#### CHAPTER 1. EXECUTIVE SUMMARY

#### Introduction

MGT is pleased to present the City of Riverside with this summary of findings for the recently updated fees and charges study for related city departments.

The City of Riverside had not had an external cost of service study performed since 2015. The City contracted with MGT in May of 2021 to perform a cost-of-service study using fiscal year 2020-2021 budgeted figures, staffing, and operational information. The current City fees represent the fees being charged at the beginning of this study.

After MGT completed the cost analysis for the departments' fees and charges, the final phase of the study, including fee recommendations and presentation to council, was put on hold by the City. In 2023, the City elected to have their own staff, with training and guidance from MGT, update MGT's costing models with fiscal year 2023-2024 budgeted expenditures and salaries/benefits, and 2023 annual volume statistics. The findings in this report represent a combination of MGT's original cost analysis and the City's updates.

This report is the culmination of an extensive study conducted by MGT in collaboration with the City's management and staff. MGT would like to take this opportunity to gratefully acknowledge all management and staff who participated in this project for their efforts and coordination. Their responsiveness and continued interest in the outcome of this study contributed greatly to its success.

## **Study Scope and Objectives**

The study included a review of fee-for service activities within the following departments:

- Community Development:
  - Building & Safety\*
  - Code Enforcement
  - Planning\*
  - o Arts and Cultural Affairs
- Public Works:
  - Engineering\*
  - o Public Parking
  - Animal Services
- Police
- Fire
- Parks, Recreation and Community Services
- City Clerk
- Finance

- Library
- Riverside Public Utilities
  - o RPU Electric
  - o RPU Water

\*Note that the following Development Services departments' cost analysis results are not included in this report and will be presented at a later date:

- Community Development Building & Safety
- Community Development Planning
- Public Works Engineering

The study was performed under the general direction of the Finance Department with the participation of representatives from each department. The primary goals of the study were to:

- Determine the City's costs to provide specific fee-related services.
- Determine whether there are any opportunities to implement new fees.
- Identify service areas where the City might adjust fees to better reflect the full cost of services or to subsidize fees with general fund revenue to reflect other economic or policy considerations.
- Develop fiscal projections based on recommended increases (or decreases) to fees.
- Provide comparative data for what neighboring cities are charging for similar services.
- Review potential disproportionate impact of existing and recommended City fees and charges on sectors of the community and recommend mitigating actions to ensure/enhance equity in the application of City fees.

The information summarized in this report addresses each of these issues and provides the City with the tools necessary to make informed decisions about any proposed fee adjustments and the resulting impact on restricted and general fund revenues.

## **Study Findings**

The study's primary objective was to provide the City's decision makers with the basic data needed to make informed pricing decisions. This report details the full cost of each service for which a fee is charged and presents proposed fees and fiscal projections based on recommended cost recovery levels. The fee analysis adheres to Proposition 26 which is based on the "estimated reasonable cost of providing a service". Recommendations were based upon careful consideration of the results of the cost analysis, historical cost recovery levels, and market comparisons.

The exhibit on the following page displays the costs and projections of each department/division into the following categories:

**Column A, User Fee Costs** – This column represents what the actual cost is for each of the departments to provide annual user fee services based on the annual volume statistics. In total, this study evaluated \$23,786,220 in costs to provide user fee services. It is this amount that was the focus of this study and represents the total potential for user fee-related revenues for the City.

**Column B, Current Revenues** — This column represents what the City is currently recovering in revenue for these same services based on the annual volume statistics. Based on current fee recovery levels, the city receives fee-related cost recovery in the amount equal to \$11,774,588 and is experiencing an overall 50% cost recovery level. Cost analysis of individual fees for each department may be found in subsequent sections of this report.

**Column C, Current Subsidy** – Current fee levels recover 50% of full cost, leaving 50%, or \$12,011,632, to be funded by other sources. This subsidy represents an opportunity for an updated and more focused cost recovery effort by the City for fee-related services.

**Column D, Recommended Recovery** – It is estimated that adoption of the recommended fees would increase cost recovery to \$18,226,514. This would bring the overall cost recovery level up to 77%.

**Column E, Increased Revenue** — Assuming activity levels remain relatively static, approximately \$6,451,925 in additional cost recovery could be received by the City. This would represent a 55% increase over the amounts currently being collected for these activities by the City on an annualized basis.

## Methodology

A cost-of-service study is comprised of two basic elements:

- Hourly rates of staff providing the service.
- Time spent to provide the service.

The product of the hourly rate calculation multiplied by time spent yields the cost of providing the service.

