RE: PLANNING CASE P14-1033 & P14-1034
PROPOSED 308,000 SQUARE-FOOT WAREHOUSE AND LOT MERGER
FOR 15.9 ACRES ON PLACENTIA LANE NEAR ORANGE STREET

We, the undersigned citizens of the City of Riverside, oppose the proposed warehouse cited above, to be located directly across Placentia Lane from the Ab Brown Sports Complex and in close proximity to the old Riverside Golf Course, Reid Park, residential properties and local businesses in the Northside Neighborhood.

We believe that although the proposed warehouse is consistent with current zoning under the city's Municipal Code, it is nevertheless incompatible with existing land uses in this still viable rural residential area whose agricultural heritage goes back 200 years. Construction of a warehouse at this location or anywhere else in the Northside would set a precedent that would destroy the Northside's quality of life.

We believe this case should not be decided without a public hearing or an Environmental Impact report for the following reasons:

- 1) The proposed site is subject to flooding because it is located in the Santa Ana River flood plain which is only partially protected by the levee;
- 2) The proposed warehouse would bring truck traffic from Main Street to the west, the 91 freeway from Center and Columbia to the east, and the 60 freeway from Main and Orange to the south onto narrow rural streets in neighborhoods that would be severely harmed by these encroachments;
- 3) The truck traffic would not only generate harmful fumes along surface streets but also while idling their engines when doing business at the warehouse, a circumstance that would reverse the good air quality currently created by the grass and trees at the Ab Brown Sports Complex, old Riverside Golf Course and Reid Park;
- 4) The same truck traffic would also generate an undesirable level of noise that would have a negative effect on quality of life in the Northside;
- 5) The proposed site, like many other places in the Northside, may have significant archeological value to the people of Riverside.

We wish to appeal this case to the Planning Commission or City Council so that these matters and others pertaining to this proposal may be deliberated at a public hearing.

PLANNING DIVISION:

RE: PLANNING CASE P14-1033 & P14-1034
PROPOSED 308,000 SQUARE-FOOT WAREHOUSE AND LOT MERGER
FOR 15.9 ACRES ON PLACENTIA LANE NEAR ORANGE STREET

We, the undersigned citizens of the City of Riverside, oppose the proposed warehouse cited above, to be located directly across Placentia Lane from the Ab Brown Sports Complex and in close proximity to the old Riverside Golf Course, Reid Park, residential properties and local businesses in the Northside Neighborhood.

We believe that although the proposed warehouse is consistent with current zoning under the city's Municipal Code, it is nevertheless incompatible with existing land uses in this still viable rural residential area whose agricultural heritage goes back 177 years. Construction of a warehouse at this location or anywhere else in the Northside would set a precedent that would destroy the Northside's quality of life.

We believe this case should not be decided without a public hearing or an Environmental Impact report for the following reasons:

- 1) The proposed site is subject to flooding because it is located in the Santa Ana River flood plain which is only partially protected by the levee;
- 2) The proposed warehouse would bring truck traffic from Main Street to the west, the 91 freeway from Center and Columbia to the east, and the 60 freeway from Main and Orange to the south onto narrow rural streets in neighborhoods that would be severely harmed by these encroachments;
- 3) The truck traffic would not only generate harmful fumes along surface streets but also while idling their engines when doing business at the warehouse, a circumstance that would reverse the good air quality currently created by the grass and trees at the Ab Brown Sports Complex, old Riverside Golf Course and Reid Park;
- 4) The same truck traffic would also generate an undesirable level of noise that would have a negative effect on quality of life in the Northside;
- 5) The proposed site, like many other places in the Northside, may have significant archeological value to the people of Riverside.

We wish to appeal this case to the Planning Commission or City Council so that these matters and others pertaining to this proposal may be deliberated at a public hearing.

RE: PLANNING CASE P14-1033 & P14-1034
PROPOSED 308,000 SQUARE-FOOT WAREHOUSE AND LOT MERGER
FOR 15.9 ACRES ON PLACENTIA LANE NEAR ORANGE STREET

We, the undersigned citizens of the City of Riverside, oppose the proposed warehouse cited above, to be located directly across Placentia Lane from the Ab Brown Sports Complex and in close proximity to the old Riverside Golf Course, Reid Park, residential properties and local businesses in the Northside Neighborhood.

