##### Section 6.27.010 Findings.

The City Council of the City of Riverside finds as follows:

A. Since 1964, approximately 2.5 million nonsmokers have died from health problems caused by exposure to secondhand smoke. Secondhand smoke is responsible for an estimated 41,300 heart disease-related and lung cancer-related deaths among adult nonsmokers each year in the United States<sup>1</sup>. Secondhand smoke kills more than 400 infants every year<sup>2</sup>. Secondhand smoke exposure adversely affects fetal growth with an increased risk of low birth weight and of Sudden Infant Death Syndrome in infants of mothers who smoke<sup>3</sup>. Just 30 minutes of exposure to secondhand smoke is sufficient to damage blood vessels in a healthy nonsmoker<sup>4</sup>.

B. Secondhand aerosol emitted from electronic smoking devices has been identified as a health hazard<sup>5,6,7</sup> as evidenced by research finding at least ten chemicals known to the State of

When a Person brings an action solely on behalf of the general public, nothing about such an action shall act to preclude or bar the Person from bringing a subsequent action based upon the same facts but seeking relief on his, her or its own behalf.

D. Nothing in this Chapter shall prohibit a Person from bringing a civil action in small claims court to enforce this Chapter, so long as the amount in demand and the type of relief sought are within the jurisdiction of that court.

E. No Person may bring an action pursuant to this section unless that Person has first made a good faith attempt to resolve the situation informally with the offending person, including written notice of this section to the offending party and a written request to cease smoking in the multi-unit residence at least thirty (30) days before filing suit.

#### **6.27.080 Limitations and exceptions.**
