Dear Andrew:

Thank you for your assistance in putting together the invoicing on the City of Riverside project revisions for additional in situ material and subsequent increase in solids volume.

I have created a table of equipment which reflects items onsite during the project, although it is not definitive. The information includes pricing obtained from the following suppliers whose rate sheets and pricing are readily available through internet based sources:

- Hertz Truck Rentals (1 ton dual axle trucks)
- Sunbelt Rentals, Bakersfield (pumps, power pack, discharge, suction, fire & hydraulic hoses)
- Rain for Rent (water cannon & nozzle)
- American Rentals (ladders, fans, cones)
- Big Trailer Rentals, Winchester, CA (40' Trailer)
- Rent1USA (Gator Rental)
- Premier Safety (Safety Equipment)

Many of the items included below have been modified to such an extent that they have a great deal more value than in their original form, however, that also makes them impossible to acquire comparable rental rates on. I have opted to use the straightforward rental rate in supporting our daily rate as reflected on the invoice for simplicity's sake. This table is comprised of those items which were the closest I could find to what we actually utilize in digester cleaning. It is a fair and safe assumption that these costs are lower than what our equipment is valued at since they are predominantly unattainable without capital outlay. Please note that none of the costs include tax and may reflect prior year pricing.

Equipment Description	Quantity	# of Days in Use	Rental Rate (daily or specified)	Total Cost
