NEXUS STUDY		

OVERVIEW OF NEXUS STUDY

- EPS's scope of work with the City includes the completion of a nexusbased affordable housing fee analysis
- Nexus-based analyses for affordable housing fees originated after the 2009 Palmer decision, which limited cities' ability to mandate inclusionary requirements on rental housing
- In 2017, State passed AB 1505, which clarified that cities may adopt inclusionary requirements for both ownership and rental residential developments
- Some cities still complete nexus studies to provide additional context in determining inclusionary requirements and related fees
 - Most legal opinions suggest that nexus findings are not required for adopting an inclusionary housing program

NEXUS-BASED HOUSING FEE METHODOLOGY Step #1 If negative Affordable Affordability Gap Analysis Affordability Unit Value by Development Costs | equals minus (Subsidy Required to Construct Gap Income Level No Subsidy Affordable Units) If positive Required Step #2 Total Workers to Workers' Total Affordable Housing Market Required Provide Goods Household Income Demand for Rate Home and Services by Demand Household Expenditures by Levels and Affordable (Generated by Market Rate Price Income Leve Expenditure Household Category Units for Housing) Formation Category Workers Step #3 Supportable Nexus-Based Affordability Demand for Affordable **Compute Impact** multiplied eauals Housing Fee Gap Units for Workers Fee per Market bv (Subsidy Required) (per market rate unit) (per market rate unit) **Rate Unit** Economic & Planning Systems EPS PPT Presentation | 5

STEP 1: CALCULATE AFFORDABILITY GAP

3-Story | Mid-Density | Multifamily Rental | Surface Parking

Item	Extremely Low Income (30% AMI)	Very Low Income (50% AMI)	Low Income (70% AMI)	Moderate Income (110% AMI)
Development Program Assumptions				
Density/Acre	32	32	32	32
Gross Unit Size	978	978	978	978
Net Unit Size	850	850	850	850
Number of Bedrooms	2	2	2	2
Number of Persons per 2-bedroom Unit	3	3	3	3
Parking Spaces/Unit	1.00	1.00	1.00	1.00
Cost Assumptions				
Land/Acre	\$435,600	\$435,600	\$435,600	\$435,600
Land/Unit	\$13,613	\$13,613	\$13,613	\$13,613
Direct Costs				
Direct Construction Costs/Net SF	\$205	\$205	\$205	\$205
Direct Construction Costs/Unit	\$200,000	\$200,000	\$200,000	\$200,000
Parking Construction Costs/Unit	\$5,000	\$5,000	\$5,000	\$5,000
Subtotal, Direct Costs/Unit	\$205,000	\$205,000	\$205,000	\$205,000
Indirect Costs as a % of Direct Costs	35%	35%	35%	35%
Indirect Costs/Unit	\$71,750	\$71,750	\$71,750	\$71,750
Developer Fee (% of all costs)	14%	14%	14%	14%
Fee Amount	\$40,651	\$40,651	\$40,651	\$40,651
Total Cost/Unit (rounded)	\$331,000	\$331,000	\$331,000	\$331,000
Maximum Supported Home Price				
Household Income	\$21,960	\$35,550	\$49,802	\$76,725
Income Available for Housing Costs/Year	\$6,588	\$10,665	\$14,941	\$23,018
(less) Operating Expenses per Unit/Year	(\$4,500)	(\$4,500)	(\$4,500)	(\$8,568)
Net Operating Income	\$2,088	\$6,165	\$10,441	\$14,450
Capitalization Rate	5.0%	5.0%	5.0%	5.0%
Total Supportable Unit Value	\$41,760	\$123,300	\$208,812	\$288,990
Affordability Gap		\$207,700	\$122,188	\$42,010