We believe that although the proposed warehouse is consistent with current zoning under the city's Municipal Code, it is nevertheless incompatible with existing land uses in this still viable rural residential area whose agricultural heritage goes back 177 years. Construction of a warehouse at this location or anywhere else in the Northside would set a precedent that would destroy the Northside's quality of life.

We believe this case should not be decided without a public hearing or an Environmental Impact report for the following reasons:

- 1) The proposed site is subject to flooding because it is located in the Santa Ana River flood plain which is only partially protected by the levee;
- 2) The proposed warehouse would bring truck traffic from Main Street to the west, the 91 freeway from Center and Columbia to the east, and the 60 freeway from Main and Orange to the south onto narrow rural streets in neighborhoods that would be severely harmed by these encroachments;
- 3) The truck traffic would not only generate harmful fumes along surface streets but also while idling their engines when doing business at the warehouse, a circumstance that would reverse the good air quality currently created by the grass and trees at the Ab Brown Sports Complex, old Riverside Golf Course and Reid Park;
- 4) The same truck traffic would also generate an undesirable level of noise that would have a negative effect on quality of life in the Northside;
- 5) The proposed site, like many other places in the Northside, may have significant archeological value to the people of Riverside.

We wish to appeal this case to the Planning Commission or City Council so that these matters and others pertaining to this proposal may be deliberated at a public hearing.

RE: PLANNING CASE P14-1033 & P14-1034
PROPOSED 308,000 SQUARE-FOOT WAREHOUSE AND LOT MERGER
FOR 15.9 ACRES ON PLACENTIA LANE NEAR ORANGE STREET

We, the undersigned citizens of the City of Riverside, oppose the proposed warehouse cited above, to be located directly across Placentia Lane from the Ab Brown Sports Complex and in close proximity to the old Riverside Golf Course, Reid Park, residential properties and local businesses in the Northside Neighborhood.

We believe that although the proposed warehouse is consistent with current zoning under the city's Municipal Code, it is nevertheless incompatible with existing land uses in this still viable rural residential area whose agricultural heritage goes back 177 years. Construction of a warehouse at this location or anywhere else in the Northside would set a precedent that would destroy the Northside's quality of life.

We believe this case should not be decided without a public hearing or an Environmental Impact report for the following reasons:

- 1) The proposed site is subject to flooding because it is located in the Santa Ana River flood plain which is only partially protected by the levee;
- 2) The proposed warehouse would bring truck traffic from Main Street to the west, the 91 freeway from Center and Columbia to the east, and the 60 freeway from Main and Orange to the south onto narrow rural streets in neighborhoods that would be severely harmed by these encroachments;
- 3) The truck traffic would not only generate harmful fumes along surface streets but also while idling their engines when doing business at the warehouse, a circumstance that would reverse the good air quality currently created by the grass and trees at the Ab Brown Sports Complex, old Riverside Golf Course and Reid Park;
- 4) The same truck traffic would also generate an undesirable level of noise that would have a negative effect on quality of life in the Northside;
- 5) The proposed site, like many other places in the Northside, may have significant archeological value to the people of Riverside.

We wish to appeal this case to the Planning Commission or City Council so that these matters and others pertaining to this proposal may be deliberated at a public hearing.

We believe this case should not be decided without a public hearing or an Environmental Impact report for the following reasons:

- 1) The proposed site is subject to flooding because it is located in the Santa Ana River flood plain which is only partially protected by the levee;
- 2) The proposed warehouse would bring truck traffic from Main Street to the west, the 91 freeway from Center and Columbia to the east, and the 60 freeway from Main and Orange to the south onto narrow rural streets in neighborhoods that would be severely harmed by these encroachments;
- 3) The truck traffic would not only generate harmful fumes along surface streets but also while idling their engines when doing business at the warehouse, a circumstance that would reverse the good air quality currently created by the grass and trees at the Ab Brown Sports Complex, old Riverside Golf Course and Reid Park;
- 4) The same truck traffic would also generate an undesirable level of noise that would have a negative effect on quality of life in the Northside;
- 5) The proposed site, like many other places in the Northside, may have significant archeological value to the people of Riverside.

