DISCUSSION:

Project Description

The applicant is requesting approval of entitlements to facilitate construction of a 3,648 square foot automated vehicle wash facility (Quick Quack). The proposed vehicle wash facility consists of a one-story building with a single vehicle wash tunnel, an electrical room, equipment room, restroom, employee lounge, fire riser room, storage closet, office, and a quarterback station. Seventeen covered vacuum positions and three employee parking spaces are provided east of the vehicle wash tunnel. The vacuum canopies are comprised of metal support structures with a metal panel shade structure painted to complement the building. The vertical posts will be wrapped with stone to complement the building.

Three 12-foot-wide queueing lanes with a combined length of approximately 312 feet, located on east of the vehicle wash tunnel, are provided to accommodate 15 vehicles. Access to the vehicle wash facility will be provided from Mission Grove Parkway and East Alessandro Boulevard.

The conceptual landscape design features a variety of trees and water-efficient shrubs and ground cover plants around property lines and landscape planters interior to the site. A 3-foot-high decorative masonry wall, with a wooden pergola, is proposed behind the required 10-foot landscape setback and in front of the car wash tunnel to screen view of the wash tunnel from East Alessandro Boulevard.

The facility is proposed to operate seven days a week from 7:00 a.m. to 7:00 p.m. and from 7:00 a.m. to 9:00 p.m. during the summer. Implementation of this proposed project requires:

- General Plan Amendment: To amend the land use designation from O – Office to C – Commercial;
- Zoning Code Amendment: To change the zone from O – Office Zone to CR – Commercial Retail Zone;
- Conditional Use Permit: To permit an automated vehicle wash facility;
- Variance: To allow an 8-foot-high perimeter wall along the north and west property lines, where 6-foot-high solid walls are allowed by the Zoning Code; and
- Design Review: Site design and building elevations.
