation. The inspections of the parcels would include an inspection of the interior and exterior of all improvements located on the parcel as well as an inspection of the proposed acquisition. However, please note that our level of inspection will be contingent on the cooperation of the landowner of the Parcel(s) affected by the Project.

Valuation: Applying the market data and feedback from the property inspection and meeting with the owners, the CBRE team will analyze the property and determine the fair market value of the acquisitions that is due to the property owner.

The appraisal reports will be written according to the applicable requirements and guidelines with the market value definition being based on current Federal and State standards. The development of the appraisal will consider all relevant facts and aspects of the property being appraised and the proposed acquisitions in fee and/or easement.

If there are damages, CBRE will estimate the cost to cure and effective age of the improvements within the proposed acquisition and any effect(s) to the remainder after the acquisition. Our analysis may utilize sources such as the Marshall & Swift Valuation Guide and/or construction cost estimates developed by outside consulting firms. Further, depending on the complexity of the appraisal assignment, CBRE, Inc. may consult with a certified land planner to determine appropriate land use plans and designs in the cost to cure and remainder after scenario.

Report Delivery: Our key personnel designated for work with the City specialize in various property types and are experienced in right of way projects. Ultimately, we will staff the project to meet the scope of the project within the required delivery time.

Right-Of-Way Expert Review

At least one Right of Way appraiser (Expert) at the level of First Vice President or higher will be assigned to each parcel. This expert will direct appraisal assignments within the project. Professionals and Experts discuss the assignments up front and periodically throughout to ensure all client expectations are being met. Right of Way Experts are selected based on their experience and credentials and are knowledgeable in current approved methodologies and applicable case law.

Key areas of review are:

- Engagement letter and required scope of work.
- Unique client requirements were followed.
- Applicable ownership history is presented.
- All Extraordinary and/or Hypothetical Assumptions are clearly stated.
- A detailed review of the entire report encompassing all sections, methodologies including damage/enhancement calculations (if any), etc.
- Only client approved appraisers are assigned, inspect subject properties and complete assignments (sign the certification and report). In most cases, it is acceptable for other licensed appraisal staff to significantly contribute, if this is approved by the client and adheres to USPAP.
- Consistency is maintained within the project regarding methodology, data used, value component conclusions and value conclusions. This will be accomplished through project review and audit.
- Proper right-of-way valuation methodology is utilized. The Expert will work with assigned appraisers to resolve questions regarding right-of-way specific valuation issues, as well as current case law application.
- Compliance with State guidelines.
- Proper report format utilized in the preparation of reports.

Market Rent Appraisals

Market Rent Approach

We are uniquely qualified to conduct Market Rental Surveys on behalf of the City. Being part of CBRE allows us access to a wealth of data. This includes not only data that is available from public sources such as CoStar, MLS, professional organizations and Internet searches, but includes access to our proprietary data base system. Our proprietary data system allows us not only to find comparable rental (lease) data, but also give us access to the unique deal points of the transactions that our brokerage firm was involved with.

Improved Properties

Our general approach to conducting a rental survey is to view the subject property and understand the tier of market in which it competes. We then review our data sources and reach out to brokers active in the segment of the market we are surveying and locate the buildings which we feel are the primary competition for the subject. Once making this determination we strive to locate recent leasing activity in these buildings. If no data is available in the primary competitive buildings, we look to the secondary competition.

Once the data is located, we can present it to the City as a survey, or we can analyze it with respect to a particular asset. Alternatively, we can compare a number of transactions to determine which is the most advantageous by considering the present value of the various leases.

To determine the market rent for improved properties we generally rely on a direct comparison of comparable leased properties. However, for special purpose properties, we may need to rely on a rate of return applied to a valuation of the property as improved (most often concluded by the cost approach).

- **Non-Special Purpose Properties:** As previously indicated we rely on a direct comparison of comparable lease properties. Comparable data is obtained by interviewing active market participants such as brokers, investors and property owners. We also review public records, when appropriate and utilize pay data services such as CoStar. We also have an internal data base that is proprietary to CBRE. We are able to access rental comparable data from across the county utilizing this system. While we generally focus on comparable transactions that are in the same market area as the subject, there are instances where a national search may be appropriate.

Factors of comparison that are considered include, but are not limited to the following:

- Lease date
 - Lease term
 - Escalation factors
 - Free rent
 - Tenant improvements and other concessions
 - Location and access
 - Size
 - Quality and condition of the improvements
 - Property type and use
 - Coverage ratio
- **Special Purpose Properties:** As previously indicated, for special purpose properties, where there is not an active market for leases, we often apply a market derived rate of return to the improved property value. For special purpose properties, the cost approach is the typical valuation methodology employed. This involves determining a value for the underlying land and adding to it a depreciated replacement cost for the improvements. To determine the appropriate rate of return to apply to the improved value of the improvements, we follow a procedure similar to that associated with ground leases, described previously.

Ground Leases, Easement Rents and License Rates of Land

The two primary methods for analyzing the rental value of land as if vacant are described below.

1. Analyze recent leases of sites that are similar to the subject and conduct a direct comparison process using these comparable lease transactions.
2. Reach an opinion regarding the market value of the subject land as if vacant and conduct an analysis that leads to a conclusion as to the appropriate annual rate of return to apply to the land value.

We would conduct a search in an effort to find comparable land lease transactions that would allow us to perform the first study. Depending on the type of land involved and its location, comparable data may or may not be available. To search for comparable ground leases, we rely on interviews with active market participants, interviews with representatives of public agencies known to be active in leasing land, a search of public records, pay data services such as CoStar, as well as our internal data base.

A direct comparison of the comparable leases is the most ideal way to conclude to a market rent for land. Comparable ground leases are analyzed based on highest and best use of the underlying land, location, date of lease, term of lease, type and frequency of rent escalations and the frequency the ground lease adjusts to market. Consideration is also given to the methodology utilized to initially set the market rent and ground lease terms associated with the comparables. Any free rent or other incentives provided are also considered.

It is important to note that limited current and comparable transactional data is often available. As such, we often focus on the latter method of analysis (item 2 above), which involves reaching an opinion regarding the market value of the subject land as if vacant and conducting an analysis that leads to a conclusion as to the appropriate annual rate of return to apply to the land value. To determine the underlying value of the subject land, we generally rely on the sales comparison approach to value, whereby we compare sales of comparable land transactions to the subject. Generally, the subject land is valued based on its highest and best use as vacant, unless an existing ground lease requires a different methodology.

Once a conclusion of land value is reached for the subject land, it represents the appropriate starting point in the appraisal of the market rental value. The next steps in this process are:

1. Identify and analyze data that is relevant for the purpose of setting the appropriate annual rate of return.
2. Examine the similarities and differences between the rate of return comparables (and other data) and the terms of the subject lease. Make adjustments as warranted to account for the material differences.
3. Apply the results of the analysis and express an opinion regarding the market rental value, taking care to explain how this rate is applied within the context of the ground lease obligations for the option term. Our conclusions can either be presented as a point estimate of market rent, a range or both.
4. If we are asked to value an easement rent or license, a factor is typically applied to the concluded market rent for the fee simple bundle of rights.

Appraisal Reviews

General Approach and Methodologies Utilized for Appraisal Reviews

Our VAS Southern California Right of Way team has significant experience in the review of outside appraisals related to right-of-way appraisals. We are familiar with the appraisal review requirements for federal- and state-funded projects, pursuant to Title 25 California Code of Regulations §6000 et seq. §7260 et seq. of the California Government Code 42 U.S.C. §4601 et seq. (Uniform Relocation Assistance and Real Property Acquisition Policies Act of 1970) and 49 CFR Part 24 to the extent they apply to the appraisal assignment. The following are the general steps that we take in preparing these reviews:

- Discuss the project with the client so that we can develop an appropriate scope of work and understand the client's needs. In addition, having a strong project overview will enable us to better understand the Project and be better prepared to review the individual reports.
 - a. Generally, for right of way projects we are asked to review the reports and discuss them with the appraiser in order to obtain a credible appraisal for delivery to the client.
 - b. In some cases (rarely) we find that we are unable to obtain a credible work product from the appraiser that we can recommend for approval. If this is the case, our scope of work may be expanded to include a reappraisal of the property or to recommend that another appraisal be obtained.
 - c. Most right of way work in California must comply with the California Code of Civil Procedure, and the Caltrans Right of Way Manual in addition to USPAP, but in some instances the work needs to be compliant with UASFLA. This is part of our scope of work determination so that we know what standards the report should be reviewed to.
- If possible, we like to be engaged at the outset of an assignment related to a right of way project that that we can act as a resource to the appraiser performing the appraisal if they have any questions. We understand that this is not always possible.
- Make a determination of how many appraisals we will be reviewing related to a specific project and develop a spreadsheet summarizing these properties and their specifics, as well as the value conclusions and other pertinent details. This will enable us to help maintain a level of consistency across a project to the extent possible.
- As appraisals come in for review, they are assigned to a senior review appraiser and to a researcher.
- The researcher will be responsible for confirming all factual data in the report including land areas, zoning, confirmation of comparables through public records, ownership, etc. They will also check all mathematical calculations, including adjustments to comparable data. Any inconsistencies or errors are noted on the document and the report is given to the senior review appraiser.
- The senior review appraiser will then read the appraisal report in its entirety, noting any sections that require further analysis or comment.
 - a. The review appraiser will review the research and analyses in the report with respect to its completeness, accuracy, adequacy, relevance and reasonableness.
 - b. The market data will be checked for reasonableness.
 - c. The appraisal methodology will be checked for applicability to the property type.
 - d. Adjustments to the comparable data will be reviewed and a determination will be made as to their market derived support or the reasonableness of the logical explanations for them.
- The review appraiser will view the subject property and the comparables if a field review is requested. This is not done for desk reviews.
- The review appraiser will develop an opinion as to whether the analyses are appropriate within the context of the requirements applicable to that work. Special consideration is given to the valuation of the parts acquired and any possible severance damages resulting from the project.
- The reviewer will develop an opinion as to whether the opinions and conclusions are credible within the context of the requirement applicable to that work.
- The reviewer will develop reasons for any disagreement and discuss these with the appraiser.
- The goal is to work with the appraiser so that a credible appraisal is completed.
- If the scope of work requires that the review appraiser develop his or her own opinion of value this is completed. Typically, this is not part of a review of a right of way appraisal at the outset.
- The review appraiser prepares a review report for delivery to the client making our recommendation of acceptance and confirmation of applicable valuation standards. Any applicable Caltrans forms or project specific forms are included.

