FTC: 10 Things You Can Do To AVOID FRAUD

1. **Spot Imposters:** Scammers pretend to be someone you trust.
2. **Do online searches:** Type a company or product name into your search engine with words like "review" "complaint" or "scam".
3. **Don't believe your caller ID:** Technology makes it easy for scammers to fake caller ID information.
4. **Don't pay upfront for a promise:** Someone might ask you to pay in advance for things like debt relief, credit and loan offers, or even prizes. Learn where to get real help with these issues at consumer.ftc.gov
5. **Consider how you pay:** Credit cards have significant fraud protection built in, but some payment methods do not. Wiring money is risky and nearly impossible to get your money back.

FTC: 10 Things You Can Do To AVOID FRAUD

6. Talk to someone: Before you give up your money or personal information, talk to someone you trust. Don't be rushed into making a decision.

7. Hang up on robocalls: If you answer the phone and hear a recorded sales pitch, hang up and report it the FTC. These calls are illegal.

8. Be skeptical about free trial offers: Some companies use free trials to sign you up for products and bill you every month until you cancel.

9. Don't deposit a check and wire money back: By law, the bank must make funds from deposited checks available within days, but uncovering a fake check can take weeks. If a check you deposit turns out to be a fake, you are responsible for repaying the bank.

10. Sign up for alerts from the FTC at ftc.gov/scams.