We wish to appeal this case to the Planning Commission or City Council so that these matters and others pertaining to this proposal may be deliberated at a public hearing.

RE: PLANNING CASE P14-1033 & P14-1034
PROPOSED 308,000 SQUARE-FOOT WAREHOUSE AND LOT MERGER
FOR 15.9 ACRES ON PLACENTIA LANE NEAR ORANGE STREET

We, the undersigned citizens of the City of Riverside, oppose the proposed warehouse cited above, to be located directly across Placentia Lane from the Ab Brown Sports Complex and in close proximity to the old Riverside Golf Course, Reid Park, residential properties and local businesses in the Northside Neighborhood.

We believe that although the proposed warehouse is consistent with current zoning under the city's Municipal Code, it is nevertheless incompatible with existing land uses in this still viable rural residential area whose agricultural heritage goes back 200 years. Construction of a warehouse at this location or anywhere else in the Northside would set a precedent that would destroy the Northside's quality of life.

We believe this case should not be decided without a public hearing or an Environmental Impact report for the following reasons:

- 1) The proposed site is subject to flooding because it is located in the Santa Ana River flood plain which is only partially protected by the levee;
- 2) The proposed warehouse would bring truck traffic from Main Street to the west, the 91 freeway from Center and Columbia to the east, and the 60 freeway from Main and Orange to the south onto narrow rural streets in neighborhoods that would be severely harmed by these encroachments;
- 3) The truck traffic would not only generate harmful fumes along surface streets but also while idling their engines when doing business at the warehouse, a circumstance that would reverse the good air quality currently created by the grass and trees at the Ab Brown Sports Complex, old Riverside Golf Course and Reid Park;
- 4) The same truck traffic would also generate an undesirable level of noise that would have a negative effect on quality of life in the Northside;
- 5) The proposed site, like many other places in the Northside, may have significant archeological value to the people of Riverside.

We wish to appeal this case to the Planning Commission or City Council so that these matters and others pertaining to this proposal may be deliberated at a public hearing.

We, the undersigned citizens of the City of Riverside, oppose the proposed warehouse cited above, to be located directly across Placentia Lane from the Ab Brown Sports Complex and in close proximity to the old Riverside Golf Course, Reid Park, residential properties and local businesses in the Northside Neighborhood.

We believe that although the proposed warehouse is consistent with current zoning under the city's Municipal Code, it is nevertheless incompatible with existing land uses in this still viable rural residential area whose agricultural heritage goes back 200 years. Construction of a warehouse at this location or anywhere else in the Northside would set a precedent that would destroy the Northside's quality of life.

We believe this case should not be decided without a public hearing or an Environmental Impact report for the following reasons:

- 1) The proposed site is subject to flooding because it is located in the Santa Ana River flood plain which is only partially protected by the levee;
- 2) The proposed warehouse would bring truck traffic from Main Street to the west, the 91 freeway from Center and Columbia to the east, and the 60 freeway from Main and Orange to the south onto narrow rural streets in neighborhoods that would be severely harmed by these encroachments;
- 3) The truck traffic would not only generate harmful fumes along surface streets but also while idling their engines when doing business at the warehouse, a circumstance that would reverse the good air quality currently created by the grass and trees at the Ab Brown Sports Complex, old Riverside Golf Course and Reid Park;
- 4) The same truck traffic would also generate an undesirable level of noise that would have a negative effect on quality of life in the Northside;
- 5) The proposed site, like many other places in the Northside, may have significant archeological value to the people of Riverside.

