There is more in you

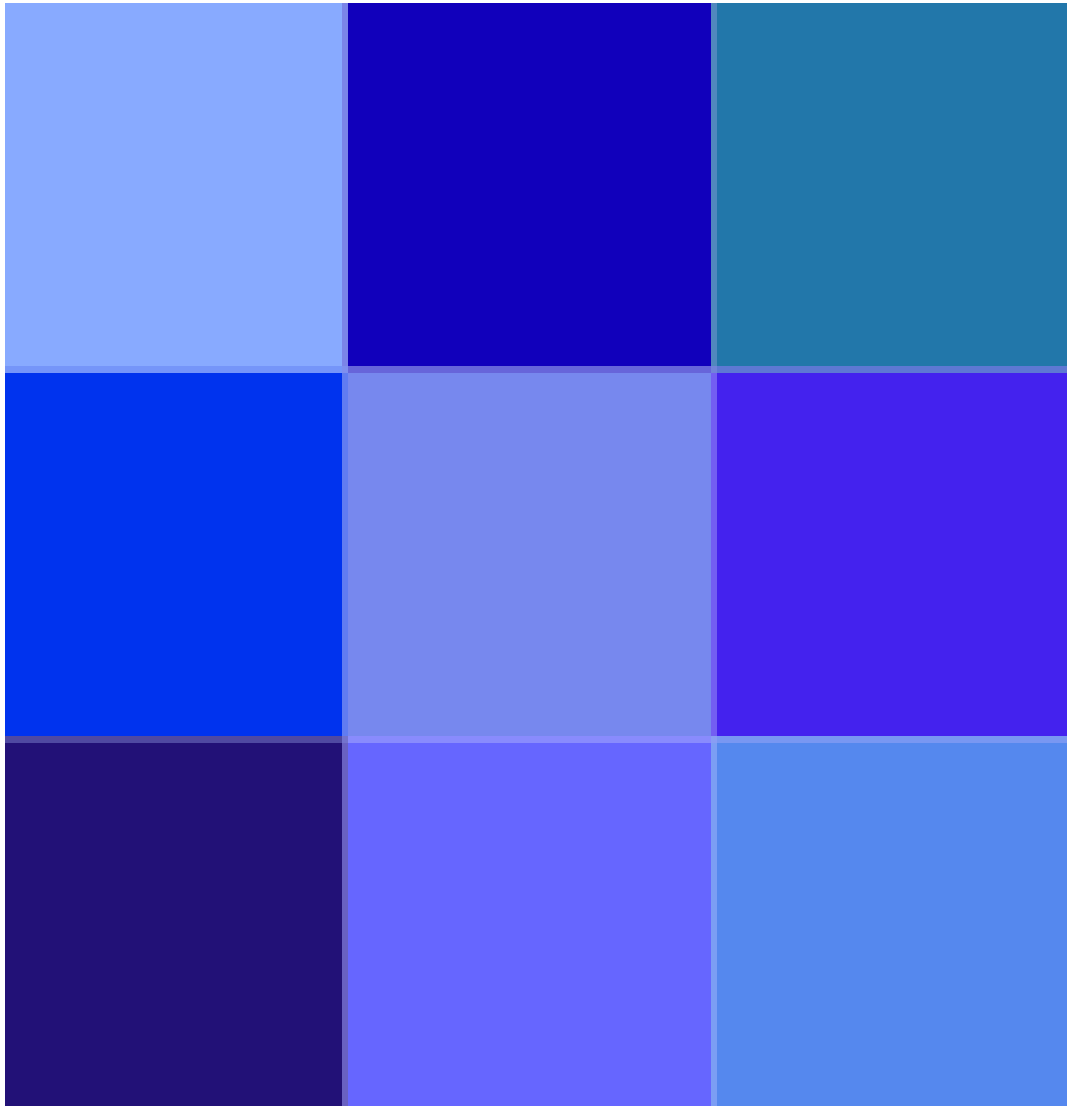

3540 12th Street, Riverside, CA 92501

We believe that everyone can live their best life.

We believe that everyone can be employed, no matter their disability.

- Our program helps people with disabilities successfully integrate into their communities.
- We help our clients understand their community (people)
- Make their dream life a reality
- Create an active and integrated lifestyle with people who do not have a disability
- Understand relationships and work relationships
- We prepare our people for the real world.

Our clients are referred to us by the regional center, which pays for our services.

We are working on ways to serve those who are not with the regional center but who would benefit from our services.

National Certification in Discovery & Customized Employment

How can every person with severe disabilities be employed?

Discovery is a process of learning all about the contributions of a person and translating them into job-related language.

We create a win-win situation by matching the individual contributions with the unmet needs of businesses. This is how we know that everyone with a disability can have a job they enjoy and matches them perfectly. The business wins because its needs are being met.

Informing Riverside Businesses

We want to have a relationship with Riverside businesses providing great employees to meet their unmet needs.

Our goal is to let Riverside businesses know there is a tremendous opportunity to meet their needs with our clients. It is a new way of hiring, as not all people with disabilities can not go through HR or the traditional interview/hiring process.

This is not a hand-out, but real jobs matching real skills with real work. They become a part of the company.
