ECONOMIC UPDATE

Nonfarm Payroll (000's)

Source: US Department of Labor

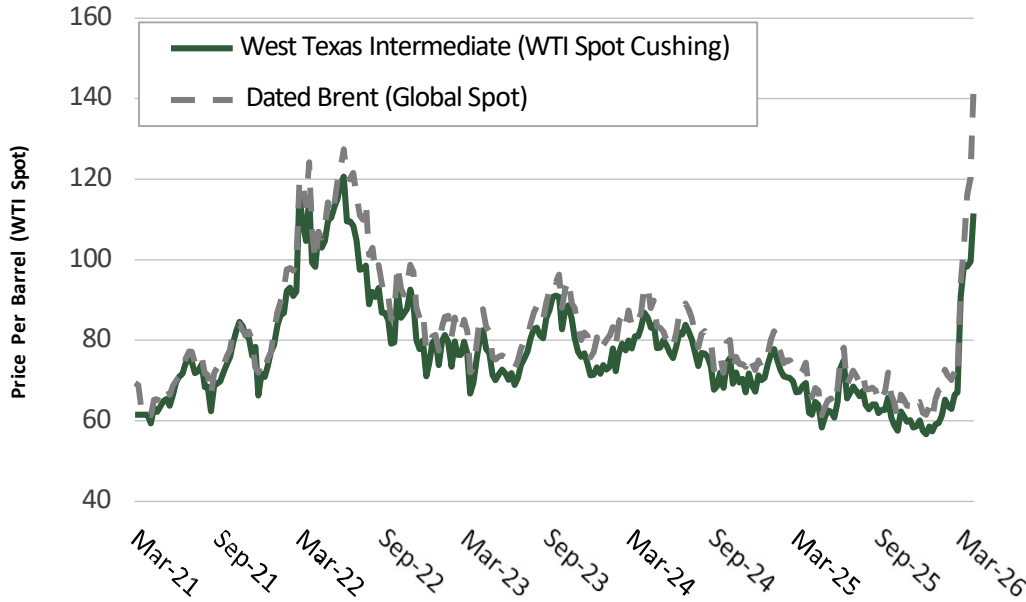

Unemployment Rate

Source: US Department of Labor

March nonfarm payrolls rose by 178,000, a decisive reversal from February’s revised 133,000 decline that had been distorted by a Kaiser Permanente strike affecting over 30,000 healthcare workers and severe winter weather. Healthcare contributed 76,000 positions as striking nurses returned, while construction and leisure rebounded from weather-induced troughs. The unemployment rate edged lower to 4.3%, though partly from a labor force reduction rather than a hiring acceleration. Meanwhile, the underemployment rate edged up to 8.0% from 7.9% in February. Average hourly earnings rose 0.2% over the month and 3.5% year over year—the slowest annual pace since May 2021.

Oil Prices

Source: Bloomberg Indices

US Fuel Prices

Source: American Automobile Association

U.S. energy markets proved volatile in March, as ongoing Middle East tensions pushed both Brent and WTI crude to a monthly high of \$113 per barrel before prices pulled back, with Brent settling near \$104 and WTI closing closer to \$92, offering consumers modest relief. Gasoline averaged \$3.96 per gallon nationally while diesel sat at \$5.38, with West Coast prices climbing above \$6.00. According to the U.S. Energy Information Administration's (EIA) March 2026 Short-Term Energy Outlook, domestic output averaged 13.6 million barrels per day, helping buffer Americans from more severe price swings. The EIA projected fuel costs to ease through the second half of 2026 as conditions stabilized. Whether geopolitical tensions will subside quickly enough to bring lasting relief remains uncertain, and only time will tell how 2026 unfolds.

Consumer Price Index (CPI)

Source: US Department of Labor

Personal Consumption Expenditures (PCE)

Source: US Department of Commerce

Consumer Price Index (CPI) for March surged 0.9%, the highest monthly rate since June 2022, and was up 3.3% on an annual basis primarily due to spikes in energy and airfare prices. Notably, Core CPI was little changed with a monthly increase of 0.2% and an annual rise of 2.6% as costs for services and other goods remained subdued. Personal Consumption Expenditures (PCE) were little changed in February, with the headline PCE Price Index up 0.4% month-over-month and 2.8% year-over-year. The Fed’s preferred metric, Core PCE, which excludes food and energy, rose 0.4% during the month and 3.0% from February of 2025.

IMPORTANT DISCLOSURES

2026 Chandler Asset Management, Inc, An Independent Registered Investment Adviser.

Information contained herein is confidential. Prices are provided by ICE Data Services Inc (“IDS”), an independent pricing source. In the event IDS does not provide a price or if the price provided is not reflective of fair market value, Chandler will obtain pricing from an alternative approved third party pricing source in accordance with our written valuation policy and procedures. Our valuation procedures are also disclosed in Item 5 of our Form ADV Part 2A.

Performance results are presented gross-of-advisory fees and represent the client’s Total Return. The deduction of advisory fees lowers performance results. These results include the reinvestment of dividends and other earnings. Past performance may not be indicative of future results. Therefore, clients should not assume that future performance of any specific investment or investment strategy will be profitable or equal to past performance levels. All investment strategies have the potential for profit or loss. Economic factors, market conditions or changes in investment strategies, contributions or withdrawals may materially alter the performance and results of your portfolio.

Index returns assume reinvestment of all distributions. Historical performance results for investment indexes generally do not reflect the deduction of transaction and/or custodial charges or the deduction of an investment management fee, the incurrence of which would have the effect of decreasing historical performance results. It is not possible to invest directly in an index.

Fixed income investments are subject to interest, credit and market risk. Interest rate risk: the value of fixed income investments will decline as interest rates rise. Credit risk: the possibility that the borrower may not be able to repay interest and principal. Low rated bonds generally have to pay higher interest rates to attract investors willing to take on greater risk. Market risk: the bond market in general could decline due to economic conditions, especially during periods of rising interest rates.

Ratings information have been provided by Moody’s, S&P and Fitch through data feeds we believe to be reliable as of the date of this statement, however we cannot guarantee its accuracy.

Security level ratings for U.S. Agency issued mortgage-backed securities (“MBS”) reflect the issuer rating because the securities themselves are not rated. The issuing U.S. Agency guarantees the full and timely payment of both principal and interest.

LGIP Yields: Reported yields for local government investment pools may be presented as either the 30-day yield or the monthly distribution yield, as applicable. For certain funds, the 30-day yield is calculated using reported daily yield data. Yield calculations are subject to change and may not be directly comparable across funds.

LAIF Yields: Additional Disclosure for CA Clients - As a result of a reporting lag from the Local Agency Investment Fund (LAIF), reported LAIF yields represent the most recently available Daily Effective Yield and may reflect data from approximately 7–10 days prior to month-end.
