- Review the level of approval for each expenditure (up to 25 expenditures per year to analyze) from the Board of Public Utilities and /or the City Council for each SCPPA.
- Compare expenditures to industry standard costs to determine the amount of savings, if any, the City’s ratepayers experienced through the SCPPA Agreements.
- Determine the level of participation in projects additional to the provisions for financing generation and transmission of electric power, to determine if the SCPPA participation has been effective at providing services in an economical, efficient, and effective manner, whether its goals and objectives were/are being achieved, and whether it was/is complying with applicable City and Utility Department procedures in areas of contract signature authority.
- Analyze previously performed audits from the City’s Internal Audit Division and other external contractors specifically related to the SCPPA participation.
