

PUBLIC BENEFITS & ENERGY EFFICIENCY COMMUNITY WORKING GROUP OUTCOME AND PROPOSED SPENDING PLAN

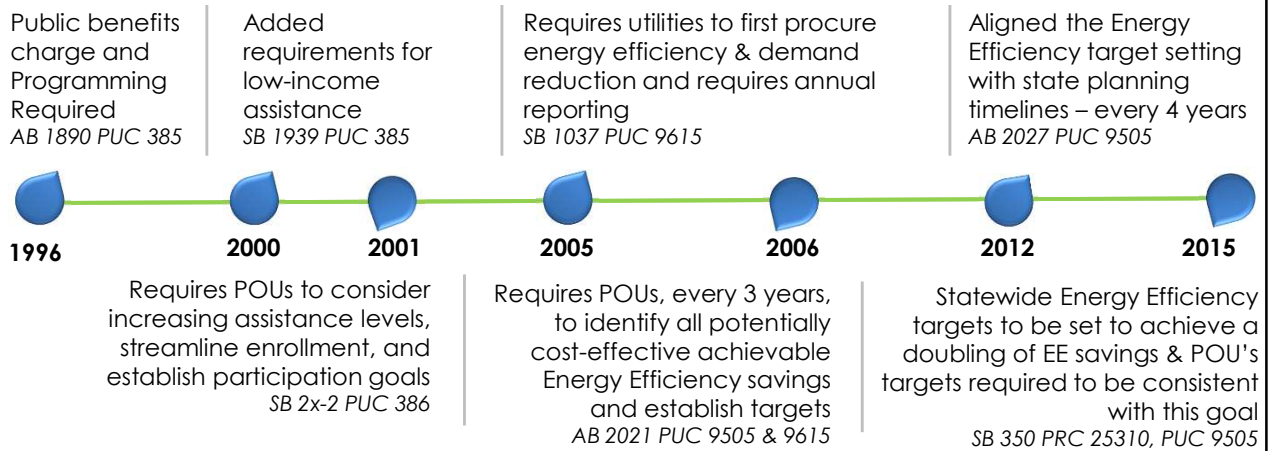

Public Utilities

City Council
June 16, 2026

RiversideCA.gov

1

LEGISLATIVE CHANGES & ADDITIONS OVER TIME

AB = Assembly Bill | SB = Senate Bill | PUC = Public Utilities Code | PRC = Public Resources Code

2

RiversideCA.gov

2

PUBLIC BENEFIT FUND SOURCE OF AUTHORITY

Public Benefits funds were established in 1996 by Assembly Bill 1890 (AB 1890)

Goals

1. Provide cost-beneficial energy efficiency services to customers
2. Offer customers meaningful information on the costs and benefits of energy efficiency measures
3. Reduce market barriers to investments in energy efficient products and services
4. Create a sustainable and competitive energy efficiency services market

Created a Non-bypassable Customer Charge to provide for customer programs

1. Minimum charge of 2.85%
2. Residential and commercial customers
3. Average residential customer pays ~ \$3.00 per month
4. Average commercial customer pays ~ \$10.00 per month
5. RPU collects approximately \$10 million annually