Our appraisal review services can be tailored to meet the needs of the City by adequately understanding your scope of work requirements. We can track all value conclusions on an appropriate unit basis for land and

improvements and summarize easement values as a percent of land value for differing types of easements on a given project. This will enable the City to be confident that property owners are being treated fairly and consistently within a project area.

Our deliverables can be tailored to meet the needs of the City, and any pertinent documentation agreed to up front. We can prepare a sample review template for major project and invite your input at the onset so that you are confident that all requirements are met and that the review is user friendly and meets your individual needs. All reviews can be prepared in a uniform format that you know where to find what you need in every report.

The only potential hurdles that we see with review work, related to the delivery of the project relate to timing and appraisal quality. If the appraisal(s) is(are) delivered late to the reviewer, it can cause delays in acquiring the right of way and hence delay the project. Due to the size of our staff, we can assign a researcher to all appraisals for review within a day of their receipt. The researcher can fact check the reports before they are given to the reviewer so that the reviewer can focus on the analysis, methodology and appropriates of the analysis and data. This enables us to review a significant number of reports in a short time. We can also group the appraisals so that the reviewer can view a number of the subject properties and comparables in a given day, rather than making multiple trips. This assumes a field review is required. In some instances, if an appraiser is running late, we can get them to send us their market data in advance of the report so that we can start the fact checking process and shave some time from the review process.

It is our goal to always work with the appraiser so that a credible and quality product is delivered to the client. In those rare instances where we are unable to recommend an appraisal for acceptance, we have the ability to reappraise it ourselves, if you so desire. This can help to save time, and some cost as compared to retaining the services of a new appraiser.

Workplan for Appraisal Reviews

Ms. Finestone will coordinate all work awarded to CBRE by the City and will serve as a point of contact to the City. Ms. Finestone will have an active role in meeting with the appraisers working on City appraisal review assignments and ensuring quality control. Ms. Finestone will also serve as a point of contact for the VAS Southern California Right of Way team to other appraisers and consultants awarded assignments on the same projects to ensure that all data is shared so that the appraisers have all of the available data available to them for their appraisal review analyses. Ms. Finestone, Messrs. Ellis, Bogorad, or Donahue will review, and cosign reports completed by the VAS Southern California Right of Way team and will be available for expert testimony and litigation support. Ms. Finestone will be available to participate in the appraisal of any complex assignments. If City subcontractors are required for the appraisal reviews of outside appraisal reports involving business valuations/good will appraisals and or furniture, fixtures and equipment, Ms. Finestone will coordinate their services to ensure that all appropriate aspects of the appraisal review assignment are considered, while ensuring that there is not a duplication (double counting) of valuation items by the various reviewers involved in an assignment.

Prior to bidding on an assignment, Beth Finestone would discuss the individual project with the appropriate representative of the City to make sure we have an understanding of the needs of the City and the purpose of the appraisal review. This will allow us to advise the City as to special considerations and or alternative valuation analyses that they may want to consider in our review of the outside appraisal(s).

Other Information Relating to Technical Approach

CBRE valuation team members have access to all of the latest technology and software. Our analysts/appraisers have and/or utilize CBRE proprietary report software, Argus Valuation DCF and/or AE, Argus Asset Management, Flood Insights, NDC Data, Real Facts, Costar, ESRI, Real Capital Analytics, Hoovers, Hanley Wood Market Intelligence, LoopNet, Real Quest, Real Data Apartment Insights, all major Multiple Listing Services and Marshall Valuation Service. Our appraisers also have access to robust in-house research and GIS departments

which provides our team members with the most current real estate information available. CBRE also uses the most current file sharing software. This allows us to receive and transmit large electronic files such as title work, CAD drawings, plats, images, as well as provide seamless and efficient electronic delivery of our appraisal reports to clients.

As part of CBRE, Inc., our firm has access to relevant transactions on a nationwide basis. While the most relevant data for any local assignment will be obtained from the local market, the ability to obtain accurate, verified data in other markets is a useful source of additional information to supplement local data.

Community Involvement

As real property appraisers, we work to maintain a solid and consistent flow of communication with the appropriate agency representatives who are involved in the project, and with the lead right of way agents who are working on the project. Our direct communication with property owners typically begins with a letter to the owner notifying them of our role as appraisers in the project and inviting them to meet us onsite for an inspection and an opportunity for them to discuss with us how the project might affect their property. We are always respectful of the owners, but we remain aware that our client is the City (agency). Therefore, we would not communicate our findings or opinions to the owners, or to anyone else without the City's specific permission.

In some projects we have been asked to participate in community meetings to explain the valuation process to a group of owners and other interested parties. If requested, we would be available to provide this service for the City.

Tailoring our Services to Meet the Needs of the City

Prior to bidding on an assignment, Beth Finestone (or other team leader) would discuss the individual project with the appropriate representative of the City to make sure we understand the needs of the City and the purpose of the appraisal. This will allow us to advise the City as to special considerations and or alternative valuation analyses that they may want to consider. For right-of-way (eminent domain) assignments the general impact the project may have on the individual property(ies) to be appraised is discussed with the project manager. If possible, this would include a preliminary review of project maps (right-of-way maps) and aerial photographs. This will enable Ms. Finestone and/or the team leaders to provide an appropriate fee quote to the City that can result in the greatest economies of scale. For example, if it can be ascertained that an individual property or properties can be valued as land only, as the required acquisitions are minor and no severance damages are anticipated, then a lower fee can be quoted versus automatically assuming a full before and after analysis, as improved, must be undertaken.

If a larger multi-property assignment is awarded, we would like to set a meeting with the project manager at the City to discuss the project and to glean any information available as to property owner concerns and project impacts. We have found that sitting with the client at the onset of a larger multi-property assignment and going over the individual properties and reviewing maps together can result in tremendous time savings down the road. In the case of an individual property award, this can often be handled over the phone.

Project Schedule for Appraisals

Our work will progress through the completion of the following steps and others that may be deemed relevant as we complete the assignments. Please note that this time frame can be compressed in order to meet the City's needs.

Week 1

1. Beth Finestone will notify the administrative support staff of all jobs awarded and assign them to key personnel.

2. Within 24 hours, each individual property will be assigned an assignment number and are input into TOPS2, our proprietary data management system utilized in part to coordinate large property assignments. It will also be added to our Excel Master Tracking Spreadsheet that was previously discussed.
3. Meet with client to review mapping, ownership records, aerial photos, and other project-specific documents.
4. Organize a series of work notebooks (one for each property being appraised) that will allow us to maintain a high level of organization throughout the project.
5. Prepare and send owner notification letters.

Weeks 2-3

6. Begin research for comparable sales and for relevant land use issues in appropriate jurisdictions.
7. Review subject title reports (if available).
8. Review the easement deeds for the subject properties.
9. Conduct onsite inspections of the subject properties and meet the property owners who have responded positively to our offers to do so.
10. Complete field inspection of comparable sale transactions.
11. Conduct confirmation interviews for the comparable sales.
12. Meet with representatives of relevant jurisdictions to review land planning maps and documents and to conduct appropriate interviews concerning zoning and general plans.
13. Prepare master report detailing appraisals for each geographic region.

Week 4

14. Senior appraisers meet with Beth Finestone, John Ellis, Adam Bogorad, or Rick Donahue to conclude preliminary values for a geographic region.
15. Complex valuation issues will be personally addressed by Beth Finestone, John Ellis, Adam Bogorad, or Rick Donahue.
16. Senior appraisers prepare valuation analysis within a framework that allows us to review values on a parcel-by-parcel basis, to assure the development of value opinions that are both well-supported and consistent across all parcels of the project.
17. For partial acquisitions, evaluate the impact of the acquisition and the project on the remainder, and complete the analysis of severance damages.

Weeks 5-6

18. Beth Finestone, John Ellis, Adam Bogorad, or Rick Donahue review all final valuations.
19. Senior appraisers finalize the appraisal reports, statements of valuation, and parcel diaries.
20. Organize the subject photos and comparable sale data sheets.
21. Upload all final documents to the designated, secure website or deliver electronic and hardcopies of reports as requested.

Post Delivery

22. We would anticipate receiving review comments (if any) from the City within a reasonable time frame upon delivery of the Appraisal Report. Upon receipt of any suggested revisions, we would deliver a revised Appraisal Report within three business days, or sooner if needed.

Project Schedule for Appraisal Reviews

A **sample work plan** for a typical multi-property right-of-way appraisal review assignment is summarized as follows. Upon receipt of notice to proceed, our work will progress through the completion of the following steps and others that may be deemed relevant as we complete the assignments. Please note that the time schedule below assumes multiple property appraisal reviews are awarded at a single time. This timeframe can be compressed for smaller assignments or to meet client needs.