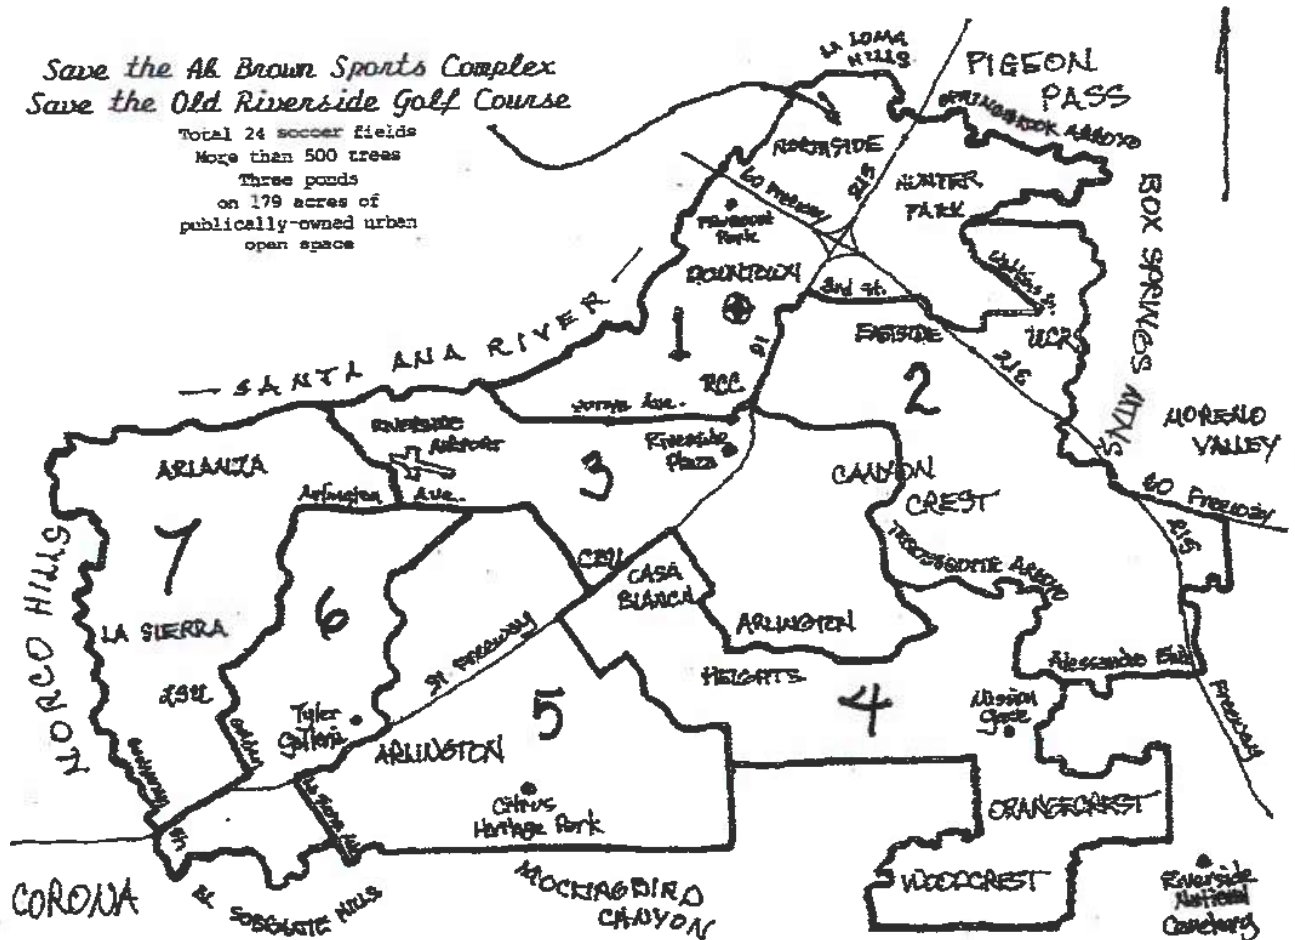

We wish to appeal this case to the Planning Commission or City Council so that these matters and others pertaining to this proposal may be deliberated at a public hearing.

