BACKGROUND:

The Public Works Department (Public Works) utilizes a Pavement Management Program (PMP) to collect and analyze pavement data to prioritize maintenance and repair projects. Staff also receive and track service requests from City residents to address point repairs or consider paving projects along streets and neighborhoods. The improvements detailed in this report support the priorities identified in the Pavement Management Program and align with the needs expressed by the community.

Every fiscal year, the Public Works budgets a portion of the State Gas Tax, the County Measure A Sales Tax, and the City’s Measure Z transaction and uses tax revenues for pavement rehabilitation and preservation of existing arterial and minor streets. This project will rehabilitate a portion of City streets that are in very poor condition.

On December 6, 2022, the City Council received a list of proposed maintenance locations to be completed with the various Fiscal Year (FY) 2022/23 funding sources. Public Works strives to balance these funds equally throughout all Council Wards. The improvements discussed herein were included in the complete project list outlined in the report received by the City Council in December 2022.
