

**DRAFT ENVIRONMENTAL  
JUSTICE POLICIES**

City of Riverside

# TABLE OF **CONTENTS**

Section 1 Introduction .....	1
Section 2: Policies .....	1

# **SECTION 1:** **INTRODUCTION**

California Environmental Protection Agency defines environmental justice communities as:

- 1) Areas disproportionately affected by environmental pollution and other hazards that can lead to negative public health effects, exposure, or environmental degradation; or areas with concentrations of people that are of low income, high unemployment, low levels of homeownership, high rent burden, sensitive populations, or low levels of educational attainment<sup>1</sup>; or
- 2) Low-income areas that are disproportionately affected by environmental pollution and other hazards that can lead to negative health effects, exposure, or environmental degradation.<sup>2</sup>

As defined by the Environmental Protection Agency, environmental justice is the fair treatment and meaningful involvement of all people regardless of race, color, national origin,

or income, with respect to the development, implementation, and enforcement of laws, regulations, and policies. The need to promote environmental justice has come from a history of disproportionate environmental harm to low-income and minority populations. This is, in part, because of compounded exposure to environmental hazards that can lead to adverse health outcomes and compromised quality of life.

California Government Code Section 65302 requires that jurisdictions with environmental justice communities incorporate environmental justice policies into their General Plans. This can include developing a separate environmental justice element or integrating related goals, policies, and objectives into the other elements of the General Plan. These updates are required when a jurisdiction adopts the General Plan or revises two or more elements concurrently and they must address ways that environmental justice communities are protected from environmental and health hazards. Opportunities for community members to engage in decision-making that affects environmental quality and health outcomes must also be identified.

Environmental justice communities within the City of Riverside have been identified using the California Communities Environmental Health Screening Tool ("CalEnviroScreen"), a data tool

developed by CalEPA's Office of Environmental Health Hazard Assessment (OEHHA) pursuant to Health and Safety Code Section 39711 and other statutory requirements. CalEnviroScreen provides statewide data that can be used to identify communities disproportionately impacted by, or vulnerable to, environmental pollution and contaminants. The mapping tool contains 12 indicators related to pollution burden and 8 indicators that track population characteristics and other vulnerabilities.

To ensure compliance with California Senate Bill 1000, the City of Riverside General Plan 2025 includes environmental justice policies and actions that are integrated into the existing elements of the General Plan. The following environmental justice policies provide a framework for integrating environmental justice into the City's Phase 2 General Plan update.