RE: PLANNING CASE P14-1033 & P14-1034
PROPOSED 308,000 SQUARE-FOOT WAREHOUSE AND LOT MERGER
FOR 15.9 ACRES ON PLACENTIA LANE NEAR ORANGE STREET

We, the undersigned citizens of the City of Riverside, oppose the proposed warehouse cited above, to be located directly across Placentia Lane from the Ab Brown Sports Complex and in close proximity to the old Riverside Golf Course, Reid Park, residential properties and local businesses in the Northside Neighborhood.

We believe that although the proposed warehouse is consistent with current zoning under the city's Municipal Code, it is nevertheless incompatible with existing land uses in this still viable rural residential area whose agricultural heritage goes back 200 years. Construction of a warehouse at this location or anywhere else in the Northside would set a precedent that would destroy the Northside's quality of life.

We believe this case should not be decided without a public hearing or an Environmental Impact report for the following reasons:

- 1) The proposed site is subject to flooding because it is located in the Santa Ana River flood plain which is only partially protected by the levee;

RE: PLANNING CASE P14-1033 & P14-1034
PROPOSED 308,000 SQUARE-FOOT WAREHOUSE AND LOT MERGER
FOR 15.9 ACRES ON PLACENTIA LANE NEAR ORANGE STREET

We, the undersigned citizens of the City of Riverside, oppose the proposed warehouse cited above, to be located directly across Placentia Lane from the Ab Brown Sports Complex and in close proximity to the old Riverside Golf Course, Reid Park, residential properties and local businesses in the Northside Neighborhood.

We believe that although the proposed warehouse is consistent with current zoning under the city's Municipal Code, it is nevertheless incompatible with existing land uses in this still viable rural residential area whose agricultural heritage goes back 200 years. Construction of a warehouse at this location or anywhere else in the Northside would set a precedent that would destroy the Northside's quality of life.

We believe this case should not be decided without a public hearing or an Environmental Impact report for the following reasons:

- 1) The proposed site is subject to flooding because it is located in the Santa Ana River flood plain which is only partially protected by the levee;
- 2) The proposed warehouse would bring truck traffic from Main Street to the west, the 91 freeway from Center and Columbia to the east, and the 60 freeway from Main and Orange to the south onto narrow rural streets in neighborhoods that would be severely harmed by these encroachments;
- 3) The truck traffic would not only generate harmful fumes along surface streets but also while idling their engines when doing business at the warehouse, a circumstance that would reverse the good air quality currently created by the grass and trees at the Ab Brown Sports Complex, old Riverside Golf Course and Reid Park;
- 4) The same truck traffic would also generate an undesirable level of noise that would have a negative effect on quality of life in the Northside;
- 5) The proposed site, like many other places in the Northside, may have significant archeological value to the people of Riverside.

We wish to appeal this case to the Planning Commission or City Council so that these matters and others pertaining to this proposal may be deliberated at a public hearing.

RE: PLANNING CASE P14-1033 & P14-1034
PROPOSED 308,000 SQUARE-FOOT WAREHOUSE AND LOT MERGER
FOR 15.9 ACRES ON PLACENTIA LANE NEAR ORANGE STREET

We, the undersigned citizens of the City of Riverside, oppose the proposed warehouse cited above, to be located directly across Placentia Lane from the Ab Brown Sports Complex and in close proximity to the old Riverside Golf Course, Reid Park, residential properties and local businesses in the Northside Neighborhood.

We believe that although the proposed warehouse is consistent with current zoning under the city's Municipal Code, it is nevertheless incompatible with existing land uses in this still viable rural residential area whose agricultural heritage goes back 200 years. Construction of a warehouse at this location or anywhere else in the Northside would set a precedent that would destroy the Northside's quality of life.

We believe this case should not be decided without a public hearing or an Environmental Impact report for the following reasons:

- 1) The proposed site is subject to flooding because it is located in the Santa Ana River flood plain which is only partially protected by the levee;
- 2) The proposed warehouse would bring truck traffic from Main Street to the west, the 91 freeway from Center and Columbia to the east, and the 60 freeway from Main and Orange to the south onto narrow rural streets in neighborhoods that would be severely harmed by these encroachments;
- 3) The truck traffic would not only generate harmful fumes along surface streets but also while idling their engines when doing business at the warehouse, a circumstance that would reverse the good air quality currently created by the grass and trees at the Ab Brown Sports Complex, old Riverside Golf Course and Reid Park;
- 4) The same truck traffic would also generate an undesirable level of noise that would have a negative effect on quality of life in the Northside;
- 5) The proposed site, like many other places in the Northside, may have significant archeological value to the people of Riverside.