## **Hourly Rates**

The hourly rate methodology used in this study builds indirect costs into city staff hourly salary and benefit rates to arrive at fully burdened hourly rates. Fully burdened hourly rates are a mechanism used to calculate the total cost of providing services. Total cost is generally recognized as the sum of the direct cost together with a proportionate share of allowable indirect costs. The proper identification of all costs (including labor, operating expense, department administration and citywide support) as "direct" or "indirect" is crucial to the determination of the total cost of providing services.

Direct costs are typically defined as those that can be identified specifically to a particular function or activity, including the labor of persons working directly on the specific service for which the fee is charged, and possibly materials or supplies those people use for the task. Indirect costs are those that support more than one program area and are not easily identifiable to specific activities. Examples of indirect costs are: 1) departmental administrative and support staff, 2) training and education time, 3) public counter and telephone time, 4) some service and supply costs, and 5) citywide overhead costs from outside of the department as identified in the City's cost allocation plan.

MGT's hourly rate calculation methodology includes the following:

**Personnel Services Analysis** – each staff classification within the department or division is analyzed in the study. The first burden factor is comprised of compensated absences such as vacation/holidays/sick leave days taken in a year's time. Staff classifications are then categorized as either direct (operational) or indirect (administrative or supervisory) labor. In some cases, a classification will have both direct and indirect duties. The total indirect portion of staff cost is incorporated into hourly overhead rates.

**Indirect Cost Rate** – a ratio of indirect cost to direct labor (salaries plus benefits) is established. There are three elements of indirect cost incorporated, including:

- Indirect Labor includes total compensation, administrative and supervisory staff costs.
- Other Operating Expenses most services and supplies are included as a second layer of indirect cost and are prorated across all fees and services. There are some service and supply expenses classified as "allowable" direct. Some examples of these are professional services expenses, or sports supplies. These allowable direct expenses would be directly associated with specific fees or programs, as opposed to being allocated across all activities through the indirect overhead.
- External Indirect Allocations this represents the prorated portion of citywide overhead (from the City's cost allocation plan) which is attributable to the service for which the fee is charged.

**Fully Burdened Hourly Rates** – incorporates all the elements that comprise the hourly rates used in this cost analysis.

- Each direct or operational staff classification is listed, together with the average annual salary.
- The hourly salary rate is calculated by taking the annual salary of an employee and dividing by 2,080 available productive hours in a year.
- The benefit rate reflects the average benefit rate as a percentage of the salary rate. Multiplying this percentage by the hourly salary rate determines the benefit rate to be included in the fully burdened rate.
- The overhead rate is derived by multiplying the internal and external indirect cost rates against the salary plus benefit rates.

The total combines the salary, benefits, and overhead rates. This is the fully burdened rate for each staff classification. MGT prepared indirect overhead rates and corresponding hourly rate calculations using FY 2020-21 budgeted expenditures, and City staff updated the rates using FY 2023-2024 budgeted expenditures.

## **Time Spent**

Once fully burdened hourly rates were developed for city staff, the next step in the process was to identify staff time spent directly on each of the user fee activities. Each staff person involved in the user fee services identified time spent to complete each task associated with all user fee services. Annual volume statistics were also gathered in order to develop total annual workload information. This information is provided in detailed user fee workbooks which were provided to the City upon completion of the study.

## Fee Calculations and Revenue Projections

Given this information, MGT was able to calculate the cost of providing each service, both on a per-unit and total annual basis (per-unit cost multiplied by annual volume equals total annual cost). As mentioned above, costs were calculated by multiplying per-unit time estimates by the hourly labor rates; additional operating expenses directly associated with certain services were also added in. Finally, if other departments or divisions provided support for certain user fee activities, this time was accounted for and added into the analysis as a crossover support activity. Full costs are then compared to current fees/revenues collected, and subsidies (or over-recoveries) are identified.

User fee summaries by department may be seen in Chapter 2 of this report.

## Legal, Economic & Policy Considerations

Calculating the true cost of providing city services is a critical step in the process of establishing user fees and corresponding cost recovery levels. Although it is an important factor, other factors must also be given consideration. City decision makers must also consider the effects that establishing fees for services will have on the individuals purchasing those services, as well as the community as a whole.

The following legal, economic and policy issues help illustrate these considerations.

