Notes: List hydrological and regulatory conditions, infrastructure capabilities, and plausible constraints which may impact the water supplies																
¹ Projections are based on best available data at time of submitting the report and actual supply volumes could be different due to many factors.																
² Units of measure (AF, CCF, MG) must remain consistent.																
³ When opting to provide other than monthly volumes (bi-monthly, quarterly, or annual), please see directions on entering data for Projected Water Supplies in the Table Instructions.

¹ Assessments are based on best available data at time of submitting the report and actual volumes could be different due to many factors.

² Units of measure (AF, CCF, MG) must remain consistent.

³ When optional monthly volumes aren't provided, verify Tables 2 and 3 use the same columns for data entry and are reflected properly in Table 4 and make sure to use those same columns to enter the benefits from Planned WSCP Actions. Please see directions on the shortage balancing exercise in the Table Instructions. If a shortage is projected, the supplier is highly recommended to perform a monthly analysis to more accurately identify the time of shortage.

⁴ If you enter any WSCP Benefits, then you must enter the corresponding planned Actions into Table 5.