Week 1

1. Assign the report to be reviewed to a researcher and senior appraiser.
2. Researcher will fact check all data in the report.
3. Senior appraiser will view subject and comparables, if a field review is requested.

Weeks 2-3

4. The senior review appraiser will thoroughly read the appraisal report for each subject property under review in its entirety, noting significant sections with an evaluative comment.
5. The review appraiser will make a determination of the appraisal's full compliance with USPAP and other applicable state and federal laws and regulations.
6. The review appraiser will evaluate the appraiser's support and reasonableness of the conclusion of highest and best use of the subject property(s) being appraised.
7. The review appraiser will evaluate the appraiser's support and reasonableness of the applications of the acceptable valuation approaches.
8. The review appraiser will evaluate the appraiser's support and reasonableness of the valuation conclusion(s).
9. The review appraiser will evaluate the adequacy completeness of the confirmation of the market data used for the purposes of estimating market value of the subject property(s).
10. Appraisal methodology will be checked for applicability to the property type.
11. Mathematical calculations will be checked for accuracy. The review appraiser may attempt to contact the original appraiser if there are questions to the inputs utilized in a discounted cash flow analysis.
12. If adjustments are made to market data, determination will be made as to their market-derived support or the reasonableness of the logical explanations for them.
13. The review appraiser will further make determinations of whether the real property appraiser's concluded value(s) is sufficiently credible.
14. Any questions or deficiencies will be addressed directly with the appraiser.
15. If a 2nd draft is submitted to correct deficiencies, it will be reviewed.
16. The appraisal review will be submitted to the City, along with the PDF of each appraisal report reviewed, after completion of the analysis. Our appraisal review will not include a re-appraisal of the property(s) without a change in the scope of services provided.
17. If we find that we are not able to recommend the appraisal for acceptance, we will notify you as soon as this determination is made so that you can decide how to proceed. This rarely happens but is a possibility.
18. We will be readily accessible to address any questions or concerns that arise from the City's review of our delivered work product. Attention to post-delivery inquiries will be a high priority item to be addressed immediately upon presentation.

Commitments of Key Personnel

Significant multiparcel assignments require a strong foundation which consists of a well-developed scope of work, work plan, and involvement of a sufficient number of qualified professionals to execute the assignment. Senior members of our firm remain available for client interaction and overall project planning as part of our regular job duties. Thus, we are able to proceed with the foundational aspects of major projects within 24 hours of being notified of a new project. The planning process usually takes a few days, which coincides with the completion of pre-existing commitments by other team members for the project. While staff appraisers usually have work in progress at any given time, they can be integrated into a new City project as their work on other assignments is completed. Based on our flow of work over the last two years, we expect to have full staffing available on all major projects within two weeks of award of contract. For assignments involving fewer than ten parcels, we would expect to have full staffing availability within one week of award of contract. In all assignments, we could send out owner notification letters and initiate our research for comparables within the first week of the assignment.

1.1 The City hereby retains Consultant to perform, and Consultant agrees to render, professional services for various City projects ("Assigned Project") as those services are more particularly described in Exhibit "A," "Scope of Services" ("Services"), attached hereto and incorporated herein by reference.

1.2 During the term of this Agreement, as the need arises, Consultant shall have the opportunity to submit proposals for Assigned Projects. The scope of work, including the completion date for the Assigned Project, will be as set forth in writing and issued by the City ("Project Narrative"). Any modification to the Services will also be set forth in the Project Narrative. All proposals submitted shall be reviewed by the Contract Administrator, as that term is defined below, and a single consultant will be selected to perform the services for that particular Assigned Project. Acceptance of Consultant's proposal shall be made in the form of a Supplemental Agreement for the Assigned Project, a sample of which is attached hereto as Exhibit "B" and incorporated herein by reference, or by Consultant's acceptance of the terms and conditions of the City's Purchase Order.

2. **Term.** This Agreement shall begin on the Effective Date and shall expire five (5) years thereafter ("Expiration Date") or the required date for completion of an Assigned Project, provided a project was assigned prior to the Expiration Date. If the maximum cumulative payment obligation is not reached, the City may, at its option, extend the term for one (1) additional three (3) year terms, not to exceed eight (8) years based upon acceptable performance by the Company, acceptable fees and subject to the same terms and conditions of the Agreement. Pricing is to remain firm for the entire contract term, including any future extensions.

3. Compensation/Payment.

3.1 **Contract Price.** The total amount to be paid to Consultant for all Assigned Projects pursuant to this Agreement shall not exceed an aggregate of Two Hundred Fifty Thousand Dollars (\$250,000.00) over the term of this Agreement.

3.2 Consultant shall receive compensation for all Services rendered under this Agreement as set forth in Exhibit "A" and set forth in the Supplemental Agreement or Purchase Order issued by the City. There will be no reimbursement for out-of-pocket expenses including but not limited to travel and lodging, local travel/mileage, photocopying, first class U.S. postage, telephone, facsimile, and mobile/telephone communication charges. With prior written approval, City may choose to approve reimbursement for overnight courier charges, certified return/receipt mail charges, and specialty reproduction charges at cost plus ten percent (10%) for administrative, coordination and handling time.

3.3 Payments shall be made in accordance with the City's usual accounting procedures upon receipt and approval of an itemized invoice setting forth the services performed.

The invoices shall be delivered to the City at the address set forth in Section 4 hereof. For each Assigned Project, Consultant agrees that each assignment will be on a fixed fee basis, as mutually agreed to in writing by both City and Consultant prior to engagement of any assignment.

3.4 In the event Consultant fails, due to its own negligence, to submit any required report to City by the due date set forth in the Project Narrative, the fee to be received by Consultant may be reduced by ten percent (10%) each three (3) business day period that the report is late.

4. **Notices.** Any notices required to be given, hereunder shall be in writing and shall be personally served or given by mail. Any notice given by mail shall be deemed given when deposited in the United States Mail, certified and postage prepaid, addressed to the party to be served as follows:

8. **Personnel.** Consultant shall designate a representative for each Assigned Project ("Project Representative"). Consultant's Project Representative shall be available to the City at all reasonable times and will be the primary individual performing the Services under the Assigned Project. Consultant recognizes that the qualifications and experience of the personnel to be used are vital to professional and timely completion of the Services. The key personnel listed in Exhibit

"C" attached hereto and incorporated herein by reference and assigned to perform portions of the Services shall remain assigned through completion of the Services. Any substitution of personnel or the Project Representative shall be subject to the City's written approval. In the event that the City and Consultant cannot agree as to the substitution of the Project Representative or other key personnel, the City shall be entitled to terminate this Agreement.

9. **Assignment and Subcontracting.** Neither party shall assign any right, interest, or obligation in or under this Agreement to any other entity without prior written consent of the other party. 10. **Independent Contractor.** In the performance of this Agreement, Consultant, and Consultant's employees, subcontractors and agents, shall act in an independent capacity as independent contractors, and not as officers or employees of the City. Consultant acknowledges and agrees that the City has no obligation to pay or withhold state or federal taxes or to provide workers' compensation or unemployment insurance to Consultant, or to Consultant's employees, subcontractors and agents. Consultant, as an independent contractor, shall be responsible for any and all taxes that apply to Consultant as an employer.

This duty to defend shall apply whether or not such claims, allegations, lawsuits or proceedings have merit or are meritless, or which involve claims or allegations that any or all of the Parties to be Defended were actively, passively, or concurrently negligent, or which otherwise assert that the Parties to be Defended are responsible, in whole or in part, for any loss, damage or injury. Consultant agrees to provide this defense immediately upon written notice from the City, and with well qualified, adequately insured and experienced legal

counsel acceptable to the City. This obligation to defend as set forth herein is binding on the successors, assigns and heirs of Consultant and shall survive the termination of Consultant's Services under this Agreement.

11.5 Indemnity For Other Than Design Professional Liability. Except as to the sole negligence or willful misconduct of the City, Consultant agrees to indemnify, protect and hold harmless the Indemnified Parties from and against any claim for damage, charge, lawsuit, action, judicial, administrative, regulatory or arbitration proceeding, damage, cost, expense (including counsel and expert fees), judgment, civil fine and penalties, liabilities or losses of any kind or nature whatsoever whether actual, threatened or alleged, which arise out of, pertain to, or relate to, or are a consequence of, or are attributable to, or are in any manner connected with the performance of the Services, work, activities, operations or duties of the Consultant, or anyone employed by or working under the Consultant or for services rendered to Consultant in the performance of this Agreement, notwithstanding that the City may have benefited from its work or services. This indemnification provision shall apply to any acts, omissions, negligence, recklessness, or willful misconduct, whether active or passive, on the part of the Consultant or anyone employed or working under the Consultant.

12.1.2 Ratings. Any insurance policy or coverage provided by Consultant or subcontractors as required by this Agreement shall be deemed inadequate and a material breach of this Agreement, unless such policy or coverage is issued by insurance companies authorized to transact insurance business in the State of California with a policy holder's rating of A or higher and a Financial Class of VII or higher.

Said policies shall be in the usual form of commercial general and automobile liability insurance policies, but shall include the following provisions:

It is agreed that the City of Riverside, and their officers, employees and agents, are added as additional insureds under this policy, solely for work done by and on behalf of the named insured for the City of Riverside.

12.3.4 The insurance policy or policies shall also comply with the following provisions:

- a. The policy shall be endorsed to waive any right of subrogation against the City and its sub-consultants, employees, officers and agents for services performed under this Agreement.

