

Minutes: Victoria & Washington Traffic Control Discussion December 6 2018

City of Arts & Innovation.

• Welcome and Introductions

Meeting convened at 3:00 PM, discussion began at approximately 3:10 PM

Those present shown on the attached sign-in sheet, also present City Staff include Robert Filiar (Urban Forester Manager) and Nathan Mustafa (Interim City Traffic Engineer)

Background Information

Discussion took place of previous committee meetings

o Goals & Objectives

N Mustafa states that the objective of the meeting is to discuss improvements that minimize the potential for impact

M Humboldt presented a diagram illustrating neighborhood traffic [Attached]

• Discuss Issues & Concerns

Issues discussed include:

* Impacts by schools, lack of pooled transportation (buses)

* Congestion caused by other area traffic, M Humboldt notes she would like the City to examine traffic associated with Overlook Parkway

* P Chavez notes concern with zoning and development patterns

* Height of heavy vehicles conflicts with tree canopy [Update: City recommends posting warning signs for height restriction, would not be subject to citation, would need to monitor for efficacy]

*Residents request count data

* Key concerns at the intersection include: prioritization of local traffic, pedestrian and bicycle safety, preservation of dedicated trees and all vegetation where possible, highlight Victoria Avenue's historic nature

• Resident Recommendations

* W Bailey recommends construction of a right turn lane with merging lane to reduce conflicts with southbound traffic

* Residents ask for signage to inform motorists that they are approaching historic Victoria Avenue

* Improvements to right hand turn lane must be mindful of family, pedestrian and bicycle safety

• Next Steps

* Residents request that a broader discussion of regional traffic passing through the green belt is included as part of the General Plan Update, also to include an evaluation of heavy vehicles

* City to provide a concept illustration to residents, and City commits to meeting in the field with residents to review and discuss concepts
