

PETITION FOR REMOVAL OF PREFERENTIAL PARKING ZONE

ADVANTAGES / DISADVANTAGES OF REMOVING PREFERENTIAL PARKING ZONES:

Advantages:

- Residents and their guests will not be required to display permits to legally park
- Arrangements for special events with multiple guests will not be required

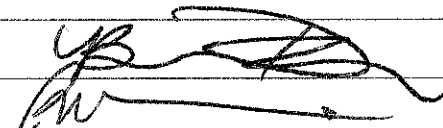

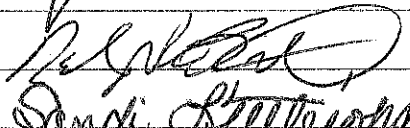

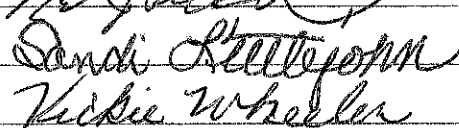

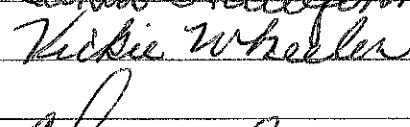

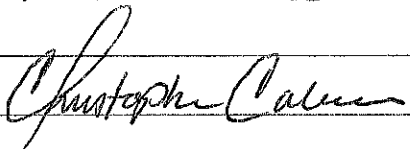

Disadvantages:

- Long-term parking by non-residents, students, and/or business patrons may filter into the residential area
- The amount of on-street parking available to residents and their guests may decrease
- Litter, noise and traffic created by non-residents may increase

We the undersigned request that the City of Riverside remove the existing "No Parking between the hours of 3:00 a.m. to 3:00 p.m. Monday through Friday except holidays, except residents with permits" Preferential Parking Zone (PPZ) on both sides of Abilene Road from Cimarron Road to the north side of Shenandoah Road. By our signature we verify that we agree to the request for removal of the existing Preferential Parking Zone which was previously implemented and is no longer needed. We understand that removal of the zone may result in overflow long-term parking from non-residents, nearby school, businesses, neighborhoods, or other outside sources onto our street. We further understand that on-street parking within this segment will no longer be restricted to residents and their guests only and become open to all legally parked vehicles.