- State law In California, user fees are limited to the "estimated reasonable cost of providing a service" by Government Code section 66014(a) and other supplementary legislation. California voters approved Proposition 26 in November of 2010, which defined "taxes" as "any levy, charge, or exaction of any kind imposed by a local government" subject to seven exceptions. Most of the exceptions require that the City charge a fee which does not exceed the reasonable cost to the City to provide the service for which the fee is charged. Thus, if the fee exceeds the reasonable cost of service, it may be considered a "tax" which must be approved by the voters. We have calculated each fee to recover no more than the reasonable cost of each service so that none of the fee adjustments recommended herein will be considered taxes under Proposition 26. Additionally, it should be noted that some fees (e.g., certain animal control fees or oversize permit fees) may be capped by state law and may not change, regardless of any cost analysis performed.
- **Economic barriers** It may be a desired policy to establish fees at a level that permits lower income groups to use services that they might not otherwise be able to afford.
- Community benefit The Council may wish to subsidize some user fees in order to reflect policy considerations which supersede cost recovery. For example, many Community Services fees have very moderate cost recovery levels. Some programs are provided free of charge or for a minimal fee regardless of cost. Youth and senior programs tend to have the lowest recovery levels. Miscellaneous classes tend to have a moderate cost recovery level and adult sports programs typically have a higher cost recovery level.
- Private benefit If a user fee primarily benefits the fee payer, we recommend the fee be set at, or close to, 100% full cost recovery. Development-related fees generally fall into this category; however, exceptions are sometimes made for services such as appeal fees or fees charged exclusively to residential applicants.
- Service driver In conjunction with the third point above, the issue of who is the service recipient versus the service driver should also be considered.
- Managing demand For those fees which are not subject to pure cost recovery limitations, other
  market considerations may inform recommended fee levels. Elasticity of demand is a factor in
  pricing certain city services; increasing the price of some services results in a reduction of demand
  for those services, and vice versa.
- Competition Certain services, such as recreation classes, may be provided by neighboring communities or the private sector, and therefore demand for these services can be highly dependent on what else may be available at lower prices. Furthermore, if the City's fees are too low, demand enjoyed by private-sector competitors could be adversely affected.
- Incentives Fees can be set low to encourage participation in a service, such as a youth sports program or the issuance of a water heater permit.

• Comparative Data - One additional tool that many agencies use when considering how to establish fees for services is a comparison of what other agencies are charging for similar services. As part of this study, MGT collected fee schedules from surrounding area cities and extracted a sampling of fees to compare with fees charged by the City of Riverside. Based on the Council adopted market basket of cities, the City's Executive Steering Committee selected six agencies, including neighboring agencies and the County of Riverside, that would provide the best comparison. The fees to compare were selected by the departments with guidance from MGT. The results of the comparative survey may be found for each department within their respective summary sections.

## CHAPTER 2. USER FEE SUMMARIES BY DEPARTMENT

## **Community Development**

The user fee/cost analyses for this department mirrors the structure of City's fee schedule and was developed separately for each division:

- Code Enforcement
- Arts and Cultural Affairs

Fees are charged in a variety of ways including:

- Flat (or fixed) fees the fee is always the same, regardless of size or complexity of the service provided in each instance.
- Per square (or linear) foot the fee is calculated based on the size of the project under review.
- ◆ Hourly (or time-and-materials) city staff track time and materials expense, and fees are calculated to recover actual costs.
- ◆ Actual cost this fee is charged to recover consultant costs as billed to the City.
- Percentage of permit the fee is calculated as a percentage of the original permit fee.

#### **Code Enforcement**

Code enforcement fees recover the cost of enforcing city codes and regulations. This promotes compliance by residents and businesses, ultimately achieving the City's goal of a safe and attractive community for all.

Within the Code Enforcement division, current fees recover 67% of the total costs to provide services for which fees are charged. Recommended fees are set at 100% of cost. Assuming no loss in demand, recommended fee adjustments will result in an additional \$471,170 revenue per year.

Recovery levels for Code Enforcement fees range from 0% to 159%. Two fees are currently recovering over 100% of cost. In keeping with State law, the target cost recovery percentage must be set at 100%.

Code Enforcement collects over half a million dollars annually through administrative civil penalties and administrative citations. Both of these fee categories have subcategories of \$100, \$200, and \$500 depending on the number of violations. MGT recommends leaving these fees the same.

The User Fee Summary Sheet following this narrative provides further details of MGT's fee analysis for Code Enforcement.

#### Arts and Cultural Affairs

The Arts and Cultural Affairs division services offer significant economic and community benefits within the City. By keeping film permit fees below cost recovery, the City can attract film productions, boosting the local economy and enriching the community with cultural experiences. Additionally, subsidizing special event permits for non-profits allows them to host enriching events that promote social good, cultural experiences, and economic activity. Due to the community benefit, program fees historically have been heavily subsidized by the general fund. This is in line with industry standards and with surrounding comparable agencies.

Within the Arts and Cultural Affairs division, current fees recover 4% of related fee-for-service costs. Staff has recommended a small increase to some fees to recover 7% of cost. Assuming no loss in demand, recommended fee adjustments will result in an additional \$14,421 revenue per year.

The User Fee Summary Sheet following this narrative provides further details of MGT's fee analysis for Arts and Cultural Affairs.