SCOPE OF SERVICES

B. STATEMENT OF UNDERSTANDING AND APPROACH

Firm Understanding of City's Appraisal Prerequisites

As noted in Company Personnel at Section D of our response, and in the qualifications of the appraisers at Appendix A, the appraisers available to provide professional services to the City have ten years or more of experience in providing appraisal services for public agencies, and are all General Certified Appraisers in the State of California. Six (6) of the eleven (11) appraisers on our team also hold the Member of the Appraisal Institute (MAI) designation of the Appraisal Institute (AI), having satisfied the rigorous requirements in the areas of education and experience to receive this senior-level designation. Additionally, Beth B. Finestone, MAI, AI-GRS, FRICS, CRE is an AI-GRS (General Review Specialist)-designated MAI appraiser.

Technical Approach

All of our appraisal work is completed pursuant to the *Uniform Standards of Professional Appraisal Practice* (USPAP), and all appraisals prepared for potential acquisition purposes, subject to an eminent domain action, are also prepared in compliance with the California Code of Civil Procedure Section 1263.320. The methodology utilized in eminent domain appraisals is consistent with the methodology found in the California Department of Transportation (Caltrans) Right of Way Manual, Chapter 7. When appropriate, we prepare full and partial acquisition appraisals subject to the *Uniform Appraisal Standards for Federal Land Acquisitions* (UASFLA). We are also experienced in providing appraisals based on Federal Aviation Administration (FAA) guidelines as well as the guidelines of the California Department of General Services (DGS).

Appraisal assignments would be completed with the use of the most appropriate valuation methods for the specific property type. These include the Sales Comparison Approach, the Income Approach, and the Cost Approach. For single-family residential properties, the Sales Comparison Approach is usually the most relevant approach and is typically the only one that has application to the property. For income-producing properties, including multifamily residential properties, the Income Approach is commonly utilized along with the Sales Comparison Approach. For buildings that are newer (non-residential), or which contain fairly specialized improvements, the Cost Approach is frequently relevant. Land is typically valued using the Sales Comparison Approach. Corridors are typically valued using ATF methodology.

In the process of completing appraisals of partial acquisitions, subject to California Eminent Domain Law, we give full consideration to possible severance damages and benefits that may accrue to the remainder parcel as a result of the acquisition and project. We are very experienced in preparing damage studies that are well researched and have been accepted by the courts when we are called to testify. When we conclude that there are damages, every attempt is made to quantify benefits that accrue to the remainder, as benefits can be utilized to offset severance damages. In the State Rule, benefits may not offset the value of the actual acquisitions.

When reports are prepared to meet the guidelines of UASFLA a complete before and after analysis is required. The Federal Rule differs from the State Rule in that benefits can offset the value of the parts taken. However, it should be noted that when applying the Federal Rule, a direct calculation of the value of the parts acquired, damages and benefits is not undertaken. Rather the property is appraised in its before condition and this is compared to what the value of the property would have been on the date of value if the project were implemented, and the acquisitions already made. The difference between the before and after valuations results in the value of the proposed acquisitions.

In certain assignments, we would expect to encounter appraisals dealing with vacant land and/or various types of easements affecting vacant land. For analysis of this type of property, an investigation into the potential of securing development entitlements is a critical issue. Particular attention would be given to interviews with City representatives who are in the proper positions to comment on the entitlement process for the subject property. This level of investigation would also frequently include a review of relevant sections of the general plan, a review of specific plans that may affect the property, review of zoning, slope density analysis, California

Coastal Commission issues, fire department approvals, and investigations with other individuals at relevant governmental jurisdictions.

Non-Eminent Domain Related Appraisals

CBRE's Valuation and Services Advisory Group (VAS) considers all applicable approaches to value in each appraisal and uses accepted methodologies that are appropriate for the type of property being appraised. Scope of work and appraisal formats are discussed with the client in advance in order to meet with the client's objectives.

Eminent Domain/Condemnation Related Appraisals

Approach to Appraisals

Our efforts will at all times be centered on our profound respect for property rights. This includes both the property owner's right to full use and enjoyment of their property and the client's right to acquire all necessary property rights for public or private use. This perspective will guide our efforts toward just compensation and to allow the client to acquire rights-of-way and to minimize the amount of litigation.

If a large multi-property assignment is awarded, we would like to set a meeting with the project manager at the City to discuss the project and to glean any information available as to property owner concerns and project impacts. We have found that sitting with the client at the onset of a larger multi-property assignment and going over the individual properties and reviewing maps together can result in tremendous time savings down the road. In the case of an individual property award, this can often be handled over the phone.

Our process, once authorized, typically will follow this general framework. Please note that once engaged, we will consult with the client to customize an appraisal process to meet the needs of the contract.

Property Owner Notification (as needed): At commencement of engagement, CBRE will identify the properties to be appraised with information such as address, tax parcel identification number, owner of record, type of property, site size, and building size. Upon collection of the parcel specific information, CBRE will prepare letters to the owners of record for each parcel. These letters will outline the scope of the project and the purpose and use of the proposed acquisition in fee and/or easement. Letters will be delivered via certified mail to the owners of record within approximately one business week from commencement of engagement. CBRE will be responsible for the cost of delivery of the certified letters.

Front-End File Development: In conjunction with development of the market study if requested, our administrative staff, in conjunction with one of our right of way valuation experts, will develop individual files for each parcel in the project. Each file will contain all correspondence with property owner of record, assessor records, floodplain maps, zoning maps, surveys of the whole property and proposed acquisition, legal descriptions of the whole property and proposed acquisition, title commitments, right of way maps, easement documents, aerials, etc. Development of files is anticipated to be completed within approximately two weeks after commencement of engagement.

Inspection and Property Owner Interaction: Within one to two weeks after our administrative staff have mailed certified letters to the owners of record, we would anticipate return responses from the property owners. During this correspondence period, CBRE would attempt to set up inspections of the identified parcels. As needed, CBRE staff will send out an additional letter, via certified mail, which outlines the information which CBRE will be requesting in order to complete the appraisal assignment.

An appraiser/right of way expert will attend each property inspection and insist on providing each property owner the opportunity to articulate the project's effect on their property. This is coordinated with the City, if a City representative wishes to be present. The Vice President and/or Senior Appraiser remains directly involved in all aspects of the inspection, analysis, and appraisal completion. Limited amounts of research assistance may be provided by less senior appraisal staff, under the direct guidance and supervision of the project's Vice

President and/or Senior Appraiser. This serves to provide an error-free report, with a well-developed opinion of the fair market value of the acquisitions and decrease the chances of litigation. The inspections of the parcels would include an inspection of the interior and exterior of all improvements located on the parcel as well as an inspection of the proposed acquisition. However, please note that our level of inspection will be contingent on the cooperation of the landowner of the Parcel(s) affected by the Project.

Valuation: Applying the market data and feedback from the property inspection and meeting with the owners, the CBRE team will analyze the property and determine the fair market value of the acquisitions that is due to the property owner.

The appraisal reports will be written according to the applicable requirements and guidelines with the market value definition being based on current Federal and State standards. The development of the appraisal will consider all relevant facts and aspects of the property being appraised and the proposed acquisitions in fee and/or easement.

If there are damages, CBRE will estimate the cost to cure and effective age of the improvements within the proposed acquisition and any effect(s) to the remainder after the acquisition. Our analysis may utilize sources such as the Marshall & Swift Valuation Guide and/or construction cost estimates developed by outside consulting firms. Further, depending on the complexity of the appraisal assignment, CBRE, Inc. may consult with a certified land planner to determine appropriate land use plans and designs in the cost to cure and remainder after scenario.

Report Delivery: Our key personnel designated for work with the City specialize in various property types and are experienced in right of way projects. Ultimately, we will staff the project to meet the scope of the project within the required delivery time.

Right-Of-Way Expert Review

At least one Right of Way appraiser (Expert) at the level of First Vice President or higher will be assigned to each parcel. This expert will direct appraisal assignments within the project. Professionals and Experts discuss the assignments up front and periodically throughout to ensure all client expectations are being met. Right of Way Experts are selected based on their experience and credentials and are knowledgeable in current approved methodologies and applicable case law.

Key areas of review are:

- Engagement letter and required scope of work.
- Unique client requirements were followed.
- Applicable ownership history is presented.
- All Extraordinary and/or Hypothetical Assumptions are clearly stated.
- A detailed review of the entire report encompassing all sections, methodologies including damage/enhancement calculations (if any), etc.
- Only client approved appraisers are assigned, inspect subject properties and complete assignments (sign the certification and report). In most cases, it is acceptable for other licensed appraisal staff to significantly contribute, if this is approved by the client and adheres to USPAP.
- Consistency is maintained within the project regarding methodology, data used, value component conclusions and value conclusions. This will be accomplished through project review and audit.
- Proper right-of-way valuation methodology is utilized. The Expert will work with assigned appraisers to resolve questions regarding right-of-way specific valuation issues, as well as current case law application.
- Compliance with State guidelines.
- Proper report format utilized in the preparation of reports.

Market Rent Appraisals

Market Rent Approach

We are uniquely qualified to conduct Market Rental Surveys on behalf of the City. Being part of CBRE allows us access to a wealth of data. This includes not only data that is available from public sources such as CoStar, MLS, professional organizations and Internet searches, but includes access to our proprietary data base system. Our proprietary data system allows us not only to find comparable rental (lease) data, but also give us access to the unique deal points of the transactions that our brokerage firm was involved with.

Improved Properties

Our general approach to conducting a rental survey is to view the subject property and understand the tier of market in which it competes. We then review our data sources and reach out to brokers active in the segment of the market we are surveying and locate the buildings which we feel are the primary competition for the subject. Once making this determination we strive to locate recent leasing activity in these buildings. If no data is available in the primary competitive buildings, we look to the secondary competition.