STEP 2: CALCULATE MINIMUM REQUIRED INCOME

\$30,584

Residential Type				Household Inco	ome Estimation			
Rental				Avg. Monthly Rent [1]	Monthly Utility Costs [2]	Monthly Rent and Utilities	Annual Rent and Utilities	Min. Required Income [3]
Apartment Unit				\$2,571	\$245	\$2,816	\$33,792	\$112,640
		_						
For-Sale	Unit Price [4]	Mortgage [5]	Mortgage Payment [5]	Property Taxes [6]	HOA Dues [7]	Home Insurance [8]	Utilities [2]	Min. Required Income [3]
Townhome	\$400,000	\$360,000	\$19,574	\$4,480	\$3,000	\$1,500	\$3,708	\$92,176

\$7,000

[1] Average monthly rent based on the rent of the apartment prototype in the feasibility study.

\$625,000

[2] Based on the Housing Authority of the County of Riverside Utility Allowance effective 7/1/2021 (assumes natural gas). [3] Assumes that housing costs is 30% of required income for rental units and 35% for for-sale units.

\$562,500

- [3] Assumes that modeing costs is 50% of required income for formal mine and 50% for forestermine.

 [4] Based on for-sale prices of prototypes in the feasibility study.

 [5] Based on mortgage terms of a 10% downpayment and 3.5% interest for 30 years per the assumptions of the feasibility study.

 [6] Based on a property tax rate of 1.1%

 [7] HOA dues are based on the feasibility study at a monthly rate of \$250 per townhome and \$175 per single family home.

 [8] Insurance fees are based on the feasibility study at a monthly rate of \$125 per unit.

Single Family

Inclusionary In-Lieu*	\$7,000	\$2.80	0.0%	0.0%	0.0%	5.0%	5.0%

13

Economic & Planning Systems

DISCUSSION OF INCLUSIONARY VS. NEXUS

- Inclusionary and Associated In-Lieu fees have great flexibility

- Case law supports inclusionary as a legitimate police power option
- Primary compliance is building units on-site, but can allow in-lieu fees and other methods
 - In-lieu/off-site option can be made more onerous to encourage on-site units
- City can adopt standards that fit their market conditions and policy goals
- Inclusionary Ordinance becomes part of Zoning Code

Nexus Findings

- Most legal opinions suggest that nexus findings are not required for inclusionary housing
- Primary compliance would be paying the fee, rather than building units
- Fee would be treated as impact fee subject to AB 1600, AB 602, etc.
- EPS results are same general magnitude but slightly different than inclusionary scenarios discussed to date

EPS Recommendation:

- Focus on inclusionary policy rather than nexus-based fee, but potentially use nexus findings to inform income levels in inclusionary policy

14

INCLUSIONARY HOUSING ORDINANCE

INCLUSIONARY REQUIREMENTS

What will be the inclusionary requirements (percentage of unit, affordability level) be for different residential development types?

Recommendation:

- Multifamily 10% of units affordable to low-income households (70% AMI)*
- ➤ High-Density Single Family (e.g. Townhomes) 10% of units affordable to low-income households (70% AMI)*
- > Low-Density Single Family 5% of units affordable to moderate-income households (110% AMI)

Economic & Planning Systems

EPS PPT Presentation | 16

16

EXEMPTIONS TO REQUIREMENT

Should there be projects that are exempt from the inclusionary requirement?

- Many cities exempt new residential projects under a certain unit size from inclusionary requirements (e.g. fewer than three units)
- Many cities exempt projects that are at a certain stage in the development process at the time of adoption of the inclusionary housing ordinance

Recommendation

- Exempt residential projects with fewer than three units from the inclusionary requirement.
- Exempt residential projects that have submitted a complete application by the effective date of the inclusionary ordinance.

Economic & Planning Systems

^{*}These requirements would automatically qualify projects for use of State density bonus

AFFORDABILITY TERM

What is the minimum term (in years) of affordability for units?

- For rental units, a typical affordability term is 55 years including in State density bonus law, although some cities have longer terms.
- For for-sale units, there are several options:
 - The City can set an affordability term for instance, 45 years and limit the re-sale of the unit to income-qualified households for the duration of that term
 - The City can set the affordability term to renew each time the unit is sold
 - The City can decline to set an affordability term, but rather require an "equity sharing agreement" on the unit.