#### **Comparative Data**

Surveys showing a selected group of Building, Code Enforcement, Planning, and Arts and Cultural Affair's fees in comparison to neighboring agencies can be found following this narrative. Overall, the department fees are within the range of their peers.

#### Disproportionate Impact

The department did not identify any fees that may present a disproportionate impact on low-income or other sectors of the community.

#### **Public Works**

The user fee/cost analyses for this department mirrors the structure of City's fee schedule and was developed separately for each division. Divisions that are included in the cost analysis include:

- Public Parking
- Animal Services

Fees are charged in a variety of ways including:

- Flat (or fixed) fees the fee is always the same, regardless of size or complexity.
- Per square (or linear) foot the fee is calculated based on size of the project under review.
- Hourly (or time-and-materials) city staff track time and materials expenses, and fees are calculated to recover actual costs.
- Actual cost this fee is charged to recover consultant costs as billed to the City.
- Per work activity these fees are for blanket flat fees for annual citywide utility excavation permits issued to utility companies.
- Per connection or installation the fee is calculated based on the number and type of physical connections to the City's infrastructure, or the number of units of a particular device installed by the City on behalf of a private person.

The User Fee Summary Sheet following this narrative provides further details of MGT's fee analysis for Engineering.

## **Public Parking**

Public parking regulations manage the use of on-street parking to assist residents with valid permits and their guests in finding parking near their homes. These efforts benefit both the local community and residents and are eligible for cost recovery. Within the Parking division, current fees recover 63% of costs to provide services for which fees are charged, leaving 37% to be subsidized by other funding sources. This 37% represent a total dollar amount of \$10,713 annually. Staff recommends increasing recovery levels to 100%. Assuming no loss in demand, fee adjustments result in additional annual revenues of \$10,713 per year for an overall recovery.

The User Fee Summary Sheet following this narrative provides further details of MGT's fee analysis for Parking.

#### **Animal Services**

The City of Riverside contracts with the County of Riverside to provide shelter and field services through the Riverside County Department of Animal Services (RCDAS). Dog licensing and kennel permit services are provided by City staff within the Public Works department.

Most fees are charged on a flat (or fixed) fee basis – the fee is the same, regardless of size or complexity, and based on the time required to provide the service applied to the fully burdened hourly rate. Fines and penalties are not limited to cost.

Animal Services fees benefit those individuals or businesses specifically requesting or utilizing the services and are therefore eligible for cost recovery. Animal services also provide a benefit to the community at large. As such, most public agencies subsidize animal control services with the idea that licensing compliance and responsible pet ownership are more important than additional revenue collection.

Current fees recover 38% of total costs to provide the services for which fees are charged. Department staff recommend that animal services fees be increased by 31% overall, while most of them will still remain subsidized due to the community benefit of providing these services.

One new penalty fee proposal is included in this analysis to incentivize timely renewal of kennel\Cattery licenses and recover the cost of additional staff time:

Kennel/Cattery License Late Fee – The proposed fee is \$50.

Assuming no loss in demand, fee adjustments will result in an increase of \$237,927 in revenue next year, recovering 49% of total cost.

#### **Comparative Data**

Surveys showing a comparison of the City's parking citation fee to neighboring agencies can be found following this narrative. Overall, the department fee is within the range of their peers. Animal Services fees were not surveyed.

## **Disproportionate Impact**

When meeting with the above divisions in Public Works, MGT and the staff together reviewed their current and proposed fees to determine if there may be any potential disproportionate impact on a sector of the community.

Public Parking did not identify any fees with potential disproportionate impact.

Animal Services: Providing a discount for altered dog licenses is typical of most animal service agencies to encourage owners to spay and neuter their dogs. The Animal Services division recommended an additional discount on altered dog license fees for senior citizens, since charging the full cost may present disproportionate impact on fixed or low-income seniors. The Executive Steering Committee's recommendation is to keep the department's recommended recovery level but consider incremental increases to eventually achieve a 50% recovery level. Revenue from Unaltered Dog Licenses penalties may serve as a source of subsidies for citizen dog license fees.

#### Footnotes

- 1 Fee #1 Change from hourly to actual cost.
- 2 Fees #2, 3 License to operate a Kennel
- 3 Fee #3.1 Fines and penalties can be set at City discretion to encourage compliance.
- 4 Fees #7, 8, 9, 17 Department recommends a discount on fees for Senior Citizens. Charging the full cost may present disproportionate impact on fixed or low-income seniors. Steering Committee feedback: Keep department's recommended recovery level, but consider incremental increases to achieve a 50% recovery level. Also, point to the penalties from Unaltered Dog Licenses as the source of subsidies for Senior Citizen fees. Perhaps we target a recovery level where these break even, so that general tax dollars are not subsidizing the Senior fees.
- 5 Fees #10, 11, 12, 16 Fines and penalties can be set at City discretion to encourage compliance. RMC mandates dogs be spayed or neutered.