Once the data is located, we can present it to the City as a survey, or we can analyze it with respect to a particular asset. Alternatively, we can compare a number of transactions to determine which is the most advantageous by considering the present value of the various leases.

To determine the market rent for improved properties we generally rely on a direct comparison of comparable leased properties. However, for special purpose properties, we may need to rely on a rate of return applied to a valuation of the property as improved (most often concluded by the cost approach).

- **Non-Special Purpose Properties:** As previously indicated we rely on a direct comparison of comparable lease properties. Comparable data is obtained by interviewing active market participants such as brokers, investors and property owners. We also review public records, when appropriate and utilize pay data services such as CoStar. We also have an internal data base that is proprietary to CBRE. We are able to access rental comparable data from across the county utilizing this system. While we generally focus on comparable transactions that are in the same market area as the subject, there are instances where a national search may be appropriate.

Factors of comparison that are considered include, but are not limited to the following:

- Lease date
 - Lease term
 - Escalation factors
 - Free rent
 - Tenant improvements and other concessions
 - Location and access
 - Size
 - Quality and condition of the improvements
 - Property type and use
 - Coverage ratio
- **Special Purpose Properties:** As previously indicated, for special purpose properties, where there is not an active market for leases, we often apply a market derived rate of return to the improved property value. For special purpose properties, the cost approach is the typical valuation methodology employed. This involves determining a value for the underlying land and adding to it a depreciated replacement cost for the improvements. To determine the appropriate rate of return to apply to the improved value of the improvements, we follow a procedure similar to that associated with ground leases, described previously.

Ground Leases, Easement Rents and License Rates of Land

The two primary methods for analyzing the rental value of land as if vacant are described below.

1. Analyze recent leases of sites that are similar to the subject and conduct a direct comparison process using these comparable lease transactions.
2. Reach an opinion regarding the market value of the subject land as if vacant and conduct an analysis that leads to a conclusion as to the appropriate annual rate of return to apply to the land value.

We would conduct a search in an effort to find comparable land lease transactions that would allow us to perform the first study. Depending on the type of land involved and its location, comparable data may or may not be available. To search for comparable ground leases, we rely on interviews with active market participants, interviews with representatives of public agencies known to be active in leasing land, a search of public records, pay data services such as CoStar, as well as our internal data base.

A direct comparison of the comparable leases is the most ideal way to conclude to a market rent for land. Comparable ground leases are analyzed based on highest and best use of the underlying land, location, date of lease, term of lease, type and frequency of rent escalations and the frequency the ground lease adjusts to market. Consideration is also given to the methodology utilized to initially set the market rent and ground lease terms associated with the comparables. Any free rent or other incentives provided are also considered.

It is important to note that limited current and comparable transactional data is often available. As such, we often focus on the latter method of analysis (item 2 above), which involves reaching an opinion regarding the market value of the subject land as if vacant and conducting an analysis that leads to a conclusion as to the appropriate annual rate of return to apply to the land value. To determine the underlying value of the subject land, we generally rely on the sales comparison approach to value, whereby we compare sales of comparable land transactions to the subject. Generally, the subject land is valued based on its highest and best use as vacant, unless an existing ground lease requires a different methodology.

Once a conclusion of land value is reached for the subject land, it represents the appropriate starting point in the appraisal of the market rental value. The next steps in this process are:

1. Identify and analyze data that is relevant for the purpose of setting the appropriate annual rate of return.
2. Examine the similarities and differences between the rate of return comparables (and other data) and the terms of the subject lease. Make adjustments as warranted to account for the material differences.
3. Apply the results of the analysis and express an opinion regarding the market rental value, taking care to explain how this rate is applied within the context of the ground lease obligations for the option term. Our conclusions can either be presented as a point estimate of market rent, a range or both.
4. If we are asked to value an easement rent or license, a factor is typically applied to the concluded market rent for the fee simple bundle of rights.

Appraisal Reviews

General Approach and Methodologies Utilized for Appraisal Reviews

Our VAS Southern California Right of Way team has significant experience in the review of outside appraisals related to right-of-way appraisals. We are familiar with the appraisal review requirements for federal- and state-funded projects, pursuant to Title 25 California Code of Regulations §6000 et seq. §7260 et seq. of the California Government Code 42 U.S.C. §4601 et seq. (Uniform Relocation Assistance and Real Property Acquisition Policies Act of 1970) and 49 CFR Part 24 to the extent they apply to the appraisal assignment. The following are the general steps that we take in preparing these reviews:

- Discuss the project with the client so that we can develop an appropriate scope of work and understand the client's needs. In addition, having a strong project overview will enable us to better understand the Project and be better prepared to review the individual reports.
- a. Generally, for right of way projects we are asked to review the reports and discuss them with the appraiser in order to obtain a credible appraisal for delivery to the client.
- b. In some cases (rarely) we find that we are unable to obtain a credible work product from the appraiser that we can recommend for approval. If this is the case, our scope of work may be expanded to include a reappraisal of the property or to recommend that another appraisal be obtained.
- c. Most right of way work in California must comply with the California Code of Civil Procedure, and the Caltrans Right of Way Manual in addition to USPAP, but in some instances the work needs to be compliant with UASFLA. This is part of our scope of work determination so that we know what standards the report should be reviewed to.
- If possible, we like to be engaged at the outset of an assignment related to a right of way project that that we can act as a resource to the appraiser performing the appraisal if they have any questions. We understand that this is not always possible.
- Make a determination of how many appraisals we will be reviewing related to a specific project and develop a spreadsheet summarizing these properties and their specifics, as well as the value conclusions and other pertinent details. This will enable us to help maintain a level of consistency across a project to the extent possible.
- As appraisals come in for review, they are assigned to a senior review appraiser and to a researcher.
- The researcher will be responsible for confirming all factual data in the report including land areas, zoning, confirmation of comparables through public records, ownership, etc. They will also check all mathematical calculations, including adjustments to comparable data. Any inconsistencies or errors are noted on the document and the report is given to the senior review appraiser.
- The senior review appraiser will then read the appraisal report in its entirety, noting any sections that require further analysis or comment.
- a. The review appraiser will review the research and analyses in the report with respect to its completeness, accuracy, adequacy, relevance and reasonableness.
- b. The market data will be checked for reasonableness.
- c. The appraisal methodology will be checked for applicability to the property type.
- d. Adjustments to the comparable data will be reviewed and a determination will be made as to their market derived support or the reasonableness of the logical explanations for them.
- The review appraiser will view the subject property and the comparables if a field review is requested. This is not done for desk reviews.
- The review appraiser will develop an opinion as to whether the analyses are appropriate within the context of the requirements applicable to that work. Special consideration is given to the valuation of the parts acquired and any possible severance damages resulting from the project.
- The reviewer will develop an opinion as to whether the opinions and conclusions are credible within the context of the requirement applicable to that work.
- The reviewer will develop reasons for any disagreement and discuss these with the appraiser.
- The goal is to work with the appraiser so that a credible appraisal is completed.
- If the scope of work requires that the review appraiser develop his or her own opinion of value this is completed. Typically, this is not part of a review of a right of way appraisal at the outset.
- The review appraiser prepares a review report for delivery to the client making our recommendation of acceptance and confirmation of applicable valuation standards. Any applicable Caltrans forms or project specific forms are included.

Our appraisal review services can be tailored to meet the needs of the City by adequately understanding your scope of work requirements. We can track all value conclusions on an appropriate unit basis for land and

improvements and summarize easement values as a percent of land value for differing types of easements on a given project. This will enable the City to be confident that property owners are being treated fairly and consistently within a project area.

Our deliverables can be tailored to meet the needs of the City, and any pertinent documentation agreed to up front. We can prepare a sample review template for major project and invite your input at the onset so that you are confident that all requirements are met and that the review is user friendly and meets your individual needs. All reviews can be prepared in a uniform format that you know where to find what you need in every report.

The only potential hurdles that we see with review work, related to the delivery of the project relate to timing and appraisal quality. If the appraisal(s) is(are) delivered late to the reviewer, it can cause delays in acquiring the right of way and hence delay the project. Due to the size of our staff, we can assign a researcher to all appraisals for review within a day of their receipt. The researcher can fact check the reports before they are given to the reviewer so that the reviewer can focus on the analysis, methodology and appropriateness of the analysis and data. This enables us to review a significant number of reports in a short time. We can also group the appraisals so that the reviewer can view a number of the subject properties and comparables in a given day, rather than making multiple trips. This assumes a field review is required. In some instances, if an appraiser is running late, we can get them to send us their market data in advance of the report so that we can start the fact checking process and shave some time from the review process.

It is our goal to always work with the appraiser so that a credible and quality product is delivered to the client. In those rare instances where we are unable to recommend an appraisal for acceptance, we have the ability to reappraise it ourselves, if you so desire. This can help to save time, and some cost as compared to retaining the services of a new appraiser.

Workplan for Appraisal Reviews

Ms. Finestone will coordinate all work awarded to CBRE by the City and will serve as a point of contact to the City. Ms. Finestone will have an active role in meeting with the appraisers working on City appraisal review assignments and ensuring quality control. Ms. Finestone will also serve as a point of contact for the VAS Southern California Right of Way team to other appraisers and consultants awarded assignments on the same projects to ensure that all data is shared so that the appraisers have all of the available data available to them for their appraisal review analyses. Ms. Finestone, Messrs. Ellis, Bogorad, or Donahue will review, and cosign reports completed by the VAS Southern California Right of Way team and will be available for expert testimony and litigation support. Ms. Finestone will be available to participate in the appraisal of any complex assignments. If City subcontractors are required for the appraisal reviews of outside appraisal reports involving business valuations/good will appraisals and or furniture, fixtures and equipment, Ms. Finestone will coordinate their services to ensure that all appropriate aspects of the appraisal review assignment are considered, while ensuring that there is not a duplication (double counting) of valuation items by the various reviewers involved in an assignment.