RiversideCA.gov

3

PUBLIC BENEFIT FUND ALLOWED SPENDING CATEGORIES

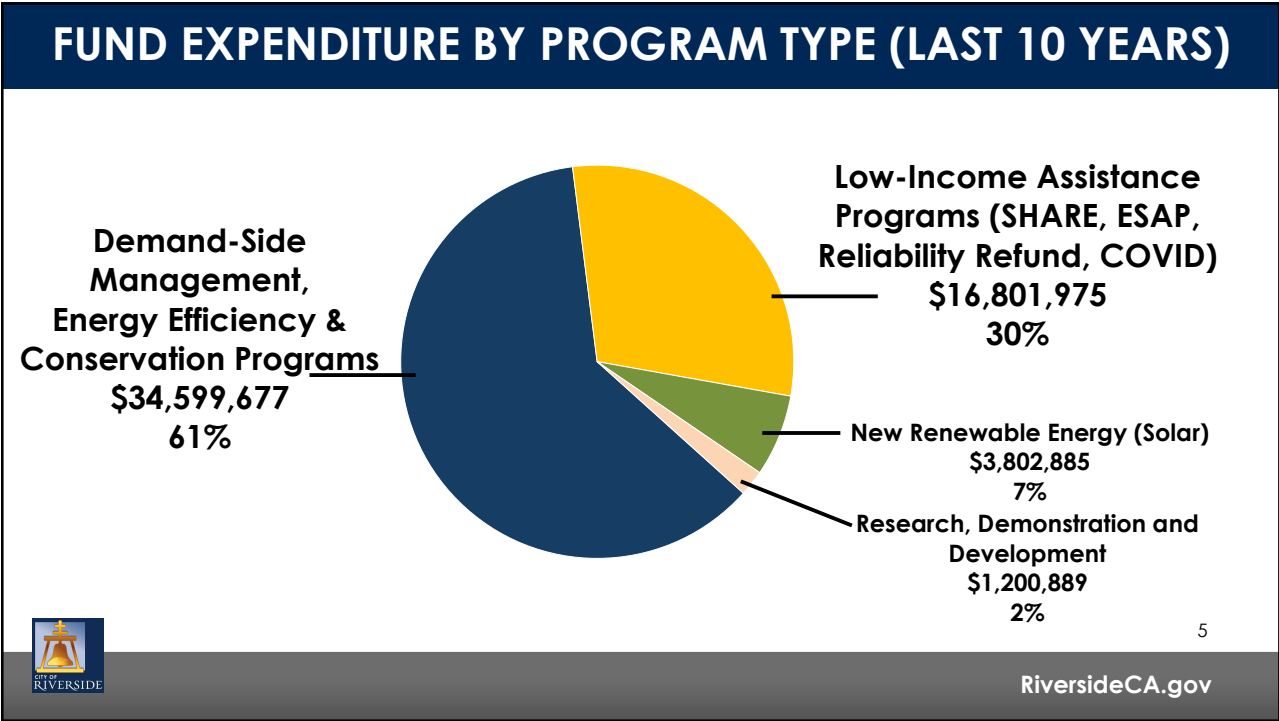

Limited Use of the Funding

1. Cost-effective demand side management to promote energy efficiency and energy conservation
2. New investment in renewable energy resources and technologies
3. Research, development, and demonstration programs for the public interest to advance science or technology which is not adequately provided by competitive and regulated markets
4. Services provided for low-income electricity customers, including, but not limited to, energy efficiency services, education, weatherization, and rate discounts

6

BACKGROUND

- 1. January 13, 2025:** The RPU Board provided with an update on the Public Benefits Charge (PBC) reserve funds and programs
 - a. Identified that \$32 million in the PBC reserve was available for funding
 - b. Requested staff to return with a Spending Plan
- 2. April 22, 2025:** Mayor Lock Dawson requested RPU staff to:
 - a. Establish a task force of knowledgeable community members to recommend the best way to spend the PBC reserve funds to RPU customers
 - b. Directed findings to be presented to the RPU Board and City Council by the end of 2025
- 3. June 2025:** Knowledgeable community members were identified and invited to attend the first meeting of the Public Benefits and Energy Efficiency Community Working Group (Working Group)

7

WORKING GROUP MEMBERS

Mayor Patricia Lock Dawson	City Council
Vice RPU Board Chair Dr. Brian Siana	Riverside Board of Public Utilities
RPU Board Member Tom Evans	Riverside Board of Public Utilities
Dr. Matt Barth	UCR
Nick Adcock	Chamber of Commerce
Mark Dowling	Inland Valleys Assn of Realtors
Victor Cao	California Apartment Association
David Hahn	Habitat for Humanity
Rose Mayes	Fair Housing Council of Riverside
Tom Donahue	Resident
Faustino Alvarez	Community Access Center
Chris Trujillo	Industry Expert – Heat pumps
Christopher Kern	Compelle media
Michael Berger	Compelle media

COMMUNITY WORKING GROUP

The Community Working Group was advisory and intended to provide ideas, comments, express questions, and provide community frameworks around how RPU's PBC reserve funds should be spent.