Recommendation

- Set an affordability term of 55 years for rental units
- > Set an affordability term of 45 years for for-sale units, with renewal upon resale if within that period

Economic & Planning Systems EPS PPT Presentation | 18

18

SIZE OF AFFORDABLE UNITS

Can required affordable units be smaller than market-rate units?

- Many cities require that inclusionary affordable units should be similar to market-rate units in terms of finishes, features, and access to amenities
- Some do allow for developers to build affordable units that are slightly smaller (e.g., 10 percent smaller) than the average market-rate unit.

Recommendation

- For multifamily rental projects, require on-site or off-site affordable units to reflect the mix of market-rate units (e.g., same proportion of one-bedrooms, two-bedrooms, etc.) and have net leasable areas of at least 90 percent of the average size of the market-rate units of similar bedroom counts.
- For single family for-sale projects, see next topic.

Economic & Planning Systems EPS PPT Presentation | 19

ALTERNATIVES FOR FOR-SALE PROJECT COMPLIANCE

Can for-sale projects meet their inclusionary requirement by developing affordable *rental* units?

- Some cities allow or even require this because it is considered more feasible and meets a market need
 - The number of affordable rental units can equal the number of affordable for-sale units that the developer would have been required to build; OR
 - The number of affordable rental bedrooms can equal the number of affordable for-sale bedrooms that the developer would have been required to build

Recommendation

- Allow for-sale projects to meet their inclusionary requirement by building affordable rental units on the same site as or within proximity of the primary market-rate project.
- Allow the requirement to be met by providing the required number of affordable *bedrooms* in any configuration, rather than the required number of units similar in size to the market-rate units.

Economic & Planning Systems

EPS PPT Presentation | 20

20

OFF-SITE AFFORDABLE UNITS

Can projects meet their inclusionary requirement by providing affordable units off-site?

- Some cities have higher inclusionary requirement for off-site units (e.g., 10% on-site, 13% off-site)
- Some cities require that off-site units are within a maximum distance of the market-rate project and not in an area with "overconcentration" of existing affordable units

Recommendation

- Allow for developers to meet their inclusionary requirement by providing affordable units off-site, and require the number of off-site affordable units be equivalent to a higher proportion of market-rate units than if built on-site.
- Define a maximum distance from the market-rate project site for off-site units
- Develop a definition of overconcentration and restrict the development of off-site affordable units to prevent such overconcentration.

Economic & Planning Systems

IN-LIEU FEE

Are there any limitations on when a project can pay an in-lieu fee instead of providing on-site or off-site units?

- While some cities allow for any residential market-rate project to pay an inlieu fee instead of providing affordable units, others place limitations on when an in-lieu fee can paid. Some common limitations include:
 - In-lieu fee can only be paid on fractional required affordable units
 - In-lieu fee can only be paid by projects of a particular size or type
- City can set the in-lieu fee at a level that would incentivize the development of affordable units rather than payment of the fee.

Recommendation

Allow payment of an in-lieu fee only for fractional units required for multifamily and single-family attached projects, but allow in-lieu fees for all inclusionary units required for single-family detached projects of any size.

Economic & Planning Systems

EPS PPT Presentation | 22

22

OTHER ALTERNATIVE MEANS OF COMPLIANCE

What other alternative means of compliance will the City allow?

- Besides the in-lieu fee, other common alternative means of compliance include:
 - Land dedication, often within a certain distance of the market-rate project
 - Acquisition and rehabilitation of existing units to be rented or sold at affordable levels
 - Extension of affordability covenants on existing affordable units
- These alternative means are often allowed on a discretionary basis

Recommendation

Allow developers to propose an alternative means of compliance, subject to Council findings that the alternative provides equal or greater value relative to the standard inclusionary requirements.

