

CHAPTER 5.36 - REGULATION OF MOBILE FOOD VENDORS

5.36.010 - Findings.

The City Council finds as follows:

- A. Mobile food vending has the potential to pose special dangers to the public health, safety and welfare of residents of the City.
- B. The act of looking for prospective buyers while operating a vending vehicle makes the operator less attentive to pedestrian and vehicular traffic. When done on public roadways, this poses obvious traffic and safety risks to the public which the City seeks to prevent.
- C. Vending vehicles parked in highly congested areas ~~one location for more than ten minutes at a time further~~ may exacerbate traffic problems ~~in highly congested areas~~ and obstruct sidewalks. This ~~may also create~~s safety issues for children who may run across public roadways attempting to access the vendors. This is especially true of school sites when children are coming to and going from school.
- D. Mobile food vendors who fail to park their vending vehicles correctly during a transaction attract prospective buyers onto public roadways, creating a further traffic and public safety hazard.
- ~~E. The sale of non-food items presents special regulatory challenges which may affect the health, safety and welfare of minors who frequent this type of vendor, often without adult supervision.~~
- E.F. The City has an important and substantial public interest in providing regulations to prevent safety, traffic and health hazards, as well as to preserve the peace, safety and welfare of the community.