## **Parking Fees Comparison**

Activity	Riverside Current Fee	Riverside Proposed Fee	Anaheim	Corona	County of Riverside	Long Beach	Moreno Valley	Pasadena
Parking Citation Fee	\$41 Metered Parking	N/A	N/R	\$45 no-permit parking	\$53	\$69	\$41	No Parking Anytime/Expired Meter - \$59

#### **Police**

Most of the Police department fees are charged on a flat (or fixed) fee basis – the fee is the same, regardless of size or complexity, and based on the time required to provide the service applied to the fully burdened hourly rate. Exceptions are copy fees, which are charged on a per page basis, along with several fees such as DUI accident response investigation that are charged at actual cost and billed in arrears. The reason for setting fees at "actual cost" instead of a fixed amount is that the time spent can vary greatly. In addition, false alarm fines and penalties, which escalate with each additional occurrence, are not limited to cost. The department also has other fines on their fee schedule that were not part of this study.

Police records and permit services benefit those individuals or businesses specifically requesting or utilizing the services and are therefore eligible for cost recovery. The recommended policy is to generally - but with some exceptions - set fees to recover 100% of all costs associated with providing fee-for-service activities.

Current fees recover 44% of total costs to provide the services for which fees are charged. Department staff recommend that fees be increased by 91% overall. Most police records and permit fees have recommended fees set at 100% of cost. Some fees will remain subsidized due to State law which caps the fee that can be charged.

The department has fourteen (14) fees that will need to be reduced to comply with California laws regarding user fees, since the current fees are greater than the full cost of service.

Two fees are recommended for removal from the City's Master Fee Schedule because the services are no longer being provided. Each proposed fee removal is noted with a **Remove** notation in the Fee Description column on the **User Fee Study Summary Sheet** following this narrative.

Assuming no loss in demand, fee adjustments will result in an increase of \$434,478 in revenue next year, recovering 84% of total cost.

## **Comparative Data**

The survey showing a selected group of the Police department's fees in comparison to neighboring agencies can be found following this narrative. Overall, the department fees are within the range of their peers.

### **Disproportionate Impact**

The department did not identify any fees that may have a disproportionate impact on the community.

#### Footnotes

- 1 Fees #3, 4, 5, 30, 83 These fees are set by the State.
- 2 Fees #19, 20 Department recommends removing these fees. Massage Therapist permits are issued by the State at a lower cost.
- 3 Fee #74 Department recommends increasing fee from \$13 to \$20, which is in line with neighboring jurisdictions.

## **Police Fees Comparison**

Activity	Riverside Current Fee	Riverside Proposed Fee	Anaheim	Corona	County of Riverside	Long Beach	Moreno Valley (Riverside County Sheriff)	Pasadena

Second Hand Dealer Permit - Renewal	\$759	\$561	N/R	\$83	N/R	\$233	N/A	N/A
Patrol Unit Video - per 10 minute recording	\$50	\$49	Body Cam - \$33 for walk in request	\$42	N/R	N/A	N/A	\$79

#### **Fire**

The user fee/cost analysis for this department follows the basic structure of City's fee schedule and was developed at the department level. All divisions within the department are included in the cost analysis.

Fees are charged in either of the following ways:

- ◆ Flat (or fixed) fees the fee is always the same, regardless of size or complexity.
- ♦ Hourly or Actual Cost city staff track time and materials expense, and fees are calculated to recover actual costs.

The Fire fee schedule includes rentals and fines which were not included in this study.

Fire prevention and other miscellaneous fire services benefit those individuals or businesses specifically requesting or utilizing the services and are therefore eligible for cost recovery. The recommended policy is to generally - but with some exceptions - set fees to recover 100% of all costs associated with providing fee-for-service activities.

Current fees are recovering 76% of total costs to provide the services for which fees are charged. The department's recommended recovery level is 100% for all fees. Assuming no loss in demand, proposed fee adjustments will result in an increase of \$544,095 in revenue.

The department has twenty-seven (27) fees that will need to be reduced to comply with California laws regarding user fees, since the current fees are greater than the full cost of service.

Nine (9) fees are recommended for deletion since they were redundant or duplicates of other fees. Details can be found in the User Fee Study Summary Sheet following this narrative.