24

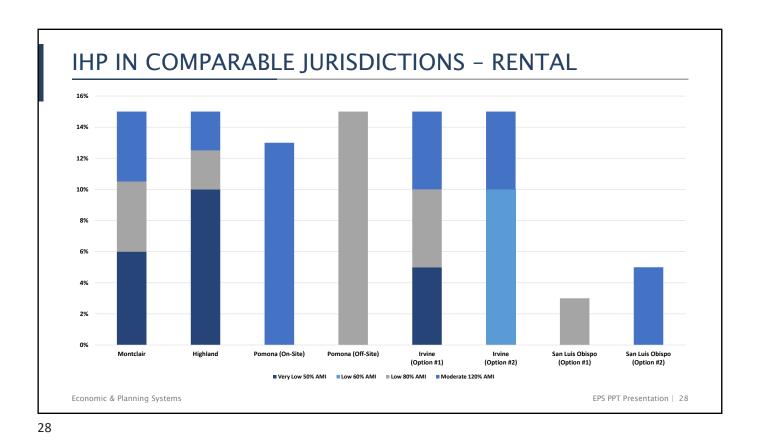

COMMITTEE RECOMMENDATIONS

- Receive an update on the Inclusionary Housing Program Study for the City of Riverside, including preliminary recommendations on elements of a potential inclusionary housing ordinance; and
- Provide direction on how to proceed with elements of the Inclusionary Housing Ordinance

Economic & Planning Systems

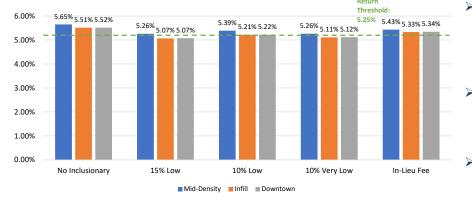

INCLUSIONARY SCENARIOS - RENTAL

- Scenarios for multifamily rental include:
 - 15% and 10% of units for low-income households
 - 10% of units for very low-income households
 - In-lieu fee on 10% low-income requirement (~\$13,000 per market rate unit)

- Higher density projects achieve lower return on cost, and options for including affordable units are limited
- Mid-density projects have more room to feasibly include affordable units
 - Payment of in-lieu fee is a feasible option

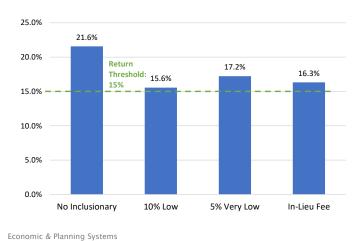

EPS PPT Presentation | 29

29

Economic & Planning Systems

INCLUSIONARY SCENARIOS - FOR SALE TOWNHOMES

- Scenarios for for-sale townhomes include:
 - 10% of units for low-income households
 - 5% of units for very low-income households
 - In-lieu fee on 10% low-income requirement (~\$17,000 per market rate unit)

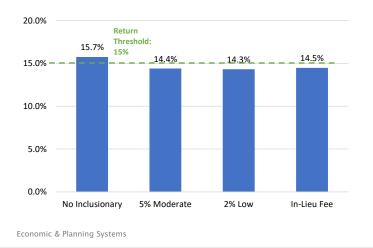

- Townhome projects achieve yield on cost well above threshold without affordable units
- Both inclusionary scenarios and payment of in-lieu fee would still produce a feasible yield on cost

EPS PPT Presentation | 30

30

INCLUSIONARY SCENARIOS - FOR SALE SINGLE FAMILY

- Scenarios for single family detached homes include:
 - 5% of units for moderate-income households
 - 2% of units for very low-income households
 - In-lieu fee on 5% moderate-income requirement (~\$7,000 per market rate unit)

- Single family projects just barely achieve profit margin threshold without affordable units
- Both affordable scenarios and payment of the in-lieu fee would produce a barely feasible profit

EPS PPT Presentation | 31