We wish to appeal this case to the Planning Commission or City Council so that these matters and others pertaining to this proposal may be deliberated at a public hearing.

RE: PLANNING CASE P14-1033 & P14-1034
PROPOSED 308,000 SQUARE-FOOT WAREHOUSE AND LOT MERGER
FOR 15.9 ACRES ON PLACENTIA LANE NEAR ORANGE STREET

We, the undersigned citizens of the City of Riverside, oppose the proposed warehouse cited above, to be located directly across Placentia Lane from the Ab Brown Sports Complex and in close proximity to the old Riverside Golf Course, Reid Park, residential properties and local businesses in the Northside Neighborhood.

We believe that although the proposed warehouse is consistent with current zoning under the city's Municipal Code, it is nevertheless incompatible with existing land uses in this still viable rural residential area whose agricultural heritage goes back 200 years. Construction of a warehouse at this location or anywhere else in the Northside would set a precedent that would destroy the Northside's quality of life.

We believe this case should not be decided without a public hearing or an Environmental Impact report for the following reasons:

- 1) The proposed site is subject to flooding because it is located in the Santa Ana River flood plain which is only partially protected by the levee;
- 2) The proposed warehouse would bring truck traffic from Main Street to the west, the 91 freeway from Center and Columbia to the east, and the 60 freeway from Main and Orange to the south onto narrow rural streets in neighborhoods that would be severely harmed by these encroachments;
- 3) The truck traffic would not only generate harmful fumes along surface streets but also while idling their engines when doing business at the warehouse, a circumstance that would reverse the good air quality currently created by the grass and trees at the Ab Brown Sports Complex, old Riverside Golf Course and Reid Park;
- 4) The same truck traffic would also generate an undesirable level of noise that would have a negative effect on quality of life in the Northside;
- 5) The proposed site, like many other places in the Northside, may have significant archeological value to the people of Riverside.

