BACKGROUND

1. On June 12, 2023, the Board approved a recommendation to the City Council to conceptually approve both the Water and Electric Five-Year Rate plans.
2. At the meeting, it was requested that staff return to the Board with alternative rate plan scenarios using the same rate design assumptions and underlying analysis in the respective cost of service analysis reports.

4

THE WHY

INCREASED POWER SUPPLY COSTS

Increased **construction/equipment costs**

Costs for natural gas have **doubled over the last two years**, due to increased liquid natural gas exports and restricted capacity on western interstate gas pipelines.

Costs for CAISO Market energy have **gone up 60%-80%**, due to increasing natural gas costs and supply-chain challenges delaying the development of new renewable resources.

THE WHY

Undesignated Reserves WITHOUT Rate Increases

THE WHY

Increased **construction/equipment costs**

The State of California drought messaging and increased Citywide water efficiency have decreased water revenue without decreasing operational costs

2011 – 2017 there were no rate increases resulting in a Water Fund Balance that **doesn't meet the minimum reserve levels** set by City Council without the line of credit.

THE WHY

Undesignated Reserves **WITHOUT** Rate Increases
