

Magnolia Avenue Techite Pipe and Pressure Reducing Station Replacement Project – Supplemental Appropriation

Riverside Public Utilities

Board of Public Utilities
February 26, 2018

RiversideCA.gov

BACKGROUND

1. Techite pipe is a composite of fiberglass, polyester resin and sand.
2. Pipe is associated with an increased frequency of breaks and leaks.
3. RPU has begun replacing segments of Techite pipe with steel CML&C pipe.
4. Approximately 4.4 miles of Techite remaining in RPU's system.

2

DISCUSSION

1. Funding for project is currently included in proposed fiscal year 2018-2019 budget as part of RPU's Utility 2.0 – Modified Option 1 Capital Improvement Program
2. In order to accommodate Public Works' construction schedule for construction and perform RPU's pipeline system connections, construction will need to begin early summer 2018.
3. Supplemental appropriation in the amount of \$5,216,000 needed to fully fund project design and construction to allow project to be advertised, bid, and awarded in time to start construction in the current fiscal year.

8

RiversideCA.gov

DISCUSSION (CONT.)

4. Overall project cost for Techite Pipeline and Pressure Reducing Station is estimated at \$5,700,000.
5. Detailed breakdown of project costs along with recommendation to award the overall construction contract will be brought before RPU Board in the spring 2018 timeframe.

RECOMMENDATIONS

That the Board of Public Utilities recommend that the City Council:

1. Authorize a supplemental appropriation in the amount of \$5,216,000 from the Water Fund Balance to fund the design and construction of the Magnolia Avenue Techite Pipe and Pressure Reducing Station Replacement Project; and
2. Appropriate expenditures in the amount of \$4,646,000 to the Public Utilities' Transmission Mains Account No. 6230000-470735 for pipeline construction, and in the amount of \$570,000 to the Public Utilities' Facility Rehabilitation Account No. 6230000-470803 for the design and construction of the pressure reducing station.