Final decisions on the expenditures, programs, structures, and budgets will be established by the RPU Board and City Council.

COMMUNITY WORKING GROUP MEETINGS

Meeting 1

July 31, 2025

- Education about PBC
- History of the PBC
- Overview of current programs offered by RPU

Meeting 2

October 7, 2025

- Additional information as requested
- Began project considerations
- Developed initial parameters and guidance for programs

Meeting 3

December 18, 2025

- Discussion around solar power generation and impacts
- Program & project proposal incorporated input
- Working group discussion and recommendations
- Request for a 4th meeting

Meeting 4

January 15, 2026

- Refined Program & project proposal
- Working group discussion with final recommendations

MAIN THEMES

Categories of topics and parameters from the Working Group with an overarching recommendation to modify communications about the PBC funded programs

1 **Non-Energy Impacts (NEIs)**

Benefits of Energy Efficiency in comfort and safety

2 **How electricity is used**

Largest energy usage and behavioral changes

3 **Investment in the City**

Solar & batteries within the City

4 **Customer benefit**

Keep benefits to customers & low-income support

11

SUMMARY OF RECOMMENDATIONS

	Program	Timeline	Funding
1.	Residential Energy Storage Rebate Program	5 years	\$5,000,000
2.	Community and Emergency Centers Solar PV, Battery Storage, and Energy Efficiency Rebate Program	6-years	\$12,000,000
3.	Resiliency at the Utility Operations Center and City Emergency Operations Center Solar and Battery Rebate Program	3-years	\$5,000,000
4.	Residential Battery Energy Storage or Solar with Battery Energy Storage Pilot Program for residential to test high concentration of battery and solar and potential demand response programs (limited area)	5-years	\$9,000,000
5.	Energy Savings Assistance Program and Mobile Home and Multifamily Program (expansion of existing programs)	2-years	\$2,000,000
6.	Riverside University Research Grant Program (expansion of existing programs)	4-years	\$1,000,000
Total		2-6 years	\$34,000,000

12

RiversideCA.gov

12

RESIDENTIAL ENERGY STORAGE REBATE PROGRAM

Provide a \$500/kWh rebate with an additional rebate amount for low-income customers for the installation of energy storage systems at residences.

1. Proposed funding: \$5 million
2. Timeline: 5-year program with annual review
3. Note: This program has been in development since mid-2025 due to its potential positive impact on the resilience of the overall distribution system and its benefit to customers. It was intended to be introduced in early 2026.

13

RiversideCA.gov

13

COMMUNITY & EMERGENCY CENTERS SOLAR AND BATTERY REBATE PROGRAM

Rebate program to provide funding for solar PV, battery storage and deep energy efficiency to improve the resiliency of the City's community centers and libraries that serve the community during emergencies

1. Proposed funding: \$12 million
2. Timeline: 6-year program with annual review
3. Notes
 - a. The Parks, Recreation and Community Services Department has confirmed support for this program and has identified the reconstruction of Nicols Park Community Center as an initial project
 - b. Funding incorporated WG recommendation to provide energy efficiency and other RPU education

14

RiversideCA.gov

14

SOLAR AND BESS AT UOC AND EOC

Provide a rebate program for the installation of solar and battery storage with microgrid capabilities for Utility Operations Center (UOC) and the Emergency Operations Center (EOC) operations during significant power outages and emergencies. The solar at the UOC will support the community's energy usage when not being used as a microgrid.

1. Proposed funding: \$5 million
2. Timeline: 3-year program with annual review

15

RiversideCA.gov

15

BESS OR SOLAR WITH BESS FOR RESIDENTIAL CUSTOMERS DR PILOT PROGRAM

Program to provide a rebate for the costs of battery energy storage system (BESS) or solar with BESS for RPU's residential customers. Pilot program to evaluate options for demand response (DR) for areas with solar and BESS.