Twenty-one (21) new fee proposals are included in this analysis:

- Third and Subsequent Plan Review Submittal
- Final As-Built (Revision) Plan Check
- Fire Protection Plan (FPP) Review
- Hazardous Material Analysis Report
- High Pile 0-20,000 square feet
- ◆ High Pile 20,000+ square feet
- Defensible Space Review/Inspection
- Performance Based Review
- Alternative Means and Method Review
- Rocket Launch
- Burn Permit
- Blasting Permit
- ◆ Fire Alarm Control Panel/Communicator change out only
- Fire and Life Safety Self-Certification Inspection

Parking Structures: 500 square feetParking Structures: 5,000 square feet

Parking Structures: 10,000 square feet

◆ Parking Structures: 100,000+ square feet

Residential Remodels and Additions

Single Family Dwellings and Duplexes

Accessory Dwelling Unit

#### **Comparative Data**

The survey showing the Fire department's fees in comparison to neighboring agencies can be found following this narrative. Overall, the department's fees are within the range of their peers.

## **Disproportionate Impact**

The Fire department's fees are primarily charged to developers and business owners. The department did not identify any fees that may present a disproportionate impact on low-income or other sectors of the community.

#### Footnotes

- 1 Fee #64 Change from flat fee to actual cost.
- 2 Fee #77, 80 Remove this fee. Category is redundant.
- 3 Remove this category redundant since it's the same as Commercial category.
- 4 Fees #156-157 Remove Industrial category. Redundant since it's the same as Commercial category.
- 5 Fees #174-176 Remove. Same as Fee #49.
- 6 Fees #178-180 Remove. Planning Department collects these fees.
- 7 Fee #199 Changed from flat fee to hourly.

# Parks, Recreation and Community Services

The user fee/cost analysis for Parks, Recreation, and Community Services was developed for the following divisions that provide fee-for-service activities:

- Recreation (520500)
- ◆ Administration (520000)

Fees are charged in a variety of ways including:

- Per participant/team/use or entry for recreation programs
- Per entry for community events
- Hourly facility rentals
- Flat fees for various permit fees
- Sliding scale fees based on size of event, or user-type (resident vs. non-resident, commercial vs. non-profit, etc.)

The analysis for Parks, Recreation, and Community Services included typical parks and recreation fees like youth camps, adult sports, and rentals.

It should also be noted that not all the fees' full costs are calculated at the individual level. In the table below some fees were grouped into "programs", comparing annual program costs to annual revenues collected. The decision to analyze some of the fees this way is that it is often easier to conceptualize time spent by staff and costs associated with these fees on an annual scale rather than break down the information by the different fees charged within the program. As a brief example, a fee may have a resident and a non-resident charge, but the time and costs associated with each would be the same at the individual level. However, the revenues, and therefore, the cost recovery level, for each could be much different. The fees are grouped to show the full cost and revenues for the program to display a more accurate picture of cost recovery.

The User Fee Summary sheets on the following pages illustrate the department's proposed fee adjustments by fee or program area and provide overall cost/revenue comparisons. If adopted, the adjustments to parks and recreation fees will result in an additional \$484,854 for the City if demand for these services remains constant.

## **Comparative Data**

The survey showing Recreation's fees in comparison to neighboring agencies can be found following this narrative. Overall, the department's fees are within the range of their peers.

## **Disproportionate Impact**

A major tenet of any parks and recreation department is to provide activities and services that promote an active, healthy lifestyle to as many community members as possible. Getting outdoors, exercising, and participating in group or team activities not only positively affect our physical health and wellbeing

but our mental health as well. As such, pricing that results in a decrease in participation is rarely advised. In aggregate, parks and recreation programs typically do not recover costs, nor should they.

Using this as a background, the department and MGT team have decided to make only modest increases to select fees (see full listing in table). In fees and programs that primarily benefit youth and senior programs, the cost recovery recommendation remains low; often recovering 25% or lower of the full cost of providing the program. Additionally, programs such as an ESL class, that primarily serves lower income populations, are recommended to recover only 25% of the program costs. Higher recovery levels are primarily seen in programs such as facility rentals, that may be viewed as less essential, and adult programs, who often have more means to pay for the programs.

## **Recreation User Fee Summary Sheet**

# **City Clerk**

The user fee/cost analysis for this department follows the basic structure of City's fee schedule and was developed as a whole for the department. Most fees are charged at a flat fee basis with the exception of copy fees which are charged per page.

City Clerk fees benefit those individuals or businesses specifically requesting or utilizing the services and are therefore eligible for cost recovery. The recommended policy is to set fees to recover 100% of all costs associated with providing fee-for-service activities.

Four (4) of the City Clerk's nine (9) fees are set by the state and cannot be changed. Only one of the fees, passport photos, had activity in the preceding year so revenue numbers and projections are based on that one fee.

The passport photo fee was shown to be recovering 136% of the cost to provide the service. The current fee is \$8.00 and the total cost to provide the service is \$6.00. As mentioned elsewhere in this report, California law states that a city cannot charge a customer more than it costs to provide the service; therefore, the department is recommending the fee be lowered to \$6.00.

