## MISSION STATEMENT

*"The mission of the Commission on Disabilities is to promote greater awareness of, respect for, and the total participation of individuals with disabilities into all aspects of life."*

State law restricts the Commission on Disabilities from taking action on an item unless it has been included on an agenda and posted at least 72 hours in advance of a meeting or unless the matter falls within one of the narrow exceptions. Consequently, any item not listed on this agenda will normally have to be delayed until the item can be made part of a posted agenda.

### PRESENTATIONS

2. Presentation from Mayor's Social Work Internship Program to create awareness about how hands-on social work, collaboration with local universities, faith organizations, the City of Riverside's Office of Homeless Solutions and the local nonprofit homeless shelter can work together to alleviate barriers to housing, health and social services.

Due to a miscommunication, this presenter was not in attendance. This presentation will be rescheduled to the January 16, 2020 meeting.

3. Presentation from the Riverside Police Department about Integrating Communications, Assessment and Tactics training for defusing critical incidents.

Sergeant Milby provided a detailed presentation on how in recent years, the law enforcement community has been studying developments regarding police use of force, particularly with respect to officer safety, the safety of the people they encounter, and the impact these issues have on police-community relationships.

There is a growing realization among leaders of the policing profession and members of the public that in many communities, police use of force has become a critical issue that is setting back community-police relations and may even be impacting public and officer safety. It was clear that additional research and new ways of thinking about police use of force were needed, and the law enforcement community has stepped forward to fill that need.

A critical need for training on certain types of encounters was identified, such as a person behaving erratically, often the result of mental illness, post-traumatic stress disorder, intellectual or developmental disabilities, or conditions such as autism that limit the person's ability to understand or respond rationally to a police officer's orders. Integrating the Communications, Assessment and Tactics (ICAT) training model fills this gap in law enforcement training in the key areas of decision-making, crisis recognition and response, tactical communications and negotiations, and operational safety tactics.