1. Proposed funding: \$9 million
2. Timeline: 3-year program with annual review
3. Notes:
 - a. Staff will develop an eligible vendor list with approved pricing to protect customers from fraud and overcharging
 - b. Customers eligible for the program will be identified and notified (about 400)

16

RiversideCA.gov

16

ADDITIONAL FUNDING FOR ESAP AND MHMF

Increase funding to the Energy Savings Assistance and the Mobile Home and Multifamily direct install programs to accelerate energy savings for low- and fixed-income households and customers and expand outreach and education about the programs.

1. Proposed funding: \$2 million
2. Timeline: 2-year program

17

RiversideCA.gov

17

RIVERSIDE UNIVERSITIES RESEARCH GRANT

Expand the Universities Energy Research Grant program to provide grant supported research for energy efficiency programs as well as support new technologies that are intended to support RPU customers.

1. Proposed funding: \$1 million
2. Timeline: 4-year program or until funds fully encumbered.
3. Once a grant is issued, it will take time for the researchers to complete their work and analysis. Funding may not be expended within a year of award. Staff recommend that funding for this grant be provided at \$100,000 to \$500,000 with the expenditure of funds completed within 2 years of award.

18

RiversideCA.gov

18

RPU BOARD COMMENTS

During the discussion of the PB Funds Spending Plan, RPU Board Members provided several comments:

1. Noted that most of the funds will go towards solar and BESS and may be more than needed
2. Funding for City facilities should include language to ensure that the recipient will maintain the equipment that is rebated
3. Expand or add a program with funding from the \$12M for emergency centers to provide benefits to the young and senior populations – day care centers and senior housing/centers specifically
4. That funding for DR research be limited so that most of the funding goes towards solar and BESS that benefit customers directly

19

RiversideCA.gov

19

PROGRAMS CONSIDERED BUT NOT RECOMMENDED

Program Discussed	Reason not Moving Forward
Springs Battery Storage Project	Project can be funded by other sources, including rates. Considered a utility project instead of community project.
Demonstration Facility Project	While modeled after programs offered by other POUs, it did not provide sufficient direct benefit to RPU customers
Refund of PBC reserve funds to customers	After review by the City Attorney's office, it was determined that it was not legal under state law or allowed under the City Charter
Solar PV installations at: <ul style="list-style-type: none"> • Parking structures at city facilities • On warehouses 	After discussion of the status of solar in Riverside and the impacts of solar on the distribution grid and in electricity markets, solar recommendations were modified to provide benefit to all customers and incorporate other program benefits and battery energy storage.
Solar PV over the Gage Canal	Area along the Gage Canal is not sufficient in all areas to support the Solar PV systems or their ongoing maintenance ²⁰

RiversideCA.gov

20

ADDITIONAL INFORMATION

1. Successful programs this fiscal year may reduce the available PBC reserve funds
2. There may be merit in considering continuing the expanded funding for the successful programs in the next two fiscal years
 - a. Mobile Home and Multifamily Direct Install Program
 - b. Small Business Direct Install Program
 - c. Business Outdoor Lighting Direct Install Program
3. Program amounts should be considered flexible with the ability to be adjusted dependent on program need and available funding

21

RiversideCA.gov

21

NEXT STEPS

1. Bring forward a final Spending Plan with each program's requirements and supplemental appropriations
 - a. The Residential Energy Storage Rebate Program may come forward earlier because the program has been in development and was intended to be presented in early 2026
2. Continue community discussions about the PBC funds throughout the summer with the Energy Planning Project funded by the EECBG
 - a. Will include a community-wide survey about the PBC funded programs
 - b. Staff to review and potentially propose a new Daylight Solar Support Program

22

RiversideCA.gov

22

RECOMMENDATIONS

That the City Council:

1. Receive a presentation on the outcome of the Public Benefits Funds Community Working Group and Board recommendations; and,
2. Approved the preferred spending plan for the Public Benefits Charge reserve funds.

23
