Culinary Vision

- The idea or the concept comes from the many corners of the world and the people who make up Mexico and its culinary traditions.
- Food in Mexico is everything, from a small family gathering aka quinceañera to business meetings and funerals.
- Mexico's influence in food comes from French, Spanish, Jewish, Middle Eastern, African, Japanese still Mexico hasn't forgotten their roots.
- The bolillo or pan Frances, the al pastor tacos or know as the shawarma.
- Mexico took a little bit of this and a little bit of that and an made it theirs.