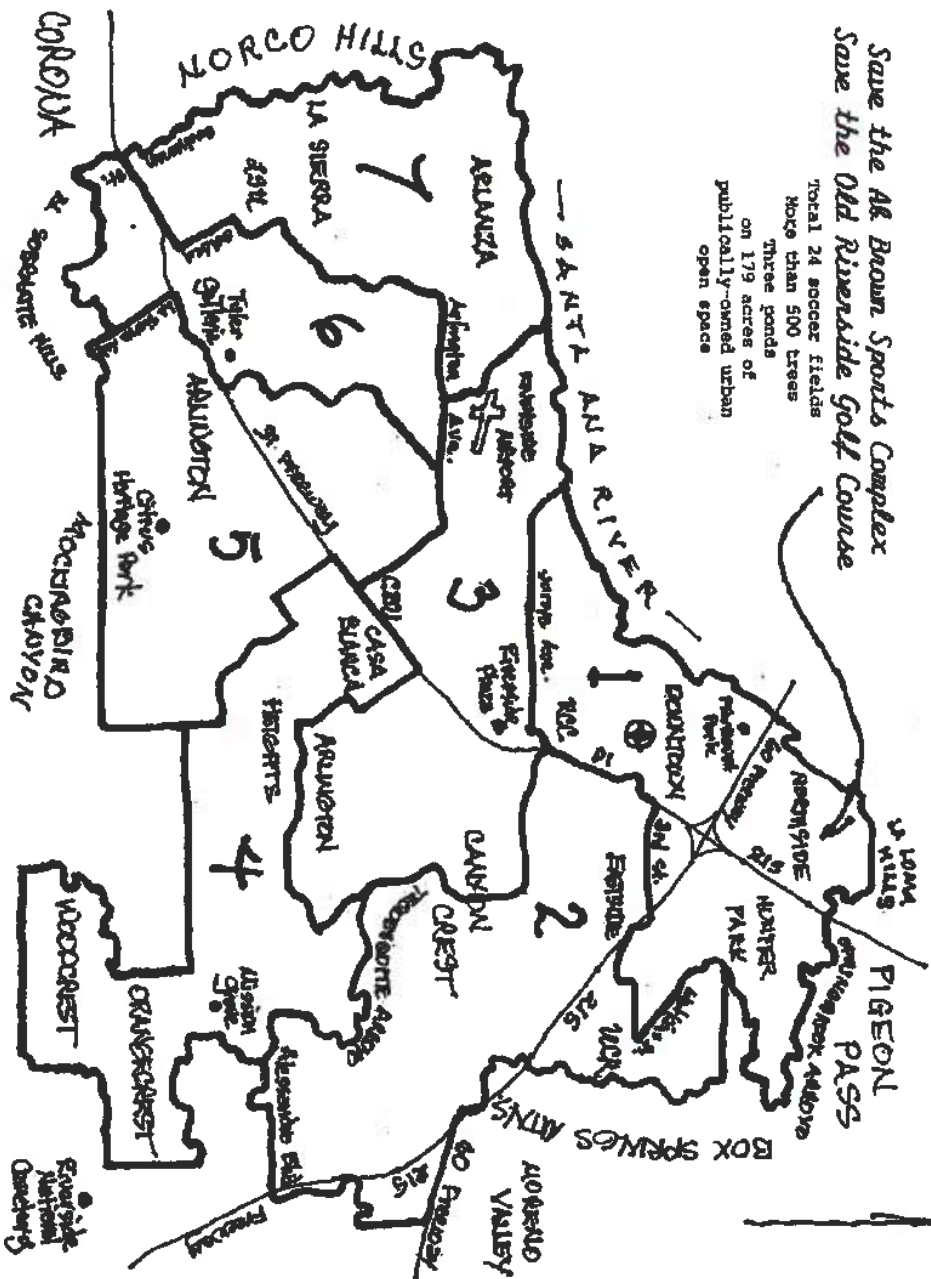

We wish to appeal this case to the Planning Commission or City Council so that these matters and others pertaining to this proposal may be deliberated at a public hearing.

RE: PLANNING CASE P14-1033 & P14-1034
PROPOSED 308,000 SQUARE-FOOT WAREHOUSE AND LOT MERGER
FOR 15.9 ACRES ON PLACENTIA LANE NEAR ORANGE STREET

We, the undersigned citizens of the City of Riverside, oppose the proposed warehouse cited above, to be located directly across Placentia Lane from the Ab Brown Sports Complex and in close proximity to the old Riverside Golf Course, Reid Park, residential properties and local businesses in the Northside Neighborhood.

We believe that although the proposed warehouse is consistent with current zoning under the city's Municipal Code, it is nevertheless incompatible with existing land uses in this still viable rural residential area whose agricultural heritage goes back 200 years. Construction of a warehouse at this location or anywhere else in the Northside would set a precedent that would destroy the Northside's quality of life.

We believe this case should not be decided without a public hearing or an Environmental Impact report for the following reasons:

- 1) The proposed site is subject to flooding because it is located in the Santa Ana River flood plain which is only partially protected by the levee;
- 2) The proposed warehouse would bring truck traffic from Main Street to the west, the 91 freeway from Center and Columbia to the east, and the 60 freeway from Main and Orange to the south onto narrow rural streets in neighborhoods that would be severely harmed by these encroachments;
- 3) The truck traffic would not only generate harmful fumes along surface streets but also while idling their engines when doing business at the warehouse, a circumstance that would reverse the good air quality currently created by the grass and trees at the Ab Brown Sports Complex, old Riverside Golf Course and Reid Park;
- 4) The same truck traffic would also generate an undesirable level of noise that would have a negative effect on quality of life in the Northside;
- 5) The proposed site, like many other places in the Northside, may have significant archeological value to the people of Riverside.

We wish to appeal this case to the Planning Commission or City Council so that these matters and others pertaining to this proposal may be deliberated at a public hearing.