Assuming no change in demand, fee adjustments will result in a net loss of \$12,645 in revenue.

Four (4) fees were shown to be recovering less than full cost:

- Document Certification
- Electronic Data Records Request CDs and DVDs
- Electronic Data Records Request Flash Drive
- Document Duplication per page

All four fees are being recommended to increase to full cost. As there was no activity reported for those fees in the preceding year, no revenue projections were able to be made.

## **Comparative Data**

City Clerk fees were not included in the comparison survey.

## **Disproportionate Impact**

The City Clerk did not identify any fees potentially presenting a disproportionate impact.

## **City Clerk User Fee Summary Sheet**

#### **Finance**

The Finance department's user fees are primarily provided by the Business Tax and Accounts Receivable units. Their fees cover a variety of services including processing returned checks, processing tax-free certificates, and issuing street vendor and transit permits.

Highlights of this division's analysis are as follows:

- Fee Increases Four fees were found to be under-recovering. Three of those are being recommended to increase slightly while still remaining under full cost, while one fee, Refund Processing Charge to cover administrative cost, is being recommended to stay at the current fee.
- Fee Decreases Seven fees were found to be over—recovering; that is, the full cost was less than the current fee. Since the last study, processes have been streamlined requiring less staff time, resulting in a lower cost of service. These fees are being recommended to decrease to full cost, so as to be in compliance with California user fee law.

Assuming no loss in demand, fee adjustments result in a revenue loss of \$555. Details on each fee can be found in the User Fee Summary Sheet on the following pages.

#### **Comparative Data**

The survey showing a selected group of the Finance department's fees in comparison to neighboring agencies can be found on the following pages. Overall, the department's proposed fees are within the range of their peers.

One item of note:

Credit card processing fees – Section 6159 of the State of California Government Code grants cities the authority to assess a fee, termed a "convenience fee", for the use of a credit or debit card, not to exceed the transactional costs incurred by the City, to customers paying by credit or with debit card. The City's expenditures related to credit and debit card payments are approximately \$2.3 million. This includes an estimated \$441,744 for the General Fund.

Currently, the Parks and Recreation department charges a convenience fee to offset these processing costs. To cover these costs for most other transactions, the City will implement a convenience fee of 2.41% for online and in-person payments.

The Riverside Public Utilities (RPU) is currently evaluating a convenience fee structure to cover credit and debit card processing costs. RPU currently absorbs these costs, totaling approximately \$1.9 million annually.

While processing fees can vary, all convenience fees are set at or below the City's actual costs. To minimize any burden from these fees, a free alternative for electronic check payments (ACH) will be available. Details can be found in the survey.

# Disproportionate Impact

The department did not identify any fees potentially presenting a disproportionate impact on residents.

#### Footnotes

<sup>1</sup> Fees #1, 2, 3, 4, 7 & 8 - These fees have not been charged in recent years so no time estimates were available for cost analysis. Department recommends leaving on fee schedule at current fee and including in comparison survey.

<sup>2</sup> Fees #5 & 6 - Government Code Section 6157(b) permits the city to collect a reasonable charge for the returned check, not to exceed the actual costs incurred by the city, to recover the city's processing and collection costs.

City does not receive the fee.	No credit card fees.	No credit card fees.

# Library

The Riverside Public Library's fee schedule has fees for service as well as room rentals and fines. Meeting room rentals, as with all parks/facility/property use fees, need not be tied to cost-of-service and may be set at market rates; therefore, were not analyzed in this study. The Library currently collects fines for lost or damaged items. (In keeping with nationwide trends, the Library no longer charges fines for overdue items, so as to encourage use of Library services among all residents.) As with other penalty fees described in this study, these fees do not need to be tied to cost-of-service and were not analyzed in this study. Copy fees also have no recommendations for adjustments and were not included in this study as the Library copy machines are self-service and no staff time is involved.

The following existing fee-for-service activities were analyzed:

- ◆ Inter-Library Book Retrieval This fee is recommended to remain at \$2.00.
- Reservation Processing Fee: Main Library This fee is recommended to increase to \$27.00
- Reservation Processing Fee: Branches This fee is recommended to increase to \$25.00.
- ◆ Meeting Room Cleaning Fee This fee is recommended to increase from \$21.00 to \$28.00.
- Replacement of Lost Cards This fee is recommended to remain at no charge.
- Replacement of Lost Library Items Processing This fee is recommended to remain at \$10.75.
- Replacement of Lost Library Items Collection fee This fee is recommended to remain at \$10.00.
- 3D Printing Fee this fee is recommended to remain at \$1.80 per gram/filament.

Implementing the recommended fee adjustments will increase the Library's user fee cost recovery rate from 14% to 15% and assuming no loss in demand, will generate an additional \$401 in revenue on an annual basis.