Prior to bidding on an assignment, Beth Finestone would discuss the individual project with the appropriate representative of the City to make sure we have an understanding of the needs of the City and the purpose of the appraisal review. This will allow us to advise the City as to special considerations and or alternative valuation analyses that they may want to consider in our review of the outside appraisal(s).

Other Information Relating to Technical Approach

CBRE valuation team members have access to all of the latest technology and software. Our analysts/appraisers have and/or utilize CBRE proprietary report software, Argus Valuation DCF and/or AE, Argus Asset Management, Flood Insights, NDC Data, Real Facts, Costar, ESRI, Real Capital Analytics, Hoovers, Hanley Wood Market Intelligence, LoopNet, Real Quest, Real Data Apartment Insights, all major Multiple Listing Services and Marshall Valuation Service. Our appraisers also have access to robust in-house research and GIS departments

which provides our team members with the most current real estate information available. CBRE also uses the most current file sharing software. This allows us to receive and transmit large electronic files such as title work, CAD drawings, plats, images, as well as provide seamless and efficient electronic delivery of our appraisal reports to clients.

As part of CBRE, Inc., our firm has access to relevant transactions on a nationwide basis. While the most relevant data for any local assignment will be obtained from the local market, the ability to obtain accurate, verified data in other markets is a useful source of additional information to supplement local data.

Community Involvement

As real property appraisers, we work to maintain a solid and consistent flow of communication with the appropriate agency representatives who are involved in the project, and with the lead right of way agents who are working on the project. Our direct communication with property owners typically begins with a letter to the owner notifying them of our role as appraisers in the project and inviting them to meet us onsite for an inspection and an opportunity for them to discuss with us how the project might affect their property. We are always respectful of the owners, but we remain aware that our client is the City (agency). Therefore, we would not communicate our findings or opinions to the owners, or to anyone else without the City's specific permission.

In some projects we have been asked to participate in community meetings to explain the valuation process to a group of owners and other interested parties. If requested, we would be available to provide this service for the City.

Tailoring our Services to Meet the Needs of the City

Prior to bidding on an assignment, Beth Finestone (or other team leader) would discuss the individual project with the appropriate representative of the City to make sure we understand the needs of the City and the purpose of the appraisal. This will allow us to advise the City as to special considerations and or alternative valuation analyses that they may want to consider. For right-of-way (eminent domain) assignments the general impact the project may have on the individual property(ies) to be appraised is discussed with the project manager. If possible, this would include a preliminary review of project maps (right-of-way maps) and aerial photographs. This will enable Ms. Finestone and/or the team leaders to provide an appropriate fee quote to the City that can result in the greatest economies of scale. For example, if it can be ascertained that an individual property or properties can be valued as land only, as the required acquisitions are minor and no severance damages are anticipated, then a lower fee can be quoted versus automatically assuming a full before and after analysis, as improved, must be undertaken.

If a larger multi-property assignment is awarded, we would like to set a meeting with the project manager at the City to discuss the project and to glean any information available as to property owner concerns and project impacts. We have found that sitting with the client at the onset of a larger multi-property assignment and going over the individual properties and reviewing maps together can result in tremendous time savings down the road. In the case of an individual property award, this can often be handled over the phone.

Project Schedule for Appraisals

Our work will progress through the completion of the following steps and others that may be deemed relevant as we complete the assignments. Please note that this time frame can be compressed in order to meet the City's needs.

Week 1

1. Beth Finestone will notify the administrative support staff of all jobs awarded and assign them to key personnel.

2. Within 24 hours, each individual property will be assigned an assignment number and are input into TOPS2, our proprietary data management system utilized in part to coordinate large property assignments. It will also be added to our Excel Master Tracking Spreadsheet that was previously discussed.
3. Meet with client to review mapping, ownership records, aerial photos, and other project-specific documents.
4. Organize a series of work notebooks (one for each property being appraised) that will allow us to maintain a high level of organization throughout the project.
5. Prepare and send owner notification letters.

Weeks 2-3

6. Begin research for comparable sales and for relevant land use issues in appropriate jurisdictions.
7. Review subject title reports (if available).
8. Review the easement deeds for the subject properties.
9. Conduct onsite inspections of the subject properties and meet the property owners who have responded positively to our offers to do so.
10. Complete field inspection of comparable sale transactions.
11. Conduct confirmation interviews for the comparable sales.
12. Meet with representatives of relevant jurisdictions to review land planning maps and documents and to conduct appropriate interviews concerning zoning and general plans.
13. Prepare master report detailing appraisals for each geographic region.

Week 4

14. Senior appraisers meet with Beth Finestone, John Ellis, Adam Bogorad, or Rick Donahue to conclude preliminary values for a geographic region.
15. Complex valuation issues will be personally addressed by Beth Finestone, John Ellis, Adam Bogorad, or Rick Donahue.
16. Senior appraisers prepare valuation analysis within a framework that allows us to review values on a parcel-by-parcel basis, to assure the development of value opinions that are both well-supported and consistent across all parcels of the project.
17. For partial acquisitions, evaluate the impact of the acquisition and the project on the remainder, and complete the analysis of severance damages.

Weeks 5-6

18. Beth Finestone, John Ellis, Adam Bogorad, or Rick Donahue review all final valuations.
19. Senior appraisers finalize the appraisal reports, statements of valuation, and parcel diaries.
20. Organize the subject photos and comparable sale data sheets.
21. Upload all final documents to the designated, secure website or deliver electronic and hardcopies of reports as requested.

Post Delivery

22. We would anticipate receiving review comments (if any) from the City within a reasonable time frame upon delivery of the Appraisal Report. Upon receipt of any suggested revisions, we would deliver a revised Appraisal Report within three business days, or sooner if needed.

Project Schedule for Appraisal Reviews

A **sample work plan** for a typical multi-property right-of-way appraisal review assignment is summarized as follows. Upon receipt of notice to proceed, our work will progress through the completion of the following steps and others that may be deemed relevant as we complete the assignments. Please note that the time schedule below assumes multiple property appraisal reviews are awarded at a single time. This timeframe can be compressed for smaller assignments or to meet client needs.

Week 1

1. Assign the report to be reviewed to a researcher and senior appraiser.
2. Researcher will fact check all data in the report.
3. Senior appraiser will view subject and comparables, if a field review is requested.

Weeks 2-3

4. The senior review appraiser will thoroughly read the appraisal report for each subject property under review in its entirety, noting significant sections with an evaluative comment.
5. The review appraiser will make a determination of the appraisal's full compliance with USPAP and other applicable state and federal laws and regulations.
6. The review appraiser will evaluate the appraiser's support and reasonableness of the conclusion of highest and best use of the subject property(s) being appraised.
7. The review appraiser will evaluate the appraiser's support and reasonableness of the applications of the acceptable valuation approaches.
8. The review appraiser will evaluate the appraiser's support and reasonableness of the valuation conclusion(s).
9. The review appraiser will evaluate the adequacy completeness of the confirmation of the market data used for the purposes of estimating market value of the subject property(s).
10. Appraisal methodology will be checked for applicability to the property type.
11. Mathematical calculations will be checked for accuracy. The review appraiser may attempt to contact the original appraiser if there are questions to the inputs utilized in a discounted cash flow analysis.
12. If adjustments are made to market data, determination will be made as to their market-derived support or the reasonableness of the logical explanations for them.
13. The review appraiser will further make determinations of whether the real property appraiser's concluded value(s) is sufficiently credible.
14. Any questions or deficiencies will be addressed directly with the appraiser.
15. If a 2nd draft is submitted to correct deficiencies, it will be reviewed.
16. The appraisal review will be submitted to the City, along with the PDF of each appraisal report reviewed, after completion of the analysis. Our appraisal review will not include a re-appraisal of the property(s) without a change in the scope of services provided.
17. If we find that we are not able to recommend the appraisal for acceptance, we will notify you as soon as this determination is made so that you can decide how to proceed. This rarely happens but is a possibility.
18. We will be readily accessible to address any questions or concerns that arise from the City's review of our delivered work product. Attention to post-delivery inquiries will be a high priority item to be addressed immediately upon presentation.

Commitments of Key Personnel

Significant multiparcel assignments require a strong foundation which consists of a well-developed scope of work, work plan, and involvement of a sufficient number of qualified professionals to execute the assignment. Senior members of our firm remain available for client interaction and overall project planning as part of our regular job duties. Thus, we are able to proceed with the foundational aspects of major projects within 24 hours of being notified of a new project. The planning process usually takes a few days, which coincides with the completion of pre-existing commitments by other team members for the project. While staff appraisers usually have work in progress at any given time, they can be integrated into a new City project as their work on other assignments is completed. Based on our flow of work over the last two years, we expect to have full staffing available on all major projects within two weeks of award of contract. For assignments involving fewer than ten parcels, we would expect to have full staffing availability within one week of award of contract. In all assignments, we could send out owner notification letters and initiate our research for comparables within the first week of the assignment.

