PLANNING CASES P19-0863 and P20-0133 – PLOT PLAN ELEVATIONS AND CONDITIONAL USE PERMIT  
– 10411-10481 MAGNOLIA AVENUE, WARD 6

Proposal by Darrin Olson of Magnolia Partnership, LLC to consider the following entitlements to facilitate construction of a mixed-use development with 450 residential dwelling units and 9,000 square feet of multi-tenant commercial space: 1) Site Plan Review for site design and building elevations; and 2) Conditional Use Permit to permit accessory structures (carports) and recreational open space within the MU-V-SP and MU-V-SP-WC - Mixed Use-Village and Specific Plan (Magnolia Avenue) Overlay **Zones**. Brian Norton, Senior Planner, presented the staff report. Mr. Norton stated that staff was recommending a revision to condition 17, to read: An easement shall be recorded for reciprocal parking, access, maintenance and shared use of the retail common open space subject to the review and approval of the Planning Division and City Attorney's Office. Since the publication of the staff report, staff has received 17 letters and a petition in opposition and one letter in support of the project. Concerns range from adding additional single-family development in an area with existing multi-family development; requesting that the site be developed with commercial uses only, consistent with previous development on the site; only operate during business hours, and safety with excess speed of vehicles along Banbury Drive south of the project site. In response to the letters: the property is currently zoned mixed use in 2017 as part of the Housing Element update. The current zoning allows for a mix of residential and commercial uses in close proximity to community services and job centers, focusing on reducing single vehicle trips. The point regarding the site being developed with commercial development only. As previously indicated the site is zoned to allow for a balanced mix of uses which include commercial. A purely commercial development would create a higher number of vehicle trips than a residential development thus substantially increasing the number of vehicle trips in the area. In regard to standard business hours. While businesses are analyzed in regard to operations, there is no guarantee that no commercial development would not operate on a 24/7 schedule. In response to excess vehicular speed along Banbury. This would be subject to enforcement through the Riverside Police Department. The letter in support discusses the redevelopment of a blighted site with residential to support shops, restaurants, as well as new residences which would help revive the local economy in a pedestrian active area. Darrin Olson, Magnolia Partnership, LLC, stated that they were in agreement with the recommended conditions. Public comment: First caller, unable to hear name and Ted Meyer, spoke in opposition. They expressed their concerns regarding infrastructure, traffic congestion, traffic analysis report noted that the intersection of Tyler and Magnolia has the highest collision in city; blackouts in area; inaccurate traffic analysis on Banbury did not have an accurate depiction due to the pandemic as schools and non-essential businesses are closed; height of the proposed building, density. Maribel Nunez, spoke in support of the project and the need for affordable housing units. The public hearing was closed. Commissioner Villalobos suggested outdoor structures for dining. He also noted that the park area in the back has pathways ending into the parking lot and suggested that this be reconfigured to allow for a walking loop. Andrew Walcker stated they would be happy to

consider these suggestions. It was the Commission’s consensus that this was a good project for the area. Following discussion it was moved by Commissioner Mill and seconded by Commissioner Rubio to recommend that the City Council: 1) Determine under Section 15183.3 - Streamlining for Infill Projects, pursuant to Public Resources Code Section 21094.5, that the project is consistent with the Final EIR for the 2014-2021 Housing Element Update/Housing Implementation Plan certified in December 2017 (SCH No. 2017041039) subject to compliance with the approved Mitigation Monitoring and Reporting Program; and 2) Approve Planning Cases P19-0863 (Site Plan Review), P20-0133 (Conditional Use Permit), based on the findings outlined in the staff report and subject to the recommended conditions. With the modification to condition 17 as noted by staff and the addition of, “pedestrian path around the parklike area at the rear of the site as suggested by Commissioner Villalobos. Chair Kirby advised of the appeal period.

Note: The Planning Commission’s recommendation will be forwarded to the City Council, a public hearing is required for final approval.