## **Comparative Data**

The survey showing a selected group of Library fees in comparison to neighboring agencies can be found following this narrative. Overall, the department's fees are within the range of their peers.

## **Disproportionate Impact**

As mentioned above, the Library has eliminated collecting fines for overdue materials, citing a nationwide movement to eliminate public library late fines; not only because the cost of staff time to process and collect the fines may exceed the revenue received, but also because there are concerns and recognition among jurisdictions that assessing fines on patrons for their missing an arbitrary due date when returning books may prevent lower income residents and children from benefitting from library services.

## **Riverside Public Utilities**

The Riverside Public Utilities (RPU) department provides electric and water service to the city's residents. In addition to charging rates, which are governed by the public utility commission, the Electric and Water divisions also provide fees for service, such as turning service on and off, meter installation, and development-related services. MGT did not analyze electric or water rates but did analyze the full cost of the fees for service provided by the Electric and Water divisions.

#### Electric

The user fee/cost analysis for the RPU Electric division follows the basic structure of City's fee schedule and was developed at the department level, meaning costs from all three divisions, Administration, Electric, and Water were included when developing fully burdened hourly rates. The indirect costs of the Electric division mirrors those of the Water division; both include administrative cost from the Administration division.

Fees are charged in either of the following ways:

- Flat (or fixed) fees the fee is always the same, regardless of size or complexity.
- Hourly or Actual Cost city staff track time and materials expense, and fees are calculated to recover actual costs.

The fees for service provided by the Electric division benefit those individuals or businesses specifically requesting or utilizing the services and are therefore eligible for cost recovery. The City's policy is to set fees to recover 100% of all costs associated with providing fee-for-service activities.

Current fees are recovering 59% of total costs to provide the services for which fees are charged. The department's recommended recovery level is 100% for all fees. Assuming no loss in demand, proposed fee adjustments will result in an increase of \$2,711,191 in revenue.

Three (3) fees are recommended for deletion since those services are no longer provided.

Seven (7) new fee proposals are included in this analysis:

- Service Turn-on Charge for Customers with AMI
- Service Reconnection for Customers with AMI
- Meter Spot Initial Inspection
- Plan Check for Building and Public Works
- Cancellation Fee
- Temporary Meter Removal for Main Breaker Repair
- CEQA Review

## **Comparative Data**

Electric fees were not included in the comparison survey.

#### **Disproportionate Impact**

The Electric division's fees are primarily charged to developers and business owners. The division did not identify any fees that may present a disproportionate impact on low-income or other sectors of the community.

#### Water

The user fee/cost analysis for the RPU Water division follows the basic structure of City's fee schedule and was developed at the department level, meaning costs from all three divisions, Administration, Electric, and Water were included when developing fully burdened hourly rates. The indirect costs of the Water division mirrors those of the Electric division; both include indirect cost from the Administration division.

Fees are charged in either of the following ways:

- Flat (or fixed) fees the fee is always the same, regardless of size or complexity.
- ◆ Hourly or Actual Cost city staff track time and materials expense, and fees are calculated to recover actual costs.

The fees for service provided by the Water division benefit those individuals or businesses specifically requesting or utilizing the services and are therefore eligible for cost recovery. The City's policy is to generally - but with some exceptions - set fees to recover 100% of all costs associated with providing fee-for-service activities.

Current fees are recovering 37% of total costs to provide the services for which fees are charged. The department's recommended recovery level is 100% for all fees. Assuming no loss in demand, proposed fee adjustments will result in an increase of \$1,555,866 in revenue.

Seven (7) fees are recommended for deletion since those services are no longer provided.

Five (5) new fee proposals are included in this analysis:

- ◆ Water Service Connection Charges ¾ inch meter (non-residential/4-lane street)
- Water Service Connection Charges 1-inch meter (non-residential/4-lane street)
- Water Supply Assessment
- Fire Flow Test
- Plan Check for Building and Public Works

Additionally, the division is recommending changing two fees from the current flat rate to actual cost based on estimated cost of installation:

- ◆ Water Service Connection Charges 1 ½ inch meter
- Water Service Connection Charges 2-inch meter

This change is recommended because these meters are generally for commercial applications and the cost of installation can vary greatly depending on time and materials.

## **Comparative Data**

Water fees were not included in the comparison survey.

## **Disproportionate Impact**

The Water division did not identify any fees that may present a disproportionate impact on low-income or other sectors of the community.

<sup>1</sup> Fees #63 & 64 - These fees are proposed to change from "Flat Fee" to "Actual Cost" based on estimated cost of installation. 1 1/2 and 2 inch meters are generally for commercial applications, and the cost of installation can vary greatly depending on time and materials.