Organization Chart

CBRE, Inc. is pleased to present our assembled team with a proven track record to perform appraisal services. The following organizational chart shows the members of our firm. The principal appraiser on any assignment completed on behalf of the City will be a MAI-designated appraiser at the level of First Vice President or higher. On large assignments, a Vice President or Senior Appraiser (an appraiser who is state certified, at a minimum) may work with the principal appraiser to allow for the efficient completion of the assignment. Our Senior Valuation Associate will provide research assistance to the Vice President or Senior Appraisers throughout the assignment. The services of our administrative staff members will be coordinated by our designated Project Manager, Beth Finestone, MAI, AI-GRS, FRICS, CRE.

Key Personnel Certifications, Licenses and Designations

Collectively, our VAS Southern California Right of Way team members have a particularly strong background in providing a variety of appraisal, appraisal review, and consulting services to a wide variety of public entities, including public agencies at the federal, state, and municipal levels. Many of these assignments have involved eminent domain, and all of our staff members have experience working on these eminent domain assignments. Non-eminent domain assignments for public agencies include (but are not limited to) the valuation of properties for ground rental rates, acquisition, disposition, license rates, and bond financing. We also review outside appraisals for our public agency clients and are often called upon to provide consulting services.

- Prepare the appraisal report for submission, including replacement cost new, depreciated value and salvage value in place for each item and photographs of significant items;
- Maintain files in accordance with USPAP; and
- Provide expert testimony and litigation support, as required.

The schedule for completion of a fixtures and equipment appraisal can vary widely depending upon the complexity of the business appraised and the degree of cooperation from the business' ownership. The appraisals are usually completed within a 30-to-45-day timeframe from authorization to proceed and completion of a site inspection, and we carefully coordinate site visits to maximize efficiency without inconveniencing the businesses' ownership. DM&A actively communicates project status with clients via email, conference calls, or any other means preferred by the client. To the extent any data or information necessary for an appraisal is not provided, we will notify City officials or representatives in a timely manner such that steps can be taken to obtain the necessary data.

GOODWILL LOSS APPRAISAL TECHNICAL APPROACH

In performing goodwill loss appraisal services for the City of Riverside, DM&A will perform the necessary research, investigation, and analysis to provide written appraisal reports in compliance with the standards of the Uniform Standards of Professional Appraisal Practice (USPAP) as it pertains to business valuations. DM&A will consider the elements of Code of Civil Procedure Section 1263.510 and relevant case law pertaining to compensation for loss of goodwill. Kevin Blair and/or Madeleine Mamaux will oversee all goodwill loss appraisal assignments. DM&A takes the following steps in the goodwill valuation process:

- Communicate with the City of Riverside management and/or representatives to ascertain the scope of the assignment and attend any required meetings;
- Prepare appraisals in accordance with the relevant sections of the California Code of Civil Procedure including the Section 1263.320 definition of Fair Market Value;

- Communicate with the subject business and/or representatives to commence the data gathering process;
- Review and analyze the financial statements of the subject business, including internal income statements and balance sheets as well as tax returns;
- Interview the owners and/or managers of the subject business and/or review deposition transcripts. Such interviews/depositions are intended to provide DM&A with a thorough understanding of the business' products, operations, management, employees, marketing, competition, and industry, as well as an understanding of recent financial trends and outlook;
- Conduct site and area inspections of both the subject location and the business' relocation site, if applicable;
- Review leases and other contracts pertinent to the business' operations;
- Coordinate with other professionals, such as fixtures and equipment appraisers, real estate appraisers, and relocation consultants, to avoid duplication of compensation;
- Research the business' industry, economic factors affecting the business, and the marketplace for sales of businesses similar to the subject;
- Investigate the impacts of the taking and/or of relocation, if applicable, on the business' revenues and profits in the "after" condition taking into consideration potential betterment;
- Implement valuation methods, such as the Income Approach (i.e., Discounted Cash Flow Method, Capitalization of Cash Flow Method) and Market Approach (i.e., Discretionary Cash Flow Multiplier Method, EBITDA Multiplier Method), to determine the value of the business' goodwill in both the before condition and in the after condition. The selection of the appropriate methods depends on the nature of the business and its marketplace in light of DM&A's market research;
- Prepare a valuation report in compliance with USPAP and requirements of the relevant jurisdiction;
- Attend any required meetings or conferences with the client regarding appraisal questions;
- Provide expert testimony and litigation support, as required; and
- Maintain files in accordance with USPAP and the Caltrans Right-of-Way Manual.

Prior to the City's execution of this Agreement, Consultant shall obtain, and shall thereafter maintain during the term of this Agreement, commercial general liability insurance and automobile liability insurance as required to insure Consultant against damages for personal injury, including accidental death, as well as from claims for property damage, which may arise from or which may concern operations by anyone directly or indirectly employed by, connected with, or acting for or on behalf of Consultant. The City, and its officers, employees and agents, shall be named as additional insureds under the Consultant's insurance policies.

12.3.1 Consultant's commercial general liability insurance policy shall cover both bodily injury (including death) and property damage (including, but not limited to, premises operations liability, products-completed operations liability, independent contractor's liability, personal injury liability, and contractual liability) in an amount not less than \$1,000,000 per occurrence and a general aggregate limit in the amount of not less than \$2,000,000.

Said policies shall be in the usual form of commercial general and automobile liability insurance policies, but shall include the following provisions:

It is agreed that the City of Riverside, and their officers, employees and agents, are added as additional insureds under this policy, solely for work done by and on behalf of the named insured for the City of Riverside.

12.3.4 The insurance policy or policies shall also comply with the following provisions:

- a. The policy shall be endorsed to waive any right of subrogation against the City and its sub-consultants, employees, officers and agents for services performed under this Agreement.

SCOPE OF SERVICES

Introduction

The City of Riverside has many important projects and goals outlined in its 2022-2027 Five-Year Capital Improvement Program (CIP) Budget. Measure Z one-cent sales tax, General Fund, RCTC Measure A half-cent sales tax, and grants provide essential funding for the City's continual investment in critical infrastructure, such as roads, sidewalks, and essential facilities.

Upcoming CIP projects involving new infrastructure facilities, such as **sidewalk gap closures, street widening projects, and at-grade rail crossing improvements**, may require professional real estate appraisal and acquisition services, even if only a temporary construction easement (TCE) or small portion of private property is needed to construct the improvements.

Ongoing work to purchase and/or condemn Southern California Edison (SCE) facilities and easement rights in areas previously annexed by the City may also be well-served by an experienced right of way team like Epic Land Solutions that has in-house **utility coordination experts** with relationships at SCE and **condemnation specialists**.

As the City pursues grant funding and works with stakeholder agencies, such as RCTC and the County, the right of way consultant can also support the City with realistic and **accurate cost estimates** for proposed real estate acquisitions and relocations, where required. Right of way cost estimates are actually required for Caltrans Data Sheet exhibits for **on-system highway improvement projects** and other Caltrans oversight projects. For ongoing property management, market rent studies and land valuations performed by certified general real estate appraisers are critical for lease and license revenue capture and reducing the City's liability.

We are Imbedded in the Riverside Community!

EPIC established its Inland Empire Regional Office in 2003. Today, we have a fully staffed team that collaborates daily from our Downtown **Riverside Office location near the Metrolink Station on Vine Street. Three full time staff reside within the City, and several more within local communities within the County. With this local team**—many of whom are Spanish-speaking --EPIC is uniquely qualified to represent the City and engage with the community to deliver real estate services. We are already part of the community!

EPIC's Regional Office in downtown Riverside - just 2 minutes from Riverside City Hall!

Meeting the Needs as an On-Call Service Provider

EPIC's right of way team understands the nature and demands of on-call contracts. Our team is built for on-calls and is ready to tackle any project, large or small. As a service provider specializing in on-call contracts, we are adept at handling variable schedule and contract demands. We offer the City the flexibility it needs to execute real property and right of way tasks, no matter how simple or complex. To fulfill the scope of requirements for right of way projects, EPIC can draw resources from our corporate office headquarters, Inland Empire Regional Office or our San Diego Regional Office to complete right of way services, sometimes concurrently, to meet project expectations.

Scope Understanding

The Real Property Services Division of the City, the Successor Agency of the Redevelopment Agency of the City (Successor Agency), and the Housing Authority of the City (Housing Authority), are seeking qualified professional consulting firms to provide on-call right of way, real property, and related services on an "as needed" basis. The City's purpose is to create a list of qualified Consultants to improve efficiency. Establishing a panel in each specialty will reduce redundancy in the review process and will streamline the selection of qualified firms for upcoming solicitations. The City's Real Property Services Division supports many departments, including but not limited to Parks, Recreation, and Public Works projects.

EPIC meets or exceeds each pre-requisite defined in the RFP. We are proposing on the following specialty service areas for on-call, as-needed basis:

- Appraisal & Appraisal Review
- Acquisition
- Relocation
- Property Management - Interim and Full Scope
- Environmental Site Assessments - Phase I, Phase II, Asbestos, and Lead-Based Paint Surveys

EPIC's right of way team are currently performing appraisal and acquisition services for approximately 12 property owners for the City's Murrieta Hot Springs Road Improvement Project. This 15-acre project along Margarita Road to Winchester Road is part of the City's Capital Improvement Program (CIP).

Approach to Scope of Services

EPIC is prepared to resolve real property issues as they relate to the City's improvement projects as an on-call, right of way consultant. EPIC will perform all right of way and property acquisition services in close coordination with the City and in accordance with county, state, and federal policies and procedures wherever applicable including Title VI of the Civil Rights Act of 1964, the Federal Uniform Relocation Assistance and Real Property Acquisition Policies Act of 1970, as amended, and the URA regulations that became effective in February 2005.

