

Attachment 2:

Commercial Electric Rebate Programs:

1. Air Conditioning Incentives – Rebates for replacement of energy efficient AC units
2. Energy Star Appliances – Rebates for purchase of Energy Star rated refrigerators, dishwashers, commercial clothes washers, solid door refrigerator/freezer, ceiling fans and televisions.
3. Lighting Incentives – Rebates for kWh savings on installation of more energy efficient lighting and controls.
4. Tree Power – Rebates for purchase and planting of up to 5 qualifying shade trees per year.
5. Weatherization – Rebates for installation of insulation, window film and cool roofs.
6. Performance Based Incentive – Rebates for customers who can demonstrate a kWh savings based on customer energy-efficiency measures.
7. Commercial Food Service Program – This program is specifically targeted to commercial food service customers such as restaurants, hospitality providers, institutional, medical/hospitals, schools and government customers. The program is offered in conjunction with Southern California Gas Company and provides customers with a comprehensive facility audit offering recommendations on specific energy efficiency measures, estimated return on investment and applicable utility incentives. In FY 14/15 over 30 businesses participated in the program and many were referred to the KYC Program.
8. Key Account Energy Efficiency Program (KEEP) – This program is targeted to RPU's largest Time of Use Customers and is intended to provide these Key Account customers with a comprehensive energy efficiency plan including a priority list of recommended energy efficiency measures along with an estimated return on investment and applicable utility incentives.
9. Upstream HVAC Rebate Program – This program offers a rebate incentive that is provided upstream at the wholesale distribution channel level, thereby encouraging distributors to stock and sell more efficient HVAC equipment.
10. Energy Management Systems – Rebates for the purchase and installation of energy management systems for monitoring and controlling facility energy load.
11. New Construction and LEED Construction Incentives – Rebates for energy savings exceeding Title 24 standards for new construction projects pre-approved by RPU.
12. Pool and Spa Pump Incentive – Rebates for purchase of qualifying multi-flow or variable speed high-efficiency pumps and motors.
13. Premium Motor Incentive – Rebates for the purchase of premium high efficiency electric motors
14. Thermal energy Storage Incentives – Feasibility study and incentives available for use of thermal energy storage based on program guidelines.
15. Ice Energy Thermal Energy Storage Pilot Program – This is a combined thermal energy storage program and energy efficiency program that replaces old HVAC equipment with new energy efficiency equipment installed concurrently with Ice Bear thermal energy storage equipment.
16. Small Business Direct Installation (SBDI) Program – This program provides small and medium sized businesses with energy audits and direct installation of energy efficiency measures such as lighting upgrades and controls, HVAC tune-ups, exit and open/closed signs and weatherization measures.
17. Keep Your Cool (KYC) Program – The program offers the direct installation of energy efficiency measures such as air curtains, cooler gaskets, automatic door closures,

LED case lighting retrofits and high efficiency motor upgrades to small businesses such as mini-marts, delis, convenient stores and restaurants.

18. Demand Response – RPU continues to manage a highly successful voluntary demand response program. This program, known as Power Partners, was developed in partnership with RPU's - A131 - largest commercial customers. These important Key Account customers agree to voluntarily shed or shift a combined total of 11 MW of electric load during the peak summer months from June to September if it is deemed necessary to call on this resource by RPU in cooperation with the CAISO.
19. GreenLite LED Retail Buy-down Program – This program was created in FY 14/15 and implemented in FY 15/16. RPU uses Public Benefit Funding to contract with GreenLite to buydown the retail cost of certain LED bulbs at participating local retailers to incentivize customers to purchase and install these high efficiency lighting products in their homes and businesses.
