## Notes:

- 1. The Approving or Appeal Authority may allow a development project to exceed a maximum FAR when findings can be made that such project (a) will not have a detrimental effect on infrastructure and municipal services, (b) will not adversely impact the surrounding neighborhood, and (c) will not likely set a precedent for additional development that would adversely affect infrastructure, service or surrounding land uses.
- 2. Smaller minimum lot areas may be established by a specific plan or master plan in the BMP Zone. A master plan must include provisions for common access, parking and maintenance. A total master plan area of five acres is required. Site plan review approval by the Community & Economic Development Director or his/her designee is required for any master plan.
- 3. See Chapter 19.149 Airport Land Use Compatibility to determine if a project site is subject to Airport Land Use Compatibility Plan requirements.
- 4. In the BMP Zone, off-street parking, gate or guard houses, roofs or canopies covering unenclosed pedestrian walks and walls or fences not more than six feet in height shall be permitted in the rear 30 feet of the required 50-foot front yard setback.
- 5. A minimum front yard setback of 50 feet shall be required and maintained wherever a lot or parcel in any industrial zone abuts or is adjacent to a lot or parcel in any residential zone or use.
- 6. Except where the site is separated from such residential zone or use by a freeway.
- 7. Measured from the residential zone or property line to the industrial building.