A Right of Way Program Built for Federal-Aid Projects

Our services are guided by the Caltrans Right of Way Manual and Caltrans Local Assistance Procedures Manual (LAPM), ensuring meticulous documentation and rigorous protocol for clearing the project right of way. From the Notice to Proceed to Project Close-Out, our file documentation and project methodology adheres and conforms to these critical guidelines to protect public agency's funding sources. EPIC routinely supports Caltrans Right of Way Data Sheets, and Right of Way Certification, which require substantial knowledge of Caltrans District 8 procedures, forms and requirements. Under this contract, EPIC will provide comprehensive right of way and real property consulting, relocation, and property management services for the City of Riverside, as needed.

EPIC's comprehensive slate of services covers all phases of right of way, from project development through construction, in compliance with Caltrans and federal FHWA funding programs:

This duty to defend shall apply whether or not such claims, allegations, lawsuits or proceedings have merit or are meritless, or which involve claims or allegations that any or all of the Parties to be Defended were actively, passively, or concurrently negligent, or which otherwise assert that the Parties to be Defended are responsible, in whole or in part, for any loss, damage or injury. Consultant agrees to provide this defense immediately upon written notice from the City, and with well qualified, adequately insured and experienced legal

counsel acceptable to the City. This obligation to defend as set forth herein is binding on the successors, assigns and heirs of Consultant and shall survive the termination of Consultant's Services under this Agreement.

The rating and required insurance policies and coverages may be modified in writing by the City's Risk Manager or City Attorney, or a designee, unless such modification is prohibited by law.

12.1.1 Limitations. These minimum amounts of coverage shall not constitute any limitation or cap on Consultant's indemnification obligations under Section 11 hereof.

12.1.2 Ratings. Any insurance policy or coverage provided by Consultant or subcontractors as required by this Agreement shall be deemed inadequate and a material breach of this Agreement, unless such policy or coverage is issued by insurance companies authorized to transact insurance business in the State of California with a policy holder's rating of A or higher and a Financial Class of VII or higher.

12.1.3 Cancellation. The policies shall not be canceled unless thirty (30) days' prior written notification of intended cancellation has been given to the City by certified or registered mail, postage prepaid.

Said policies shall be in the usual form of commercial general and automobile liability insurance policies, but shall include the following provisions:

It is agreed that the City of Riverside, and their officers, employees and agents, are added as additional insureds under this policy, solely for work done by and on behalf of the named insured for the City of Riverside.

SCOPE OF SERVICES

B. Statement of Understanding and Approach

Introduction

The City of Riverside has many important projects and goals outlined in its 2022-2027 Five-Year Capital Improvement Program (CIP) Budget, Measure Z one-cent sales tax, General Fund, RCTC Measure A half-cent sales tax, and grants provide essential funding for the City's continual investment in critical infrastructure, such as roads, sidewalks, and essential facilities.

Upcoming CIP projects involving new infrastructure facilities, such as **sidewalk gap closures, street widening projects, and at-grade rail crossing improvements**, may require professional real estate appraisal and acquisition services, even if only a temporary construction easement (TCE) or small portion of private property is needed to construct the improvements.

Ongoing work to purchase and/or condemn Southern California Edison (SCE) facilities and easement rights in areas previously annexed by the City may also be well-served by an experienced right of way team like Epic Land Solutions that has in-house **utility coordination experts** with relationships at SCE and **condemnation specialists**.

As the City pursues grant funding and works with stakeholder agencies, such as RCTC and the County, the right of way consultant can also support the City with realistic and **accurate cost estimates** for proposed real estate acquisitions and relocations, where required. Right of way cost estimates are actually required for Caltrans Data Sheet exhibits for **on-system highway improvement projects** and other Caltrans oversight projects. For ongoing property management, market rent studies and land valuations performed by certified general real estate appraisers are critical for lease and license revenue capture and reducing the City's liability.

We are Imbedded in the Riverside Community!

EPIC established its Inland Empire Regional Office in 2003. Today, we have a fully staffed team that collaborates daily from our Downtown **Riverside Office location near the Metrolink Station on Vine Street. Three full time staff reside within the City, and several more within local communities within the County. With this local team**—many of whom are Spanish-speaking --EPIC is uniquely qualified to represent the City and engage with the community to deliver real estate services. We are already part of the community!

EPIC's Regional Office in downtown Riverside - just 2 minutes from Riverside City Hall!

Meeting the Needs as an On-Call Service Provider

EPIC's right of way team understands the nature and demands of on-call contracts. Our team is built for on-calls and is ready to tackle any project, large or small. As a service provider specializing in on-call contracts, we are adept at handling variable schedule and contract demands. We offer the City the flexibility it needs to execute real property and right of way tasks, no matter how simple or complex. To fulfill the scope of requirements for right of way projects, EPIC can draw resources from our corporate office headquarters, Inland Empire Regional Office or our San Diego Regional Office to complete right of way services, sometimes concurrently, to meet project expectations.

Scope Understanding

The Real Property Services Division of the City, the Successor Agency of the Redevelopment Agency of the City (Successor Agency), and the Housing Authority of the City (Housing Authority), are seeking qualified professional consulting firms to provide on-call right of way, real property, and related services on an "as needed" basis. The City's purpose is to create a list of qualified Consultants to improve efficiency. Establishing a panel in each specialty will reduce redundancy in the review process and will streamline the selection of qualified firms for upcoming solicitations. The City's Real Property Services Division supports many departments, including but not limited to Parks, Recreation, and Public Works projects.

EPIC meets or exceeds each pre-requisite defined in the RFP. We are proposing on the following specialty service areas for on-call, as-needed basis:

- Appraisal & Appraisal Review
- Acquisition
- Relocation
- Property Management - Interim and Full Scope
- Environmental Site Assessments - Phase I, Phase II, Asbestos, and Lead-Based Paint Surveys

EPIC's right of way team are currently performing appraisal and acquisition services for approximately 12 property owners for the City's Murrieta Hot Springs Road Improvement Project. This 15-acre project along Margarita Road to Winchester Road is part of the City's Capital Improvement Program (CIP).

Approach to Scope of Services

EPIC is prepared to resolve real property issues as they relate to the City's improvement projects as an on-call, right of way consultant. EPIC will perform all right of way and property acquisition services in close coordination with the City and in accordance with county, state, and federal policies and procedures wherever applicable including Title VI of the Civil Rights Act of 1964, the Federal Uniform Relocation Assistance and Real Property Acquisition Policies Act of 1970, as amended, and the URA regulations that became effective in February 2005.

A Right of Way Program Built for Federal-Aid Projects

Our services are guided by the Caltrans Right of Way Manual and Caltrans Local Assistance Procedures Manual (LAPM), ensuring meticulous documentation and rigorous protocol for clearing the project right of way. From the Notice to Proceed to Project Close-Out, our file documentation and project methodology adheres and conforms to these critical guidelines to protect public agency's funding sources. EPIC routinely supports Caltrans Right of Way Data Sheets, and Right of Way Certification, which require substantial knowledge of Caltrans District 8 procedures, forms and requirements. Under this contract, EPIC will provide comprehensive right of way and real property consulting, relocation, and property management services for the City of Riverside, as needed.

EPIC's comprehensive slate of services covers all phases of right of way, from project development through construction, in compliance with Caltrans and federal FHWA funding programs:

SCOPE OF SERVICES

STATEMENT OF UNDERSTANDING AND APPROACH

HLA's standard scope and approach in appraising the fixtures and equipment of businesses situated on properties to be acquired by public agencies are as follows:

- ✓ Upon commencement of the engagement, the real estate appraiser is contacted to discuss their approach to the property, as well as ours, in order to avoid duplication of compensation.
- ✓ At the earliest, as well as most appropriate time (which involves coordination with the client), contact letters are sent to the business owners to introduce ourselves, explain our function in the potential acquisition process and encourage their involvement in the appraisal process. Particularly as it pertains to identifying the fixtures and equipment owned and/or installed by the business. Follow-up calls are placed to arrange field visits.
- ✓ Upon arrival on-site, we interview the business owner and/or management regarding the history of the business and the tangible assets owned and request a tour of the facility.
- ✓ The bulk of our on-site visit consists of preparing an inventory of the improvements pertaining to the realty (trade fixtures) and movable equipment which we separate in our reports to assist in compensation versus relocation issues.
- ✓ Once the field work is complete we utilize generally accepted valuation methodology including primarily the cost approach and the market approach, to estimate the replacement cost new, fair market value in place and liquidation value of the appropriate items owned by each business.
- ✓ Finally, a narrative report is produced, including pictures. Before the report is delivered, we contact the real estate appraiser again to discuss our improvements list as a final reconciliation to avoid duplication of compensation.
- ✓ Additionally, HLA will coordinate appraisal activities with the client's other consultants, representatives and legal counsel during the appraisal process.

Hodges Lacey & Associates is a partnership of two, very experienced appraisers and we are very flexible and highly mobile in terms of availability and responsiveness to small and large projects alike.

Hodges Lacey & Associates, LLC's primary focus of business is providing fixtures and equipment appraisals for property acquisitions by public agencies. Within our appraisals, we separate improvements pertaining to the realty from movable equipment to better serve the client as well as the other consultants involved in the assignment. We also make great efforts to ascertain the ownership of assets. Aside from holding the designations of Accredited Senior Appraiser by the American Society of Appraisers (Machinery & Technical Specialties), we have many years of experience in the niche environment of working within the context of eminent domain and the complicated nuances of public agency property acquisitions. Michael Lacey's experience in real estate appraisal is a great asset to our technical knowledge when working in conjunction with real estate appraisers and sometimes needing to appraise major improvements on more complicated business occupied properties. We believe in proactive contact with all consultants involved in our assignments whether for technical interaction or the availability to be of assistance due to our intimate knowledge of the site.
