BACKGROUND:

The Public Works Department Wastewater Division is responsible for the collection and treatment of wastewater generated within the City of Riverside and the communities of Edgemont, Highgrove, Jurupa, and Rubidoux at the Riverside Water Quality Control Plant (RWQCP). To satisfy the United States Environmental Protection Agency's (EPA) National Pollution Discharge Elimination System (NPDES) permit, wastewater must be treated to achieve regulatory water quality standards. The RWQCP treatment processes require various chemicals, including citric acid and ferric chloride, to achieve water quality objectives.

DISCUSSION:

Staff requests City Council approval of the proposed change orders to secure the necessary chemicals for the remainder of the fiscal year, ensuring uninterrupted wastewater treatment operations and compliance with federal, state, regional, and local regulations.

This change order request is in accordance with Purchasing Resolution 24101 "Section 1104. Change Orders. Modifications to a Purchase Order shall be made only by Change Order. Subject to the availability of funds, Change Orders may be utilized for purposes of (1) adding and/or deleting quantity of items being procured... Unless otherwise specifically authorized by the Awarding Entity, Change Orders which cumulatively exceed the following will require Awarding Entity approval...b) Any Change Order which causes the contract price to exceed \$50,000, if the Contract and/or Purchase Order was not previously approved by the Awarding Entity".

The Purchasing Manager concurs that the actions to approve the change orders are in compliance with Purchasing Resolution No. 24101, Section 1104.

STRATEGIC PLAN ALIGNMENT:

These items support **Strategic Priority 4 – Environmental Stewardship** and **Goal 4.2 – Sustainably manage local water resources to maximize reliability and advanced water reuse to ensure safe, reliable, and affordable water to our community.**

1. Community Trust – Conducting regular water treatment routines ensures wastewater discharges do not negatively impact the community and environment. The RWQCP requires chemicals to treat wastewater, such as ferric chloride, hypochlorite, citric acid, sodium bisulfate, and polymer to comply with federal, state, regional and local regulatory requirements.

2. Equity – The purchase of these chemicals supports RWQCP efforts in protecting the public's health and environment by ensuring wastewater treatment is performed efficiently in compliance with federal, state, regional, and local regulatory requirements.

3. Fiscal Responsibility – The purchase of these chemicals supports RWQCP efforts in minimizing inefficiencies and develop control methods to maximize reliability and ensure efficient wastewater treatment.

4. Innovation – The purchase of these chemicals exemplifies a collaborative partnership between; Kemira Water Solutions Inc., of Fontana, California; Univar USA, Inc., of Kent, Washington; Pioneer Americas, LLC., of Wilmington, Delaware; and SNF Polydyne, Inc., of Riceboro, Georgia to enhance operational reliability by achieving measurable improvements through proper wastewater treatment.

5. Sustainability & Resiliency – The purchase of these chemicals supports the implementation of sustainability to treat wastewater that is generated within the City of Riverside and the communities of Edgemont, Highgrove, Jurupa, and Rubidoux at the Riverside Water Quality Control Plant.

FISCAL IMPACT:

The total fiscal impact of the action is \$1,909,864. Upon City Council approval, a supplemental appropriation of \$788,756 from Sewer Working Capital will be recorded in the Sewer Fund, Sewer Systems Treatment, Chemical Supplies account number 4125200-426600, as listed in the table below.
